RESEARCH

REPORTS

45 VOLCANOLOGY
Volcanic tremor and plume height hysteresis from Pavlov Volcano, Alaska
D. Fee et al.

49 THEORETICAL CHEMISTRY
Density functional theory is straying from the path toward the exact functional M. G. Medvedev et al.
▶ PERSPECTIVE P. 28

52 SUPERCONDUCTIVITY
Evidence for bulk superconductivity in pure bismuth single crystals at ambient pressure O. Prakash et al.
▶ PERSPECTIVE P. 26

55 PLANETARY SCIENCE
Extensive water ice within Ceres’ aqueously altered regolith: Evidence from nuclear spectroscopy T. H. Prettyman et al.

59 FLEXIBLE ELECTRONICS
Highly stretchable polymer semiconductor films through the nanoconfinement effect J. Xu et al.
▶ PERSPECTIVE P. 24

64 ARCHAEOLOGY
Permanent human occupation of the central Tibetan Plateau in the early Holocene M. C. Meyer et al.

68 BRAIN DEVELOPMENT
Microstructural proliferation in human cortex is coupled with the development of face processing J. Gomez et al.

71 PLANT EVOLUTION
Eocene lantern fruits from Gondwanan Patagonia and the early origins of Solanaceae P. Wilf et al.

REVIEW

38 BIOENGINEERING
Industrial biomannufacturing: The future of chemical production J. M. Clomburg et al.
REVIEW SUMMARY; FOR FULL TEXT: dx.doi.org/10.1126/science.aah7111

ON THE COVER

The 3960-megawatt Drax power station, the largest in the United Kingdom, is expected to burn 7.5 million metric tons of biomass in 2017, mainly wood pellets from U.S. forests. Many countries classify wood as a carbon-neutral fuel and encourage its use to produce electricity. But any climate benefits may take decades to materialize. See page 18.
