908 CRITICS ASSAIL INDIA’S ATTEMPT TO ‘VALIDATE’ FOLK REMEDY
Some perceive an insidious effort to infuse Indian science with a Hindu worldview. By S. Kumar

909 CLOSE RELATIVE OF NEANDERTALS UNEARTHED IN CHINA
Partial skulls may belong to elusive Denisovans, who are known almost exclusively by their DNA. By A. Gibbons
▶ REPORT P. 969

FEATU Reeves
900 INTO THE TWILIGHT ZONE
Naturalist Rich Pyle plumbs the undiscovered realm of deep, dimly lit reefs. By K. R. Weiss
903 Can deep reefs rescue shallow ones?
By K. R. Weiss

INSIGHTS
905 DURABLE RESISTANCE TO RICE BLAST
A resistance gene pair balances immunity against crop yield. By G.-L. Wang and B. Valent
▶ REPORT P. 962

904 SEQUENCING ALL LIFE CAPTIVATES BIOLOGISTS
Project would read genomes of more than a million eukaryotes—just for starters. By E. Pennisi

906 MEMBRANE PROTEINS SCRAMBLING THROUGH A FOLDING LANDSCAPE
Improved force microscopy reveals unfolding steps with microsecond time resolution. By D. J. Müller and H. E. Gaub
▶ REPORT P. 945

907 A MEASURE OF MANTLE MELTING
Laboratory measurements suggest that the mantle is 60 K hotter than previously thought. By P. D. Asimow
▶ REPORT P. 942

908 GLOBAL TELESCOPE GEARS UP TO IMAGE BLACK HOLES
Radio dishes in Chile and Antarctica put event horizon of Milky Way’s behemoth in reach. By D. Clery

909 SEQUENCING ALL LIFE CAPTIVATES BIOLOGISTS
Project would read genomes of more than a million eukaryotes—just for starters. By E. Pennisi

910 WATCHING SPECIATION IN ACTION
An interplay between environmental and genetic change is responsible for the emergence of new species. By B. R. Grant and P. R. Grant

911 CLATHRATES GROW UP
Uniquely shaped nanocrystals customized with DNA shells assemble into highly complex clathrate structures. By D. Samanta and R. Klajn
▶ REPORT P. 931

912 PETER C. NOWELL (1928–2016)
Tumor biologist who set the stage for precision medicine. By M. I. Greene and J. S. Moore

POLICY FORUM
914 THE NEED FOR A TRANSLATIONAL SCIENCE OF DEMOCRACY
The political science community should focus on how to foster the health of democracy. By M. A. Neblo et al.
In Brief

920 From Science and other journals

Review

923 Synthetic Chemistry
The atom, the molecule, and the covalent organic framework
C. S. Diercks and O. M. Vaygh

Research articles

924 Ion Channels
Structure of a eukaryotic voltage-gated sodium channel at near-atomic resolution H. Shen et al.

925 Tropical Forest
Persistent effects of pre-Columbian plant domestication on Amazonian forest composition C. Lewis et al.

Reports

931 Materials Chemistry
Clathrate colloidal crystals H. Lin et al.

936 Organic Chemistry
Radical-polar crossover reactions of vinylboronate complexes M. Kischke et al.

939 Optoelectronics
Demonstration of an ac Josephson junction laser M. C. Cassidy et al.

942 Geochimistry
Experimental constraints on the ramp peridotite solidus and oceanic mantle potential temperature E. Sarafian et al.

945 Protein Folding
Hidden dynamics in the unfolding of individual bacteriorhodopsin proteins H. Yu et al.

950 DNA Storage
DNA Fountain enables a robust and efficient storage architecture Y. Erlich and D. Zielinski

954 Brain Microcircuits
Layer-specific modulation of neocortical dendritic inhibition during active wakefulness W. Mutreja et al.

959 Adaptation
Precipitation drives global variation in natural selection A. M. Stepinski et al.

962 Plant Science
Epigenetic regulation of antagonistic receptors confers rice blast resistance with yield balance Y. Deng et al.

966 Pain Research
A nontoxic pain killer designed by modeling of pathological receptor conformations Y. Spahn et al.

969 Paleoanthropology
Late Pleistocene archaic human crania from Xuchang, China Z.-Y. Li et al.

Departments

889 Editorial
Evolving policy with science
By R. Alta Charo and Richard O. Hynes

986 Working Life
Sailing through uncertainty
By Kyle Frischkorn

On the cover

A diver photographs fish as she looks up the water column off Hawaii. Advances in diving technology are helping researchers to explore little-known deep reef habitats, where sunlight fades but invertebrates and fishes thrive in a complex ecosystem. Ichthyologist Richard Pyle of Hawaii’s Bishop Museum is a pioneering explorer of this twilight realm. See page 900. Photo: © Richard L. Pyle
