1376 Global Roadless Areas: Consider Terrain
1377 Response
1378 Technical Comment

IN BRIEF
News at a glance

IN DEPTH
Science Funders Plunge into Publishing
European Commission may follow Wellcome, Gates and set up open-access platform
By M. Enserink

U.N. Biodiversity Group Confronts Cash Crunch
Budget cuts threaten effort to help nations document biodiversity and curb losses
By E. Stokstad

HIV Infections Are Spiking Among Young Gay Chinese
Officials strive to understand infection routes and promote prevention and testing
By K. McLaughlin

Enzymes Offer Waste-to-Energy Solution
Facility digests unsorted garbage to produce green power but could threaten recycling
By M. Peplow

Is the Cell’s Garbage Disposal Sending Messages?
Nerve cells may communicate with shredded proteins
By M. Leslie

Dengue May Bring Out the Worst in Zika
Mouse study offers evidence of antibody “enhancement,” which could explain severity of human cases
By J. Cohen

Circular RNAs Hint at New Realm of Genetics
Mysterious loops of RNA sometimes serve as templates for unexplored proteins
By K. Servick

Deadly Chemistry
Underground labs in China are devising potent new opiates faster than U.S. and Chinese authorities can respond
By K. McLaughlin

How Cyanobacteria Went Green
The discovery of a sister group to Cyanobacteria helps to elucidate how oxygen-generating photosynthesis evolved
By R. E. Blankenship

Costimulation, a Surprising Connection for Immunotherapy
T cell cosignaling molecules may determine sensitivity to immunotherapy
By D. L. Clouthier and P. S. Ohashi

Looking Backward to Move Regulations Forward
Rigorous ex post analyses can improve regulatory policies
By M. Cropper et al.

Harnessing Legal Complexity
Bring tools of complexity science to bear on improving law
By J. B. Ruhl et al.

Mechanized Creatures
A new exhibition surveys five centuries of robotic invention
By P. Sareh and M. Kovac

Cresting a Gravitational Wave
Harry Collins, a sociologist embedded in the LIGO project, recounts the discovery of a lifetime
By A. Cho

Global Roadless Areas: Hidden Roads
By A. C. Hughes

Global Roadless Areas: Consider Terrain
By R. Wu et al.

Response
By P. L. Ibisch and N. Selva

Technical Comment

PERSPECTIVES
Can We Protect Island Flying Foxes?
Flying foxes play key ecological roles on tropical islands, yet face rising threats
By C. E. Vincenot et al.

Breathing to Inspire and Arouse
A small population of brainstem neurons connects breathing behavior to brain arousal
By S. Sheikhbahaei and J. C. Smith

Is the Cell’s Garbage Disposal Sending Messages?
Nerve cells may communicate with shredded proteins
By M. Leslie

Abstracts

Published by AAAS
RESEARCH

IN BRIEF

1386 From Science and other journals

REVIEW

1389 CLIMATE CHANGE
Biodiversity redistribution under climate change: Impacts on ecosystems and human well-being G. T. Peel et al.
REVIEW SUMMARY: FOR FULL TEXT:
dx.doi.org/10.1126/science.aai9214

RESEARCH ARTICLES

1390 NEURODEVELOPMENT
Gene bivalency at Polycomb domains regulates cranial neural crest positional identity M. Minoux et al.
RESEARCH ARTICLE SUMMARY: FOR FULL TEXT:
dx.doi.org/10.1126/science.aai2913

1391 CANCER GENOMICS
Decoupling genetics, lineages, and microenvironment in IDH-mutant gliomas by single-cell RNA-seq A. S. Venteicher et al.
RESEARCH ARTICLE SUMMARY: FOR FULL TEXT:
dx.doi.org/10.1126/science.aai8478

REPORTS

1392 COMETARY SCIENCE
Surface changes on comet 67P/Churyumov-Gerasimenko suggest a more active past M. R. El-Maarry et al.

1395 CRYSTAL GROWTH
Controlled growth and form of precipitating microsculptures C. N. Kaplan et al.

1399 CATALYSIS
Identification of single-site gold catalysis in acetylene hydrochlorination G. Malta et al.

1403 ORGANIC CHEMISTRY
 Arylation of hydrocarbons enabled by organosilicon reagents and weakly coordinating anions B. Shao et al.

1408 MARTIAN ATMOSPHERE
Mars' atmospheric history derived from upper-atmosphere measurements of $^{38}$Ar/$^{36}$Ar B. M. Jakosky et al.

1411 NEUROSCIENCE
Breathing control center neurons that promote arousal in mice K. Yackle et al.

1416 DRUG DEVELOPMENT
Inhibitors of PEX14 disrupt protein import into glycosomes and kill Trypanosoma parasites M. Dawidowski et al.

1420 CARBON CYCLE
The whole-soil carbon flux in response to warming C. E. Hicks Pries et al.
Podcast

IMMUNOTHERAPY
1423 Rescue of exhausted CD8 T cells by PD-1–targeted therapies is CD28-dependent A. O. Kamphorst et al.

1428 T cell costimulatory receptor CD28 is a primary target for PD-1–mediated inhibition E. Hui et al.
PERSPECTIVE P. 1373

1433 IMMUNOGENOMICS
Aging increases cell-to-cell transcriptional variability upon immune stimulation C. P. Martinez-Jimenez et al.
PERSPECTIVE P. 1372

DEPARTMENTS

1353 EDITORIAL
Science for life By Bruce Alberts

1446 WORKING LIFE
Creating our own community By Cecilia Sánchez and Anya Brown

ON THE COVER

Cross-sectional view of a sunflower root system. Globally, soils contain large amounts of organic carbon, more than half of which is stored at depths greater than 20 centimeters. By warming the entire soil profile, Hicks Pries et al. found that microbial decomposition of organic carbon at all soil depths is stimulated by warmer temperatures. See page 1420.
