NEWS

IN BRIEF
1354 News at a glance

IN DEPTH
1357 Science Funders Plunge Into Publishing
European Commission may follow Wellcome, Gates and set up open-access platform. By M. Enserink

1358 U.N. Biodiversity Group Confronts Cash Crunch
Budget cuts threaten effort to help nations document biodiversity and curb losses. By E. Stokstad

1359 HIV Infections Are Spiking Among Young Gay Chinese
Officials strive to understand infection routes and promote prevention and testing. By K. McLaughlin

1360 Enzymes Offer Waste-to-Energy Solution
Facility digests unsorted garbage to produce green power but could threaten recycling. By M. Peplow

1361 Is the Cell's Garbage Disposal Sending Messages?
Nerve cells may communicate with shredded proteins. By M. Leslie

NEWS Feature

1362 Dengue May Bring Out the Worst in Zika
Mouse study offers evidence of antibody “enhancement,” which could explain severity of human cases. By J. Cohen

1363 Circular RNAs Hint at New Realm of Genetics
Mysterious loops of RNA sometimes serve as templates for unexplored proteins. By K. Servick

INSIGHTS

1368 Can We Protect Island Flying Foxes?
Flying foxes play key ecological roles on tropical islands, yet face rising threats. By C. E. Vincenot et al.

1370 Breathing to Inspire and Arouse
A small population of brainstem neurons connects breathing behavior to brain arousal. By M. S. Sheikhbahaei and J. C. Smith

1369 How Cyanobacteria Went Green
The discovery of a sister group to Cyanobacteria helps to elucidate how oxygen-generating photosynthesis evolved. By R. E. Blankenship

1373 Costimulation, a Surprising Connection for Immunotherapy
T cell cosignaling molecules may determine sensitivity to immunotherapy. By D. L. Clouthier and P. S. Ohashi

POLICY FORUMS

1375 Looking Backward to Move Regulations Forward
Rigorous ex post analyses can improve regulatory policies. By M. Cropper et al.

1377 Harnessing Legal Complexity
Bring tools of complexity science to bear on improving law. By J. B. Ruhl et al.

BOOKS

1379 Mechanized Creatures
A new exhibition surveys five centuries of robotic invention. By P. Sareh and M. Kovac

1380 Cresting a Gravitational Wave
Harry Collins, a sociologist embedded in the LIGO project, recounts the discovery of a lifetime. By A. Cho

LETTERS

1381 Global Roadless Areas: Hidden Roads
By A. C. Hughes

1381 Global Roadless Areas: Consider Terrain
By R. Wu et al.

1382 Response
By P. L. Ibisch and N. Selva

1382 Technical Comment

ABSTRACTS

10.1126/science.aal4365

Dengue May Bring Out the Worst in Zika
Mouse study offers evidence of antibody “enhancement,” which could explain severity of human cases. By J. Cohen

REPORT BY S. V. BARDINA ET AL.
10.1126/science.aal4365

Circular RNAs Hint at New Realm of Genetics
Mysterious loops of RNA sometimes serve as templates for unexplored proteins. By K. Servick

REPORT P. 1411

How Cyanobacteria Went Green
The discovery of a sister group to Cyanobacteria helps to elucidate how oxygen-generating photosynthesis evolved. By R. E. Blankenship

REPORT P. 1436

Costimulation, a Surprising Connection for Immunotherapy
T cell cosignaling molecules may determine sensitivity to immunotherapy. By D. L. Clouthier and P. S. Ohashi

REPORTS PP. 1423 & 1428

Looking Backward to Move Regulations Forward
Rigorous ex post analyses can improve regulatory policies. By M. Cropper et al.

Harnessing Legal Complexity
Bring tools of complexity science to bear on improving law. By J. B. Ruhl et al.

Mechanized Creatures
A new exhibition surveys five centuries of robotic invention. By P. Sareh and M. Kovac

Cresting a Gravitational Wave
Harry Collins, a sociologist embedded in the LIGO project, recounts the discovery of a lifetime. By A. Cho

Global Roadless Areas: Hidden Roads
By A. C. Hughes

Global Roadless Areas: Consider Terrain
By R. Wu et al.

Response
By P. L. Ibisch and N. Selva

Technical Comment

CONTENTS
RESEARCH

IN BRIEF
1386 From Science and other journals

REVIEW
1389 CLIMATE CHANGE
Biodiversity redistribution under climate change: Impacts on ecosystems and human well-being G. T. Peel et al.
REVIEW SUMMARY: FOR FULL TEXT: dx.doi.org/10.1126/science.aai9214

RESEARCH ARTICLES
1390 NEURODEVELOPMENT
Gene bivalency at Polycomb domains regulates cranial neural crest positional identity M. Minoux et al.
RESEARCH ARTICLE SUMMARY: FOR FULL TEXT: dx.doi.org/10.1126/science.aai2913

1391 CANCER GENOMICS
Decoupling genetics, lineages, and microenvironment in IDH-mutant gliomas by single-cell RNA-seq A. S. Venteicher et al.
RESEARCH ARTICLE SUMMARY: FOR FULL TEXT: dx.doi.org/10.1126/science.aai8478

REPORTS
1392 COMETARY SCIENCE
Surface changes on comet 67P/Churyumov-Gerasimenko suggest a more active past M. R. El-Maarry et al.

1395 CRYSTAL GROWTH
Controlled growth and form of precipitating microsculptures C. N. Kaplan et al.

1399 CATALYSIS
Identification of single-site gold catalysis in acetylene hydrochlorination G. Malta et al.

1403 ORGANIC CHEMISTRY
Arylation of hydrocarbons enabled by organosilicon reagents and weakly coordinating anions B. Shao et al.

1408 MARTIAN ATMOSPHERE
Mars’ atmospheric history derived from upper-atmosphere measurements of 38Ar/36Ar B. M. Jakosky et al.

1411 NEUROSCIENCE
Breathing control center neurons that promote arousal in mice K. Vucke et al.
► PERSPECTIVE P. 1370

1416 DRUG DEVELOPMENT
Inhibitors of PEX14 disrupt protein import into glycosomes and kill Trypanosoma parasites M. Dawidowski et al.

1420 CARBON CYCLE
The whole-soil carbon flux in response to warming C. E. Hicks Pries et al.
► PODCAST

IMMUNOTHERAPY
1423 Rescue of exhausted CD8 T cells by PD-1–targeted therapies is CD28-dependent A. O. Kamphorst et al.

1428 T cell costimulatory receptor CD28 is a primary target for PD-1–mediated inhibition E. Hui et al.
► PERSPECTIVE P. 1373

1433 IMMUNOGENOMICS
Aging increases cell-to-cell transcriptional variability upon immune stimulation C. P. Martinez-Jimenez et al.

1436 PHYLOGENETICS
On the origins of oxygenic photosynthesis and aerobic respiration in Cyanobacteria R. M. Soo et al.
► PERSPECTIVE P. 1372

DEPARTMENTS
1353 EDITORIAL
Science for life By Bruce Alberts

1446 WORKING LIFE
Creating our own community By Cecilia Sánchez and Anya Brown

ON THE COVER
Cross-sectional view of a sunflower root system. Globally, soils contain large amounts of organic carbon, more than half of which is stored at depths greater than 20 centimeters. By warming the entire soil profile, Hicks Pries et al. found that microbial decomposition of organic carbon at all soil depths is stimulated by warmer temperatures. See page 1420. Photo: Jim Richardson/National Geographic Creative
