T argets for antimalarials

SPECIAL SECTION

Challenges in neuroscience

INTRODUCTION
464 Neuroscience: In search of new concepts

REVIEWS
466 The emperor’s new wardrobe: Rebalancing diversity of animal models in neuroscience research M. M. Yartsev
470 Big data and the industrialization of neuroscience: A safe roadmap for understanding the brain? Y. Frégnac
478 What constitutes the prefrontal cortex? M. Carlen
482 Space and time in the brain G. Buzsáki and R. Llinás
486 What is consciousness, and could machines have it? S. Dehaene et al.
► PRIZE ESSAY P. 456
► PODCAST

ON THE COVER

An artist’s interpretation of the collective effort of the neuroscience community to develop new concepts. Despite enormous progress over the past decades, neuroscience still has not solved the really profound questions in the field. Could it be time to reconsider some of the main concepts that have dominated the field for the past century? See page 464. Illustration: Cristiana Couceiro

NEWS

IN BRIEF
428 News at a glance

IN DEPTH
430 ECHOES OF EBOLA AS PLAGUE HITS MADAGASCAR
Fast-spreading pneumonic form reaches the cities, drawing international response By L. Roberts
431 NEANDERTALS GAVE ‘LOST’ AFRICAN DNA BACK TO MODERNs
Eurasians acquired genes linked to smoking and waist size By A. Gibbons
432 ‘BASE EDITORS’ OPEN NEW WAY TO FIX MUTATIONS
Novel CRISPR-derived technologies surgically alter a single DNA or RNA base By J. Cohen
► RESEARCH ARTICLE BY D. B. T. COX ET AL. 10.1126/science.aaq0180
435 THE ELECTRON IS STILL ROUND—FOR NOW
New measurements of predicted asymmetry may shed light on cosmic matter excess By E. Cartlidge
► VIDEO

FEATURE
436 MEDICINE’S FUTURE?
In an ambitious experiment, a rural U.S. health system is trying to integrate genomic screening into routine care By B. P. Trivedi

INSIGHTS

PERSPECTIVES
442 ROADS TO RICHES OR RUIN?
Global infrastructure expansion must balance social benefits and environmental hazards By W. F. Laurance and I. Burgués Arrea
445 PLASMEPSINS ON THE ANTIMALARIAL HIT LIST
Two studies identify plasmepsins IX and X as new antimalarial drug targets By J. A. Boddey
► REPORTS PP. 518 & 522
446 THE BACTERIUM HAS LANDED
Mechanosensing mechanisms for surface recognition by bacteria allow biofilm formation By K. T. Hughes and H. C. Berg
► REPORTS PP. 531 & 535
**CONTENTS**

**27 OCTOBER 2017 • VOLUME 358 • ISSUE 6362**

448 THE ART OF EMPTY SPACE
Nanoparticle assemblies can be transformed into regular and stable nanoporous materials
*By N. A. Kotov*
▶ REPORT P. 514

449 DESIGNING TOUGHER ELASTOMERS WITH IONOMERS
Adding a dense array of ionic aggregates improves an elastomer’s mechanical properties
*By K. I. Whitehead*
▶ REPORT P. 502

450 A PEPTIDE MIMIC OF AN ANTIBODY
Antibody miniaturization leads to a cyclic peptide that neutralizes influenza viruses
*By T. A. Whitehead*
▶ RESEARCH ARTICLE P. 496

POLICY FORUM

452 ETHICS OF MATERNAL VACCINATION
Involvement of women is critical in establishing guidelines
*By A. T. Chamberlain et al.*

**BOOKS ET AL.**

454 THE INVASERS
Exploiting an increase in the mobility of goods and people, invasive species are a growing problem
*By H. Huppe*

455 SMALL BEGINNINGS
Errors and extraneous anecdotes distract from an otherwise engaging tour of life’s microbial origins
*By D. R. Wessner*

**RESEARCH**

IN BRIEF

493 From Science and other journals

RESEARCH ARTICLE

496 INFLUENZA
Potent peptidic fusion inhibitors of influenza virus
*R. U. Kadam et al.*
▶ PERSPECTIVE P. 450

REPORTS

502 MATERIALS SCIENCE
Toughening elastomers using mussel-inspired iron catechol complexes
*E. Filippidi et al.*
▶ PERSPECTIVE P. 449

506 BATTERIES
Atomic structure of sensitive battery materials and interfaces revealed by cryo–electron microscopy
*Y. Li et al.*

511 MEMBRANES
Size effect in ion transport through angstrom-scale slits
*A. Esfandiar et al.*

514 NANOMATERIALS
Tunable porous nanoallotropes prepared by post-assembly etching of binary nanoparticle superlattices
*T. Udayabhaskararao et al.*
▶ PERSPECTIVE P. 448

MALARIA

518 Plasmepsins IX and X are essential and druggable mediators of malaria parasite egress and invasion
*A. S. Nasamu et al.*

522 A multistage antimalarial targets the plasmepsins IX and X essential for invasion and egress
*P. Pino et al.*
▶ PERSPECTIVE P. 445

528 MICROBIOLOGY
N’-Fatty acylation of Rho GTases by a MARTX toxin effector
*Y. Zhou et al.*

CELL BIOLOGY

533 Obstruction of pilus retraction stimulates bacterial surface sensing
*C. K. Ellison et al.*
▶ PERSPECTIVE P. 446

558 WORKING LIFE
Lessons from learning disabilities
*By Collin R. Diedrich*

DEPARTMENTS

427 EDITORIAL
Nip misinformation in the bud
*By Rick Weiss*

427 & 502

450 & 496

Influenza peptidic inhibitors

459 TECHNICAL COMMENT ABSTRACTS

459 MISSED OPPORTUNITIES IN YACHAY
*By K. R. Vega-Villa*

518 ETHICS OF MATERNAL VACCINATION
Involvement of women is critical in establishing guidelines
*By A. T. Chamberlain et al.*
