CONTENTS

The American Association for the Advancement of Science:
The Object of Astronomical and Mathematical Research: DR. FRANK SCHLESINGER. 109
The Place of Forestry among Natural Sciences: DR. HENRY S. GRAVES. 117
The University of Cincinnati Bureau of City Tests. 126
Mathematics, Astronomy and Physics at the California Meeting. 127
Scientific Notes and News. 137
University and Educational News. 131

Discussion and Correspondence:
Occurrence of Silver Scourf of Potatoes in Salt Lake Valley: DR. F. J. O'GARA. 126
A Simple Device for Counting Seeds: ORTON L. CLARK. The Journal "Isis": PROFESSOR DAVID EUGENE SMITH. 131

Scientific Books:
Gwathmey and Baskerville on Anesthesia: PROFESSOR J. H. LONG, SHERMAN on Food Products: PROFESSOR ISABEL BEVIER. The Naturalists' Directory: PRESIDENT J. C. BRANNER. 133

Fraternity Grades at Purdue University: PROFESSOR C. H. BENJAMIN. 135

How can we Advance the Scientific Character of the Work done in the Agricultural Experiment Stations?: SAMUEL BRADFORD DOTEN. 188

Special Articles:
A Device for Projecting a Small Spot of Light suitable for Exploring Photosensitive Areas: BRADLEY M. PATTEN. 141

The American Physiological Society: PROFESSOR A. J. CARLSON. 142

The American Mathematical Society: PROFESSOR F. N. COLE. 144

Societies and Academies:
The Biological Society of Washington: D. E. LANTZ. The Science Club of the University of Wisconsin: ERIC R. MILLER. 145

MSS. intended for publication and books, etc., intended for review should be sent to Professor J. McKeen Cattell, Garrison-on-Hudson, N. Y.

THE OBJECT OF ASTRONOMICAL AND MATHEMATICAL RESEARCH

During the first years in the life of the American Association for the Advancement of Science it was customary for the members to meet in much broader groups than they now do. As the membership grew and as the number of papers increased, it became necessary to divide the association into smaller and smaller groups. Section A as we now know it was organized in 1882. It was a happy circumstance that the plan adopted in that year did not separate the astronomer from the mathematician. For a time this section played a very important part in the history of American science; the meetings were well attended and both the mathematician and the astronomer contributed numerous and weighty papers. In more recent years our section has lost something of its former influence. The establishment, about twenty-five years ago, of what is now the American Mathematical Society did much to draw away the interest of mathematicians; and even of astronomers, for in the records of that society we find a goodly number of purely astronomical papers, and two of the earliest presidents were astronomers. Fifteen years ago what is now the American Astronomical Society was formed, and this has still further increased the separation between the two sciences. It seems a great pity that the two should so seldom find themselves together in the same room. The astronomer, in common with the physicist, the chemist and
