THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE:
STANDARDS OF VENTILATION IN THE LIGHT OF RECENT RESEARCH

The fact that the stagnant air of an occupied room becomes uncomfortable and makes those who are exposed to it listless and inert is a matter of common experience. When overcrowding in a close unventilated space reaches a certain point the results may even be fatal within a few hours, as in the Black Hole of Calcutta, the underground prison at Austerlitz and the hold of the ship Londonderry. Conversely the value of fresh air in the treatment of tuberculosis and other diseases is one of the fundamentals of medical and hygienic practise.

For the sanitarian it is necessary, however, to know something more than this general fact that bad air is bad. He must not only have some workable conception as to its operation, but also a more or less definite standard of permissible deviation from absolute purity.

In the earlier days of ventilation this was an easy task. It was natural to assume that the evil effects of the air of occupied rooms was due, either to lack of oxygen or excess of carbon dioxide, or to the presence of some specific organic poison of human origin—morbific matter or anthropotoxin, as this hypothetical substance was called. Of either of these changes the amount of carbon dioxide should serve as a fair measure, and a carbon dioxide standard was therefore confidently advanced by the older sanitarians as a practically all-suffi-

**CONTENTS**

The American Association for the Advancement of Science:

- Standards of Ventilation in the Light of Recent Research: Professor C. E. A. Winslow .......................... 625
- Some Engineering Problems in Ventilation: D. D. Kimball .......................... 632

Conditions at the University of Utah .............. 637

The Pacific Association of Scientific Societies: Professor W. W. Campbell .................... 637

The American Association for the Advancement of Science: Dr. L. O. Howard ............ 638

Scientific Notes and News .................. 640

University and Educational News ........... 644

Discussion and Correspondence:

- The Preservation of the Fundamental Conceptions of Mechanics: Dr. Gordon S. Fulcher. Get the Units Right: Professor Alexander McCabe. A Spurious Case of Multiple Human Births: Professor G. H. Parker .................. 644

Scientific Books:

- Kelly on Some American Medical Botanists: Dr. F. H. Garrison. Best on the Deaf: John D. Wright. Dr. Gifford's Natural Sines: Professor David Eugene Smith. Tower, Smith and Turtan's Principles of Physics: Professor C. W. Stewart ............ 649

Special Articles:

- Antagonism and Balanced Solutions: Dr. Rodney H. True. On the Osmotic Pressure of the Juices of Desert Plants: Dr. J. Arthur Harris, John V. Lawrence, Dr. Ross Atken Gortner. On the Genus Trachodon: Charles W. Gilmore ............ 633

The Society of American Bacteriologists: Dr. A. Park Hitchens .................. 660

Societies and Academies:

- The Biological Society of Washington: M. W. Lyon, Jr. The New Orleans Academy of Sciences: Professor R. S. Cocks ............ 664

MSS. Intended for publication and books, etc., intended for review should be sent to Professor J. McKeen Cattell, Garrison-on-Hudson, N. Y.
