FRIDAY, SEPTEMBER 22, 1916

## CONTENTS

*The British Association for the Advancement of Science:*—

*New Archeological Lights on the Origins of Civilization in Europe:* SIR ARTHUR EVANS. 399

*The Organization of Thought:* PROFESSOR A. N. WHITEHEAD ..... 409

*Dr. Haldane's Silliman Lectures* ..... 419

*Scientific Notes and News* ..... 420

*University and Educational News* ..... 425

*Discussion and Correspondence:*—

*Vitalism:* PRESIDENT S. E. MEZES. *The Animal Diet of Early Man:* DR. M. W. LYON, JR. .... 425

*Scientific Books:*—

*The Napier Tercentenary Memorial Volume:* PROFESSOR LOUIS C. KARPINSKI .... 427

*A New Triangulation Signal Lamp:* E. G. FISCHER ..... 430

*Special Articles:*—

*Linked Mendelian Characters in a New Species of Drosophila:* DR. CHAS. W. METZ. *Bacterial Blights of Barley and other Cereals:* PROFESSOR L. R. JONES, A. G. JOHNSON, C. S. REDDY. *Another Use of the Double-plate Method:* W. D. FROST AND FREDA M. BACHMANN ..... 331

*Societies and Academies:*—

*The St. Louis Academy of Science:* PROFESSOR J. M. GREENMAN ..... 434

**MSS.** intended for publication and books, etc., intended for review should be sent to Professor J. McKeen Cattell, Garrison-on-Hudson, N. Y.

## NEW ARCHEOLOGICAL LIGHTS ON THE ORIGINS OF CIVILIZATION IN EUROPE<sup>1</sup>

*Et quasi cursores vitæ lampada tradunt*

WHEN I was asked on behalf of the council of the British Association to occupy the responsible post of president at the meeting in this great city—the third that has taken place here—I was certainly taken by surprise; the more so as my own subject of research seemed somewhat removed from what may be described as the central interests of your body. The turn of archeology, however, I was told, had come round again on the rota of the sciences represented; nor could I be indifferent to the fact that the last presidential address on this theme had been delivered by my father at the Toronto meeting of 1897.

Still, it was not till after considerable hesitation that I accepted the honor. Engaged as I have been through a series of years in the work of excavation in Crete—a work which involved not only the quarrying but the building up of wholly new materials and has entailed the endeavor to classify the successive phases of a long, continuous story—absorbed and fascinated by my own investigation—I am oppressed with the consciousness of having been less able to keep pace with the progress of fellow explorers in other departments or to do sufficient justice to their results. I will not dwell, indeed, on those disabilities that result to myself from present calls and the grave preoccupations of the hour, that to a greater or less extent must affect us all.

<sup>1</sup> Address of the president of the British Association for the Advancement of Science, Newcastle-on-Tyne, 1916.
