Edward S. King: A new method of determining the color of a star.

Jakob Kunz and Joel Stebbins: Photometric results at the eclipse of June 8, 1918.

C. O. Lampland: Photographic observations of the variable nebula, N. G. C. 2261.

Henrietta S. Leavitt: The light-curves of eleven novae.

W. F. Meggers: Solar and terrestrial absorption in the sun's spectrum from 6400 A to 9400 A.

John A. Miller: The total eclipse of June 8, 1918.

R. M. Motherwell: Nova Aquilae No. 3.

R. M. Motherwell: 12 Lacertae.

Margareta Palmer: The Yale index to star catalogues.

J. A. Parkhurst: The spectrum of the solar corona at the eclipse of June 8, 1918.

C. D. Perrine: Changes in the spectra of some early-type stars showing hydrogen emission.

C. D. Perrine: Announcement concerning the formation of a new catalogue of fundamental star positions.

C. D. Perrine: The early spectrum of Nova Aquilae No. 3.

E. Pettit and Hannah B. Steele: Report of the Washburn College eclipse expedition to Matheson, Colorado.

Edward C. Pickering: Relation of proper motions to spectra.

J. S. Plaskett: The 72-inch reflecting telescope.

J. S. Plaskett: Notes on the spectrum of Nova Aquilae No. 3.

Susan Raymond: The variability of Antigone (129).

William F. Rigge: The solar eclipse of 1918, June 8, as observed in Omaha.

Luis Rodés: A differential gravimeter and its applications.

Henry Norris Russell: The orbit of a Ursa Majoris.

R. F. Sanford: The spectrum of Bailey's variable star No. 95 in the globular cluster M 3.

R. F. Sanford: The orbit of the spectroscopic binary star p Velorum.

Harlow Shapley and J. C. Duncan: The globular cluster Messier 22 (N. G. C. 6656).

V. M. Slipher: The spectra of two variable nebulae: a new type of nebular spectrum.

V. M. Slipher: The spectrum of Nova Aquilæ, No. 3.

V. M. Slipher: Some spectroscopic results of the Lowell Observatory solar eclipse expedition.

C. E. St. John and Louise Ware: Notes on solar rotation.

H. T. Stetson: War-time instruction at the Harvard Astronomical Laboratory.

H. T. Stetson: Preliminary note on the uniformity of film sensitivity of photographic plates from measures with the thermo-electric photometer.

R. M. Stewart: The position of Nova Aquilæ No. 3.

David Todd: On the construction of high-level laboratories for scientific research.

Robert Trümpler: The position and proper-motion of Nova Aquilæ No. 3.

Frank W. Very: The luminiferous ether. Its relation to the electron and to a universal atmosphere.

Frank W. Very: What is the bearing of the hypothesis of a gravitational limit on the current relativity discussion?

Frank W. Very: The wasting of stellar substance.

Frank W. Very: Galactic and atomic vortices.

Frank W. Very: On Nipher's 'gravitational' experiment and the anomalies of the moon's motion.

R. K. Young: The probable error of radical velocities determined with the one prism spectrograph of the Dominion Astrophysical Observatory.

Meade L. Zimmer: Preliminary note on an annual term in the right ascensions.

Joel Stebbins, Secretary
