CONTENTS

Engineering Science before, during and after the War: Dr. Charles A. Parsons ....... 333

A Question concerning the Nature of Velocity:
Professor Tenney L. Davis ............... 338

Jacques Danne: Dr. Gerald L. Wendt ...... 340

Scientific Events:—
Expeditions from the University of California; The American Physical Society;
The Red Cross and Professor Richard P. Strong .......................... 341

Scientific Notes and News ............... 343

University and Educational News .......... 344

Discussion and Correspondence:—

Quotations:—
Science and the Press ..................... 347

Scientific Books:—
Fisher's Starfishes of the Philippine Seas and Adjacent Waters: Dr. Hubert Lyman Clark ........................................ 348

Notes on Meteorology and Climatology:—
Agricultural Meteorology: Dr. Charles P. Brooks .......................... 350

Special Articles:—
White Corn vs. Yellow Corn and a Probable Relation between the Fat Soluble Vitamine and Yellow Plant Pigments: Dr. H. Steenbock ........................................ 352

The American Mathematical Society: Dr. E. J. Moulton .......................... 353

MSS. intended for publication and books, etc., intended for review should be sent to The Editor of Science, Garrison-on-Hudson, N. Y.

ENGINEERING SCIENCE BEFORE, DURING AND AFTER THE WAR

Three years of anxiety and stress have passed since the last meeting of the British Association. The weight of the struggle which pressed heavily upon us at the time of the Newcastle meeting in 1916 had increased so much in intensity by the spring of 1917 that the council, after consultation with the local committee at Bournemouth, finally decided to cancel the summer meeting of that year. This was the first time in the history of the association that an annual meeting was not held.

We all rejoice to feel that the terrible ordeal through which the whole empire has been passing has now reached its final phases, and that during the period of reorganization, social and industrial, it is possible to resume the annual meetings of the association under happier conditions. We have gladly and with much appreciation accepted the renewed invitation of our friends and colleagues at Bournemouth.

We are gathered together at a time when, after a great upheaval, the elemental conditions of organization of the world are still in flux, and we have to consider how to influence and mould the recrystallization of these elements into the best forms and most economic rearrangements for the benefit of civilization. That the British Association is capable of exerting a great influence in guiding the nation towards advancement in the sciences and arts in the most general sense there can be no ques-
