of Cleveland, Ohio

HIGH STANDARD OF ADMISSION
RESTRICTED CLASSES
THOROUGH INSTRUCTION
LARGE CLINICAL FACILITIES
HIGH STANDARD OF SCHOLARSHIP

The 1924-25 session will open in the new medical building.

* Admission confined to students having academic degrees and to Seniors in Absentia.

For information address:

THE REGISTRAR
1353 E. 9TH ST.
CLEVELAND, OHIO

YALE UNIVERSITY
School of Medicine
Affiliated with the New Haven Hospital
and New Haven Dispensary

112TH SESSION
Reorganized on a full-time basis

Entrance Requirements: A minimum of three years (or its equivalent) of college including general biology, physics, general and organic chemistry, qualitative analysis, physical chemistry or laboratory physics, and either French or German.

ALL THE GENERAL FACILITIES OF THE UNIVERSITY ARE AVAILABLE TO MEDICAL STUDENTS

As the number admitted to each class is limited, applications must be made before July 1.

Dean, Yale University School of Medicine
NEW HAVEN, CONN.

ANNOUNCEMENT

may be obtained by application to

WESLEY T. LEE, M.D., Registrar
80 East Concord Street,
Boston, Massachusetts.
Stanford University
California

Summer Quarter, 1924

Tuesday, 24 June, to Saturday, 30 August
Second half begins 28 July

Opportunities to work for the A. B. and for higher degrees, or to do special work, in the oceanic climate of the San Francisco peninsula.

Courses in the regular academic and scientific branches, and in law.

Information from Office 53,

STANFORD UNIVERSITY
CALIFORNIA

Marine Biological Laboratory
Woods Hole, Mass.

INVESTIGATION
Entire Year

Facilities for research in Zoology, Entomology, Physiology, and Botany. Eighty-four private laboratories $100 each for not over three months. Thirty tables are available for beginners in research who desire to work under the direction of members of the staff. The fee for such a table is $50.00.

INSTRUCTION
July 2 to August 12, 1924

Courses of laboratory instruction with lectures are offered in Invertebrate Zoology, Protozoology, Embryology, Physiology and Morphology and Taxonomy of the Algae. Each course requires the full time of the student. Fee, $75.00.

SUPPLY
DEPARTMENT
Open the Entire Year

Animals and plants, preserved, living, and in embryonic stages. Preserved material of all types of animals and of Algae, Fungi, Liverworts and Mosses furnished for classroom, or for the museum. Living material furnished in season as ordered. Microscopic slides in Zoology, Botany, Histology, Bacteriology. Catalogues of Zoological and Botanical material and Microscopic Slides sent on application. State which is desired. Fee, Catalogues and all information regarding material, address:

GEO. M. GRAY,
Curator, Woods Hole, Mass.

The annual announcement will be sent on application to The Director, Marine Biological Laboratory, Woods Hole, Mass.

SMITHSONIAN INSTITUTION

THE WALTER RATHBONE BACON

SCHOLARSHIP

The Secretary of the Smithsonian Institution has approved the rules which are to regulate the award of the Walter Rathbone Bacon Scholarship for the study of the fauna of countries other than the United States of America. The amount available is the interest on the capital invested (about $2,500 a year) the incumbent to hold the scholarship not less than two years.

Applications for this scholarship, addressed to the Secretary of the Smithsonian Institution, should be submitted not later than June 1, 1924. The application should contain a detailed plan for the proposed study including a statement as to the faunal problems involved; the reasons why it should be undertaken; the benefits that are expected to accrue; the length of time necessary for the carrying out of the project; the estimated cost; and the scientific and physical qualifications of the applicant to undertake the project.

The scholarship will be awarded for a term of two years. If at the expiration of the term it is desired to extend the term, the incumbent shall make application a sufficient time in advance, accompanied by a statement as to the necessity for such extension. All collections, photographs, records and equipment become the property of the Institution.

The incumbent shall not engage in work for remuneration or receive salary from other sources than the Institution or its branches during the period of this occupancy of the scholarship.

For any further information, address the Secretary, Smithsonian Institution, Washington, D. C.

Carnegie Institution of Washington

Recently Issued

Year Book No. 28 (Nov. 1, 1922, to Oct. 31, 1923). Octavo. 400 pp., 7 figs. ................. $1.00

The publications of the Institute now number over 475 volumes, the subjects including Anatomy, Archaeology, Astronomy, Botany, Chemistry, Climatology, Economics and Statistics, Embryology, Engineering, Folk-Lore, Genetics, Geology, History, International Law, Literature, Mathematics, Medicine, Nutrition, Paleontology, Pathology, Physics, Terrestrial Magnetism, Zoology.

LEITZ
Ore-Dressing Microscope

After Prof. H. Schniederhoern

This microscope is most useful inasmuch as it is constructed to serve in an ideal manner for the determination and calculation of ore-dressing products. Being a microscope for binocular vision it renders a stereoscopic effect combined with an extremely large field and long working distance between specimens and objectives.

The equipment includes three pairs of oculars through which the microscope is available for magnifications of 10, 15 and 20X. The oculars are mounted to a rotating disc and afford an immediate interchange from one magnification to another. For measuring and counting of grains six grid-micrometers, ruled in squares of 1.0, 0.50, 0.25, 0.10 and 0.075 mm., corresponding to the squares used in sifting the material, are furnished with the instrument. These micrometers are inserted into the oculars.

A dish-shaped stage permits the fragments to be examined immersed in water; the bottom of the dish has a ruled square of 5 cm. x 5 cm., this being subdivided into 25 smaller squares of 1 x 1 cm., thereby facilitating the counting of grains.

The microscope is equipped with three rack- and pinion-movements; one controls the forward and backward motion of the microscope tubes, another the sideward motion of the stand to the microscope stage and the third controls the focus to the specimen.

Aside from counting and controlling ore-dressing products, the microscope is available for the stereoscopic examination of coarse specimens of crude material by removing the microscope stage and placing the specimen directly upon the microscope base.

Microscope, complete, as described, in wooden cabinet with lock and key ................ $185.00
