Cornell University Medical College
First Avenue and Twenty-eight St.
NEW YORK CITY

The first year of the course is also offered at Ithaca, N. Y., subsequent years at New York City only.

For information address
THE SECRETARY

Johns Hopkins University
School of Medicine

The School of Medicine is an Integral Part of the University and is in the Closest Affiliation with the Johns Hopkins Hospital.

ADMISSION
Candidates for admission must be graduates of approved colleges or scientific schools with at least two years' instruction, including laboratory work in chemistry, and one year each in physics and biology, together with evidence of a reading knowledge of French and German.

Each class is limited to a maximum of 75 students, men and women being admitted on the same terms. Applications may be sent any time during the academic year but not later than June 15th.

If vacancies occur, students from other institutions desiring advanced standing may be admitted to the second or third year provided they fulfill our requirements and present exceptional qualifications.

INSTRUCTION
The academic year begins the Tuesday nearest October 1, and closes the second Tuesday in June. The course of instruction occupies four years and special emphasis is laid upon practical work in the laboratories, in the wards of the Hospital and in the dispensary.

TUITION
The charge for tuition is $300 per annum, payable in three installments. There are no extra fees except for certain expensive supplies, and laboratory breakage.

The annual announcement and application blanks may be obtained by addressing the Registrar of the School of Medicine, Johns Hopkins University, Washington and Monument Sts., Baltimore, Md.

Owing to an extensive building program about to be inaugurated at the Hospital and Medical School, it has been deemed necessary to withdraw, for the next two years at least, post-graduate instruction during the year as well as the summer course formerly given during June and July.

New York, N. Y.
From time to time new models of Photo-Micrographic Apparatus have been offered by various manufacturers, which instruments, however, in the one or other respect were lacking some important devices so that as consequence these apparatus do not afford a universal application.

With Model "UMA" the Leitz Works offer an instrument which embodies numerous improvements, resulting through suggestions received from eminent authorities of various countries, and in presenting Model "UMA" an instrument is offered which fulfills all the expectations Research Microscopists have entertained.

The chief characteristic features of this apparatus are:

Optical Bench: 6½ feet long;
Camera can be used horizontally, vertically or in any slanted position;
Extension Focussing Cabinet with magnifying telescope for focussing the image to the very last moment of exposure;
Microscope-Support is adjustable on a wedge base to suit any make of microscope;
Arrangement for Macro-Objects and large sections in transmitted light;

Monocular Tube with Side-Telescope allows a constant view of the specimen while the microscope is connected with the camera. (This tube can be used interchangeably with the tubes of the Combination Microscope "ABM")

Why Whatman?
The filtering qualities of WHATMAN FILTER PAPERS are universally conceded, but there are other reasons for the preference for them shown by Chemists generally.

WHATMAN FILTER PAPERS are standard; every dealer in laboratory supplies is familiar with them and either has them in stock or can obtain them promptly from reserve stocks maintained in New York.

Send for samples—specifying sizes—and booklet No. F. 13 describing the various grades of WHATMAN FILTER PAPERS.
