SCHOOL of MEDICINE

FOUNDED 1812

Affiliated with the New Haven Hospital and New Haven Dispensary

For Information, Address:
The Registrar, Yale University
School of Medicine, New Haven, Conn.

Johns Hopkins University
School of Medicine

The School of Medicine is an Integral Part of the University and is in the Closest Affiliation with the Johns Hopkins Hospital.

ADMISSION
Candidates for admission must be graduates of approved colleges or scientific schools with at least two years' instruction, including laboratory work in chemistry, and one year each in physics and biology, together with evidence of a reading knowledge of French and German.

Each class is limited to a maximum of 75 students, men and women being admitted on the same terms. Applications may be sent any time during the academic year but not later than June 15th. If vacancies occur, students from other institutions desiring advanced standing may be admitted to the second or third year provided they fulfill our requirements and present exceptional qualifications.

INSTRUCTION
The academic year begins the Tuesday nearest October 1, and closes the second Tuesday in June. The course of instruction occupies four years and especial emphasis is laid upon practical work in the laboratories, in the wards of the Hospital and in the dispensary.

TUITION
The charge for tuition is $360 per annum, payable in three installments. There are no extra fees except for certain expensive supplies, and laboratory breakage.

The annual announcement and application blanks may be obtained by addressing the Registrar of the School of Medicine, Johns Hopkins University, Washington and Monument Sts., Baltimore, Md.

Owing to an extensive building program about to be inaugurated at the Hospital and Medical School, it has been deemed necessary to withdraw, for the next two years at least, post-graduate instruction during the year as well as the summer course formerly given during June and July.
"BUERKER" Colorimeter

Patent applied for

Designed after suggestions of Prof. K. Buerker

Through the use of a new prism combination perfectly symmetrical light rays are obtained.

Its advantages are as follows:

1. The "Albrecht Hufner" prism renders symmetrical optical rays and prevents the appearance of color aberration within the optical system.
2. This prism divides the two comparison fields by a mere hair-line.
3. The special containers for the deluent, practically eliminate the influence of the deluent and reduces the error to a mere minimum.
4. Clinicians, using this instrument, have easily been able to make readings within an accuracy of 0.3%.
5. The construction resembles a microscope stand and is arranged in a most convenient manner, at the same time is small in dimensions.
6. Sliding metal doors close the entire colorimeter in an absolute light-tight manner.

Price: $125.00
Discount to Educational Institutions and Hospitals.

A Highly Sensitive Small Seismograph

The quality and accuracy of Spindler & Hoyer instruments is well exemplified in this small seismograph. Based on the Wiechert astatic seismograph, it is in every way as reliable as the larger instrument, except that the stationary mass is smaller, being from 80 to 200 kilos instead of 1,000 kilos. The sensitiveness is of course correspondingly reduced. The instrument is eminently suitable for most colleges, universities and observatories.

The writing attachment is so arranged that even in the case of a powerful shock, it will not get out of order. Shocks of as high as 8 on the Rossi-Forel scale do not disturb it.

We are prepared to make quick delivery of this instrument, since we have a number in stock in this country. Do you want further information?
