LA MOTTE
Standardized Buffer Salts

To insure accuracy in Hydrogen Ion measurements, Buffer Salts of only the highest purity should be employed.

All of our salts are especially purified and standardized in strict accordance with the specifications of Clark and Lubs and are recognized as the Standards of Quality.

- Potassium Acid Phthalate
- Potassium Acid Phosphate
- Sodium Hydroxide (CO₂ free)
- Disodium Phosphate

- Potassium Chloride
- Boric Acid
- Hydrochloric Acid
- Sodium Citrate

Illustrated catalog sent free on request.

LEITZ

RESEARCH AND PHOTO-MICROGRAPHIC MICROSCOPES

COMBINATION MODEL “ABM”

U. S. Patent No. 1,448,592

—Through interchangeable use of both binocular and monocular tubes it is available for binocular and monocular vision—

In Stock For Immediate Delivery

For Research Work it is only natural to select microscopes which completely qualify the most discriminating requirements in optical and mechanical precision. To assist the Microscopist in the task of selection we always suggest to forward our Research Microscopes for inspection and comparison with those of other make since this affords the best means to convince him of the superior qualities of Leitz Optical and Mechanical Workmanship.

Leading Microscopists consider the Leitz Combination Microscope the ideal instrument for Research Investigation and Photo-Micrographic Work.

DETAILS OF CONSTRUCTION AND FEATURES:

1. In general design it is similar to the Leitz large Research Stand “AA.”

2. Binocular and Monocular Body Tubes can be very easily interchanged and attached by eccentrically acting lever clamp.

3. A third tube can be attached in an interchangeable manner, this tube being of monocular design and equipped with a side telescope to permit constant observation of the specimen to the very last stages of exposure, when the microscope is connected with the camera for photomicrography.

4. When either Binocular or Monocular Tubes have been inserted into the tube carrier, the patented clamping device arrests these tubes automatically in a thoroughly true position to the optical center.

5. The Nosepiece Adapter is mounted independent of the tubes; objectives remain permanently centered; irrespective of which tube is used.

With the construction of the Combination Microscope “ABM”, the Leitz Works have scored another progressive step as originators of new microscope models; the Leitz Works being the original Manufacturers of Binocular Microscopes for high power work.

The Leitz Works through new constructions have frequently caused a revolution in microscope models and optics.
The New Spencer Film Slide Service and Projector

Presented for Educators by Educators

A tremendously enthusiastic reception has greeted the new Spencer Film Slide Service prepared for educators by educators. The library includes many subjects, all edited and arranged in the order of the curriculum.

Pictures follow one another on rolls of safe unbreakable film slides. You can't mix them up—yet pictures change instantly, forward or back, by a simple turn of a knob. And the cost of this new service is only one-tenth that of glass slides.

The new Spencer film slide delineascope is simple, compact and easy to use. You can operate it with one hand as you lecture. With a Trans-Lux daylight screen you don't even have to darken the room.

Send the coupon and see how this new Spencer Film Slide Service will help you in your class-room work.
