Sterling's “S” Quality Filter Paper

made from the highest quality Swedish filter paper, washed by us in hydrochloric and hydrofluoric acids, is as nearly ashless as filter paper can be made.

It is fine enough to hold such precipitates as Barium Sulphate and still is rapid filtering. Chemists who have to do exceptionally careful analytical work will therefore find it an ideal paper for their use.

Sterling’s “S” quality filter paper is made in standard sizes, packed in dust-proof boxes of 100 circles each, and the ash per paper is indicated on the label.

Liberal sample on request.

JAGABEI RHEOSTAT

are wound on enameled tubes, as illustrated above. By means of sliding-contacts the resistance can be varied from zero to full capacity, in exceedingly small steps.

In resistance ratings, JAGABEI Rheostats vary from 0.34 ohm up to 30,000 ohms, and in corresponding current values from 25 amperes down to 0.1 amper. Especially suited for use in Educational, Research and Industrial Laboratories. Write for Bulletin 5-1049

Saves Materials, Cuts Time and Eliminates Expense

The Schwartz Sectional System is an ideal way to store supplies, samples, apparatus, laboratory reagents and stains.

Like the sectional letter file it is a unit system that can be enlarged to meet increasing requirements.

Each drawer is fitted with sectional and removable shelves and guards, interchangeable and adjustable to any size stock. No danger of knocking down bottles and losing material. Card holders, pulls and numbers of solid brass.

Every article in every drawer is alphabetically indexed for you in a leather loose leaf book that we supply enabling you to find any article in an instant.

The Schwartz System will protect your apparatus and chemicals from dust, dirt, light, breakage and loss. Send for Booklet “S” showing illustrations and net prices.
