The New Bausch & Lomb

Compact Micro-Projector

Permanently Aligned

This new instrument has been designed to meet the demand for a compact and permanently aligned Micro-Projector. All optical parts are accurately precentered and are vertically and laterally aligned. The only centering adjustment necessary on the part of the user is to bring the light source (either a Mazda unit or an Automatic Feed Arc Lamp) into alignment with the optical axis. This adjustment is easily made by two screws on the rear of the illuminating unit support. The substage is arranged with three condensers and a heat absorbing filter glass. The condensers—on swinging arms—take care of a range of objectives from a 72 mm Micro-Tessar to a 4 mm objective.

Detailed description sent on request.

School of Medicine and Dentistry  
THE UNIVERSITY OF ROCHESTER

Medical School, Strong Memorial Hospital and Out-Patient Department of the University of Rochester and the Municipal Hospital of the City of Rochester, all under one roof. Medical, Surgical, Obstetric, Pediatric, Contagious and Neurological patients admitted. Unusual opportunities for school and hospital cooperation in medical and dental teaching.

Admission

Medical and dental candidates must have completed three years of college work with special requirements in chemistry, physics and biology. The entering class will not exceed 40, men and women being admitted on equal terms. Instruction will begin September 23, 1926.

Tuition

Charge for tuition will be $300 per annum, payable in equal installments at the beginning of each semester.

Northwestern University  
MEDICAL SCHOOL

Situated in Chicago in close proximity to important Hospitals with an abundance of clinical material.

ADMISSION REQUIREMENTS—Two years of College credit, including a satisfactory course in Physics, Chemistry, Biology or Zoology, and French or German.

COURSE OF STUDY—leading to the degree of Doctor of Medicine—Four years in the Medical School and a fifth year either as Intern in an approved hospital or devoted to research in some branch of Medical Science.

GRADUATE INSTRUCTION—in courses leading to the degree of Master of Arts or Doctor of Philosophy.

RESEARCH FOUNDATION—The James A. Patten Endowment for Research affords unusual opportunities for advanced students of Medical Science to pursue special investigations.

RESEARCH FELLOWSHIPS—Four fellowships of the value of $500 each are awarded annually to promote scholarly research.

TUITION FEES—The tuition fee for undergraduate students is $215.00 a year. Next session begins September 28, 1926.

"You have the best light-weight bag made,"—Dr. C. F. Fordyce

FIALA PATENT SLEEPING BAG
You can sleep outdoors in perfect comfort Scientifically Correct
Made like the fur of an animal, it retains body heat, but not the moisture. No dead air spaces to become foul or soaked, as in a closely woven or filled fabric. $25
Weighs about 5 lbs. ...............

NEW PAULIN ALTIMETER
Used by U. S. Engineers, Oil Companies and others. Particularly useful for securing contours; one man with a Paulin Altimeter can do the work of two men with Rod and Level. Send for Circular "A."

ANTHONY FIALA, 25 Warren St., New York
Bell’s Advanced Mathematical Series

A general outline of the theory of limits which brings together the elements of this fundamental subject in one volume. It will greatly facilitate the study of infinite series and the infinitesimal calculus.
Price, $4.50

The theory of Differential Equation is an important branch of modern mathematics. The object of this book is to give an account of the central parts of the subject in as simple a form as possible. Differential Equations arise from many problems in algebra, geometry, mechanics, physics and chemistry.
Price, $3.50

A First Course in Statistics. By D. Caradog Jones (formerly Lecturer in Mathematics, Durham University).
Some acquaintance with the proper treatment of statistics has become in the highest degree necessary for investigation in any field—biological, economic or medical. The “constancy of great numbers,” one of the fundamental principles of the theory of statistics, makes it almost a science of prophecy.
