

JAGABI RHEOSTATS

meet a definite need in Educational, Research and Industrial Laboratories.

By means of sliding-contacts the resistance values can be varied from zero to full rating, in exceedingly small steps.

We find greatest demand for Rheostats with tubes 16" long, as illustrated above.

Write for Descriptive Bulletin S1040.

AMERICAN MEN OF SCIENCE

A BIOGRAPHICAL DIRECTORY

EDITED BY J. McKEEN CATTELL AND DEAN R. BRIMHALL

A fourth edition of this book is now in preparation. There are only left about fifty copies of the third edition which is an invaluable work of reference for libraries and for all having relations with scientific men. The first and second editions were sold out before a new edition was printed. There are many who need the third edition and should order it now.

The third edition of the Directory contains about 9,600 sketches as compared with 4,000 in the first edition and 5,500 in the second edition. The work should be in the hands of all those who are directly or indirectly interested in scientific work.

(1) *Men of science will find it indispensable. It gives not only the names, addresses, scientific records and the like of their fellow workers, but also a useful summary of the research work of the country, completed and in progress.*

(2) *Those interested in science, even though they may not be professionally engaged in research work, will find much of interest and value to them in the book.*

(3) *All who have or wish to have relations with scientific men will find the book invaluable.*

(4) *Executives in institutions of learning will use the book constantly.*

(5) *Editors of newspapers and periodicals will find it to be one of the works of reference that they will need most frequently.*

(6) *Libraries will find the book to be a necessary addition to their reference shelves.*
