

**The ABC  
of  
Hydrogen Ion  
Control**

LaMotte Chemical Products Company  
Baltimore, Maryland, U. S. A.

**Free on request**

A book of valuable and practical information on the application of Hydrogen Ion Control in science and industry.

**LaMotte Chemical Products Co.**  
418 Light St. Baltimore, Md., U. S. A.

## SIX VALUABLE LITTLE BOOKS ON SCIENCE

**RESEARCH NARRATIVES**  
 Volume One \$ .50  
 Volume Two 1.00  
 Short tales, in simple terms, of research, discovery and invention. Fifty in each volume.  
*From Engineering Foundation.*

**MAN AND HIS AFFAIRS** \$2.50  
 Human nature and its management as seen by a management engineer.  
*By Walter N. Polakov.*

**RAINMAKING AND OTHER WEATHER VAGARIES** \$2.50  
 A scientific analysis of man's fruitless attempts to regulate rainfall.  
*By W. J. Humphreys, U. S. Weather Bureau.*

**PROBLEMS OF HUMAN REPRODUCTION** \$2.50  
 A collection of scientifically established facts concerning the problems of human reproduction. Non-technical.  
*By Paul Popenoe.*

**FUNDAMENTAL CONCEPTS OF PHYSICS** \$2.00  
 An admirable summary of the evolution of the leading physical theories of today.  
*By Paul R. Heyl, Bureau of Standards.*

Use the **Hoke**

**Micrometric Control**

H<sub>2</sub>, O<sub>2</sub>, N<sub>2</sub>,  
CO<sub>2</sub>, H<sub>2</sub>S,  
C<sub>2</sub>H<sub>2</sub>, etc.

For regulating the flow of gases from tanks, when your work is not sufficiently exacting to demand a Hoke-Phoenix Regulator (reducing valve).  
 It is a carefully-made needle-valve, with connection for tank and tapered hose-end to fit hose.

No. 133. As illustrated. In ordering mention gas to be used ..... \$5.00  
 No. 153. With yoke to fit dental oxygen tanks ..... 6.00

Ask for free folder 605-S, and mention kind of work you are doing.

## School of Medicine

### NEW ADMISSION REQUIREMENTS

At least three years of approved college work including specified requirements in the sciences.

### DEGREE OF B.S. IN MEDICAL SCIENCE

This degree may be awarded at the end of the third or fourth year to students fulfilling certain conditions including the preparation of a thesis.

### DEGREE OF DOCTOR OF MEDICINE

Upon satisfactory completion of prescribed four-year course.

For catalogue and information, address  
**THE DEAN, Washington University**  
 School of Medicine, St. Louis,  
 Missouri

## Johns Hopkins University

### SCHOOL OF MEDICINE

The School of Medicine is an Integral Part of the University and is in the Closest Affiliation with the Johns Hopkins Hospital.

### ADMISSION

Candidates for admission must be graduates of approved colleges or scientific schools with at least two years' instruction (including laboratory work) in chemistry, and one year each in physics and biology, together with evidence of a reading knowledge of French and German.

Each class is limited to a maximum of 75 students, men and women being admitted on the same terms. Applications may be sent any time during the academic year but not later than June 15th.

If vacancies occur, students from other institutions desiring advanced standing may be admitted to the second or third year provided they fulfill our requirements and present exceptional qualifications.

### INSTRUCTION

The academic year begins the Tuesday nearest October 1, and closes the second Tuesday in June. The course of instruction occupies four years and especial emphasis is laid upon practical work in the laboratories, in the wards of the Hospital and in the dispensary.

### TUITION

The charge for tuition is \$400 per annum, payable in three installments. There are no extra fees except for certain expensive supplies, and laboratory breakage.

Inquiries should be addressed to the Executive Secretary of the School of Medicine, Johns Hopkins University, Washington and Monument Streets, Baltimore, Maryland.

## School of Medicine

## Western Reserve University

Cleveland, Ohio

### NEW LABORATORIES AND HOSPITALS

### RESTRICTED CLASSES

### THOROUGH INSTRUCTION

### LARGE CLINICAL FACILITIES

### HIGH STANDARD OF SCHOLARSHIP

Admission confined to students having academic degrees and to Seniors in Absentia.

CLEVELAND

## School of

## Medicine and Dentistry

### THE UNIVERSITY OF ROCHESTER

Medical School, Strong Memorial Hospital and Out-Patient Department of the University of Rochester and the Municipal Hospital of the City of Rochester, all under one roof. Medical, Surgical, Obstetric, Pediatric, Contagious and Neurological patients admitted. Unusual opportunities for school and hospital cooperation in medical and dental teaching.

### Admission

Medical and dental candidates must have completed three years of college work with special requirements in chemistry, physics and biology. The first class will not exceed 40, men and women being admitted on equal terms. Instruction will begin September 22, 1927.

### Tuition

Charge for tuition will be \$300 per annum, payable in equal installments at the beginning of each semester.

# Interchangeable slit systems

*Used in obtaining diffraction patterns of powdered crystals mounted in capillary tube. Gives a beam identical with that given by the former type of slit system.*

*Used in obtaining diffraction patterns of thin sheets of a substance transparent to x-rays.*

*Used with a filter in determining preferred orientations of rolled metals, etc. Without a filter, is suitable for the Laue method.*

## ~ a new important feature of the G-E X-ray Diffraction Apparatus

These three types of slit systems can be used interchangeably in the improved G-E X-ray Diffraction Apparatus, which has been altered to provide for this feature.

In the above view of these slits, the white area represents the slit that defines the x-ray beam; the black area represents the larger, bell-shaped slit, the edges of which stop the stray rays that would fog the film.

The ability of this apparatus to take diffraction patterns of several types of specimens makes its use most advantageous in research and factory-control work.

Address the Special Products Section at Schenectady for complete information.

This apparatus provides the best methods for the accurate determination of most crystal structures, for supplementing ordinary metallographic methods, and in some cases for qualitative chemical analysis of solids.
