

Marine Biological Laboratory

Woods Hole, Mass.

INVESTIGATION

Facilities for research in Zoology, Embryology, Physiology, and Botany. Fifty-two private laboratories Entire Year \$100 each and ninety-four private laboratories \$200 each for not over three months. Fifty-six tables are available for beginners in research who desire to work under the direction of members of the staff. The fee for such a table is \$50.00.

INSTRUCTION

June to August,
1928

Courses of laboratory instruction with lectures are offered in Invertebrate Zoology, Protozoology, Embryology, Physiology, and Morphology and Taxonomy of the algae. Each course requires the full time of the student. Fee, \$75.00.

BIOLOGICAL SUPPLIES

For the classroom, museum or collector.

First class preparations. Send for new (1928) Catalogue No. 1. Zoological and Embryological material, Life Histories and Habitat Groups.

Catalogue No. 2, Botanical material.

Catalogue No. 3, Microscopic slides.

Address all correspondence regarding material and catalogues to:

Supply Department,
GEO. M. GRAY,

Curator, Woods Hole, Mass.

The annual announcement will be sent on application to The Director, Marine Biological Laboratory, Woods Hole, Mass.

School of Medicine

NEW ADMISSION REQUIREMENTS

At least three years of approved college work including specified requirements in the sciences.

DEGREE OF B.S. IN MEDICAL SCIENCE

This degree may be awarded at the end of the third or fourth year to students fulfilling certain conditions including the preparation of a thesis.

DEGREE OF DOCTOR OF MEDICINE

Upon satisfactory completion of prescribed four-year course.

School of Medicine, St. Louis,
Missouri

Scientific and literary translation from English into German and Norwegian

By KLÅRE MJØEN,

Editorial Secretary of the Review "Den Nordiske Race,"
Vinderen Laboratorium at Oslo, Norway.

Opinions of the authors:

Bernt Lie: "Yours is the first translation of my book that has pleased and not irritated me. . . ."

O. Hellberg: "I like your translation better than my original. . . ."

Knut Hamsun: "Mrs. Mjøen is indeed a master. . . ."

Bjornstjerne Bjornson, from Rome: "I must send you my very finest compliments on your translations. . . . Your translation of 'Romsdalen' seems to me at times almost to surpass the original. Why, my child, you improve upon me. . . ."

Wilhelm Kellhau: "It was a delight to work together with Klåre Mjøen. For she possesses that peculiar intuitive sense for language that finds its way right through the greatest difficulties."

Georg Brandes: "Mrs. Mjøen seems with ease to overcome even the greatest difficulties. Her mastery of the language is most remarkable. . . . But this wonderful facility she has not acquired without being herself a poet, it cannot possibly be otherwise."

Dr. Oberlaender: "As to 'Sigurd Slembe': I am absolutely enraptured by this translation. Mrs. Mjøen has here achieved a master-piece."

NEW SCIENTIFIC BOOKS

William Wood & Company, New York

THE NATURE OF MATTER, GRAVITATION AND LIGHT. Albert P. Mathews. 218 pp. \$3.50.

The effort of the author in this work is toward the correlation of the various aspects under which the universe appears to us, that is, a formal or geometrical aspect; a kinetic or mechanical aspect; an electrical; a magnetic; and a psychological aspect.

The Oxford University Press, American branch,
New York

MODERN ECLIPSE PROBLEMS. F. J. M. Stratton. 34 pp. \$0.85.

This is the Halley lecture delivered by Dr. Stratton on May 20, 1927, with notes for the observation of the eclipse of June 29, 1927. It should prove of interest to any one engaged in the study of astronomy.

Ginn & Company, Boston

LABORATORY MANUAL OF GENERAL INORGANIC CHEMISTRY. M. C. Sneed and R. E. Kirk. 177 pp. \$1.20.

More experiments are included in this manual than will normally be performed by any single class. Topics of a diversified nature have been selected to give the instructor a choice of material suitable to the purpose of his course.

A LABORATORY COURSE IN GENERAL ZOOLOGY. Henry S. Pratt. 241 pp. \$1.75.

A revised edition of the author's "Course in Invertebrate Zoology," to which have been added the two dissections, abbreviated and simplified, of the perch and the frog from his other work, "Course in Vertebrate Zoology."

E. P. Dutton & Company, New York

HISTORY OF THE SCIENCES IN GRECO-ROMAN ANTIQUITY. Arnold Reymond. 235 pp. \$2.50.

An illuminating study of the exact sciences of antiquity as they finally centered in and developed in ancient Greece and Italy. General readers will observe with interest how many of our modern scientific theories were anticipated by the speculations of the ancient philosophers.

SCHOOL OF APPLIED MICROSCOPY

Room 1501, Pershing Square Building, New York City. Evening Classes. Course of Instruction includes lectures and demonstrations on the Microscope and Accessories; Preparation of Material, Staining, Sectioning, Slide Making; Outline of Photomicrographic Methods. Metallography Course also available. Fees nominal.

CHARLES F. TITUS, Director Telephone 2580 Walker

SCIENTIFIC PERIODICALS

Chemical, Medical and allied subjects. Complete files, volumes and copies, bought and sold. Kindly send us a list of your wants and items of which you may wish to dispose.

B. LOGIN & SON

29 East 21st Street

New York, N. Y.

Hy-Speed Mixers

Clamp to any tank, operate from light circuit, mix all kinds of liquids. Also used for even temperature baths. Thousands in use.

Write for circular.

The B N A

Arranged as an Outline of

Regional and Systematic Anatomy

A Contribution to the Science and Teaching of Anatomy

BY

VICTOR E. EMMEL

*Professor of Anatomy, College of Medicine, University of Illinois
Laboratory Guest at The Wistar Institute of Anatomy and Biology*

REVISED SECOND EDITION

The Basle Anatomical Nomenclature (the B N A) has been preeminently successful in the elimination of approximately 45,000 unnecessary synonyms for the macroscopic structures of the human body, and has consequently become an international anatomic language.

This list of some 5,000 terms, intended for common use in the medical schools, was arranged on the basis of systematic human anatomy.

In order to increase its usefulness in the study of practical anatomy, the Systematic BNA has been expanded to include a regional arrangement of anatomical terms based upon the sequence in which structures are exposed in actual dissection by the student.

This book of 261 pages, illustrated with twelve plates and figures in delineation of surface anatomy and surface projections of the skeleton, is now ready. Price, \$3.50, bound in Fabricoid.

EPPLEY

ELECTROMETRIC TITRATION APPARATUS

Adapted to the determination of end-points either by observing a sudden deflection of the galvanometer as in the titration of dichromate with ferrous sulfate, or by plotting readings proportional to electromotive force against volume of reagent.

FEATURES

Leeds & Northrup Co. portable lamp and scale galvanometer of the suspended coil type with a sensitivity of 40 megohms.

Potentiometer with precision of 1 millivolt; long slide wire for ease of reading and accuracy.

Stirrer on direct flexible shaft drive; speed controlled by rheostat and reducible to 2 revolutions a second.

Portable calomel electrode designed to permit flushing and refilling without removing from apparatus.

Of most simple and compact design; convenient operation.

Furnished for 110 v. A. C. or D. C.,
220 v. A. C. or D. C.

*Cat. No. 350 Eppley Electrometric
Titration*

Apparatus, complete, including:

- 3 Platinum Electrodes
- 1 Calomel Electrode, portable, filled, ready for use
- 1 Hildebrand Hydrogen Electrode
- 1 liter saturated KCL solution

Price \$250.00, f.o.b. Newport
