JOHNS HOPKINS UNIVERSITY
SCHOOL OF MEDICINE

The School of Medicine is an Integral Part of the University and is in the Closest Affiliation with the Johns Hopkins Hospital.

ADMISSION
Candidates for admission must be graduates of approved colleges or scientific schools with two years' instruction, including laboratory work, in chemistry, and one year each in physics and biology, together with evidence of a reading knowledge of French and German.

Each class is limited to a maximum of 75 students, men and women being admitted on the same terms. Applications may be sent any time during the academic year but not later than June 15th.

If vacancies occur, students from other institutions desiring advanced standing may be admitted to the second or third year provided they fulfill the requirements and present exceptional qualifications.

INSTRUCTION
The academic year begins the Tuesday nearest October 1, and closes the second Tuesday in June. The course of instruction occupies four years and special emphasis is laid upon practical work in the laboratories, in the wards of the Hospital and in the dispensary.

TUITION
The charge for tuition is $400 per annum, payable in two installments. There are no extra fees except for certain expensive supplies, and laboratory breakage.

Inquiries should be addressed to the Executive Secretary of the School of Medicine, Johns Hopkins University, Washington and Monument Sts., Baltimore, Md.

Graduates in Medicine who satisfy the requirements of the heads of the departments in which they desire to work are accepted as students for a period not less than three quarters. Tuition charge is $50 a quarter.

STAIN TECHNOLOGY
A quarterly devoted to biological stains and to microscopic technic closely related to staining
Subcription price: $1.50 a year
Published by the Commission on Standardization of Biological Stains.
(First number appeared in January, 1926. All back numbers are still available.)

BIOLOGICAL STAINS
A handbook on the nature and uses of the dyes employed in the biological laboratory.
By H. J. CONN,
with the collaboration of the members of the Executive Committee of the Commission on Standardization of Biological Stains
151 pages, cloth bound.
Published by the Commission.
Price $2.50 postpaid (to per cent. discount if cash accompanies order).

Both the book and journal should be ordered direct of the Chairman of the Commission:
H. J. CONN,
Lock box 299 Geneva, N. Y.

For Accurate Quantitative Analysis
Sterling's "S" Quality Filter Paper

made from the highest quality Swedish filter paper, washed by us in hydrochloric and hydrofluoric acids, is as nearly ashless as filter paper can be made.

It is fine enough to hold such precipitates as Barium Sulphate and still is rapid filtering. Chemists who have to do exceptionally careful analytical work will therefore find it an ideal paper for their use.
Sterling's "S" quality filter paper is made in standard sizes, packed in dust-proof boxes of 100 circles each, and the ash per paper is indicated on the label.

Liberal sample on request.

THE pioneers in Ultraviolet research are already reaping the benefits of their early experimental efforts. Their followers can profit both from a continuation of their experimental work and the application of the principles they have disclosed.

The quartz mercury vapor arc lamp has long been recognized as the richest available source of ultraviolet light. The HANOVIA Laboratory Model is offered as the most practical and efficient model of this type of lamp. Send for Booklet 20-A, which gives detailed descriptions of all HANOVIA Laboratory equipment.
