

BAUSCH & LOMB

OPTICAL COMPANY

The New Spectrophotometric Outfit

THIS new spectrophotometric outfit consists of three major units, each of which is designed to give the highest degree of efficiency and accuracy.

The photometer, which is of the polarization type, provides an excellent white light photometer for use in photography and densitometry. It is aptly designed for comparison of lights and measurement of transmission and absorption curves of liquids and solids.

The spectrometer is of the constant deviation type. The prism is mounted within a dustproof housing on a rotating

table actuated by a drum on which the wavelength scale is engraved. Rotation brings the desired portions of the spectrum upon the central part of the field.

The photometric stand permits an excellent fixed source of illumination which serves both fields of the photometer making them independent of variations and intensity.

An investigation of this outfit will amply repay you.

Price of outfit as described above, less specimen tubes,

\$848.00

Products bearing this mark need no certificates of guarantee. They are backed by the Bausch & Lomb reputation for **FAIR DEALING AND SERVICE.**

STAIN TECHNOLOGY

A quarterly devoted to biological stains and to microscopic technic closely related to staining.

Subscription price: \$1.50 a year
Published by the Commission on Standardization of Biological Stains.
(First number appeared in January, 1926. *All back numbers are still available.*)

BIOLOGICAL STAINS

A handbook on the nature and uses of the dyes employed in the biological laboratory.

By H. J. CONN

with the collaboration of the members of the Executive Committee of the Commission on Standardization of Biological Stains
151 pages, cloth bound.
Published by the Commission.

Price \$2.50 postpaid (10 per cent. discount if cash accompanies order).

Both the book and journal should be ordered direct of the Chairman of the Commission:

Now open the entire year for
Research

in any branch of Biology

Fundulus and other marine material abundant for embryological and physiological investigation.

Special Equipment for mammalian work.

Fee for private laboratory \$75, table \$50.

Instruction

Six weeks, June 27th to August 8th. Courses in Field Zoology, Physiology, Surgical Methods in Experimental Biology, Endocrinology, Field Botany and Plant Ecology. Tuition, \$75.

A marine littoral location, in rolling, forested country, with close proximity to brackish and fresh water collecting grounds, yet only an hour from the center of New York City, with access to its splendid museums, institutions and libraries.

JAGABI RHEOSTATS

are wound on enameled tubes as illustrated above. By means of sliding-contacts the resistance can be varied from zero to full capacity, in exceedingly small steps.

In resistance ratings, JAGABI Rheostats vary from 0.34 ohm up to 30,000 ohms, and in corresponding current values from 25 amperes down to .1 ampere.

Especially suited for use in Educational, Research and Industrial Laboratories. Write for Catalogue 1140-S.
JAMES G. BIDDLE, 1211-13 ARCH ST., PHILADELPHIA

JOHNS HOPKINS UNIVERSITY SCHOOL OF MEDICINE

The School of Medicine is an Integral Part of the University and is in the Closest Affiliation with the Johns Hopkins Hospital.

ADMISSION

Candidates for admission must be graduates of approved colleges or scientific schools with two years' instruction, including laboratory work, in chemistry, and one year each in physics and biology, together with evidence of a reading knowledge of French and German.

Each class is limited to a maximum of 75 students, men and women being admitted on the same terms. Applications may be sent any time during the academic year but not later than June 15th.

If vacancies occur, students from other institutions desiring advanced standing may be admitted to the second or third year provided they fulfill the requirements and present exceptional qualifications.

INSTRUCTION

The academic year begins the Tuesday nearest October 1, and closes the second Tuesday in June. The course of instruction occupies four years and especial emphasis is laid upon practical work in the laboratories, in the wards of the Hospital and in the dispensary.

TUITION

The charge for tuition is \$400 per annum, payable in two installments. There are no extra fees except for certain expensive supplies, and laboratory breakage.

Inquiries should be addressed to the Executive Secretary of the School of Medicine, Johns Hopkins University, Washington and Monument Sts., Baltimore, Md.

Graduates in Medicine who satisfy the requirements of the heads of the departments in which they desire to work are accepted as students for a period not less than three quarters. Tuition charge is \$50 a quarter.

Marine Biological Laboratory Woods Hole, Mass.

Facilities for research in Zoology, Embryology, Physiology, and Botany. Fifty-two private laboratories Entire Year \$100 each and ninety-four private laboratories \$200 each for not over three months. Fifty-six tables are available for beginners in research who desire to work under the direction of members of the staff. The fee for such a table is \$50.00.

INSTRUCTION

June 27 to August
7, 1928

Courses of laboratory instruction with lectures are offered in Invertebrate Zoology, Protozoology, Embryology, Physiology, and Morphology and Taxonomy of the algae. Each course requires the full time of the student. Fee, \$75.00.

The annual announcement will be sent on application to The Director, Marine Biological Laboratory, Woods Hole, Mass.
