THE STANDARD WHITE RAT
Mus Norvegicus Albinus

We maintain the largest commercial colony of White Rats in the United States, confining our efforts solely to the breeding, raising and selling of a Standard Albino Rat. A standard animal enables biologists in different sections to obtain comparable results.

A BREEDING STOCK OF 2,000 AND A SALES STOCK OF 20,000 CONSTANTLY MAINTAINED BY A WEEKLY OUTPUT OF 1,500 TO 2,000 INSURES PROMPT AND SATISFACTORY EXECUTION OF ALL ORDERS.

**Prices on Lots of 50 or more**

916 Parrish Street    Phone, Market 5265    Philadelphia, Pa.
New Castle Incubator

**Chamber has uniform and constant temperature**

The new Castle Incubator fills the need for a reliable and accurate apparatus at a moderate price.

The electric heater is beneath the bottom (not taking up space in the chamber). It distributes the heat uniformly from the bottom and maintains an unvarying temperature.

The automatic regulator controls the escape of excess heat up and out through the rear double wall. The walls are made of thick insulating material, bound with polished copper.

Every Laboratory Needs It
THE SCIENCE PRESS PRINTING COMPANY

The Science Press Printing Company has been established and equipped for printing scientific literature in the best way, with compositors, pressmen and proof-readers trained for technical work. It is a business corporation but it has been founded to provide facilities essential for the advancement of science. The corporation owns its building at Lancaster, Pennsylvania, over 14,000 square feet of floor space lighted on all sides, with space for printing a hundred scientific journals. It has the best obtainable presses, composing machinery and binding equipment. What is more important, it has the most competent pressmen and compositors in a city which since “Science” was first printed there in 1894 has become a center for fine scientific printing. The costs are only about three fourths as much as in the large cities.

Those authors who have read proofs will know the correctness of the composition, including the technical scientific terminology. A distinguished scientific man wrote recently to the editor of “Science”: “I corrected my first proof a year before you were born and the one I returned yesterday was the first one in my long experience that needed no correction.”

The press prints “The Scientific Monthly,” “Science,” “School and Society,” “The American Naturalist” and some twenty other scientific journals and publications. The typography and presswork of these journals will bear comparison with any weekly or monthly publication, although, for example, “Science” must be printed mostly in one day in an edition of over 13,000. The new edition of “The Biographical Directory of American Men of Science” is an example of the work of the press. It can to special advantage print scientific monographs and doctorate dissertations.

Correspondence should be addressed to the secretary, Jaques Cattell, The Science Press Printing Company, Lancaster, Pa.

SUPPLY DEPARTMENT

Open the Entire Year

Biological Supplies

For the classroom, museum or collector. Look for the sign of the Limulus. As the Limulus represents the test of time, we feel from the business growth that our supplies have also stood the test of years.

Send for Catalogue
No. I. Zoological and Embryological material. Life Histories and Habitat Groups.
No. II. Botanical material.
No. III. Microscopic Slides.
Address all correspondence regarding material and catalogue to:
