New Castle Incubator

Chamber has uniform and constant temperature

The new Castle Incubator fills the need for a reliable and accurate apparatus at a moderate price.
The electric heater is beneath the bottom (not taking up space in the chamber). It distributes the heat uniformly from the bottom and maintains an unvarying temperature.
The automatic regulator controls the escape of excess heat up and out through the rear double wall. The walls are made of thick insulating material, bound with polished copper.

STAIN TECHNOLOGY
A quarterly devoted to biological stains and to microscopic techniques closely related to staining.
Subscription price: $1.50 a year
Published by the Commission on Standardization of Biological Stains.
(First number appeared in January, 1926. All back numbers are still available.)

BIOLOGICAL STAINS
A handbook on the nature and uses of the dyes employed in the biological laboratory.
By H. J. CONN
with the collaboration of the members of the Executive Committee of the Commission on Standardization of Biological Stains
151 pages, cloth bound.
Published by the Commission.
Price $2.50 postpaid (10 per cent. discount if cash accompanies order).
Both the book and journal should be ordered direct of the Chairman of the Commission:
H. J. CONN
Lock box 299 Geneva, N. Y.

PHOTO-ELECTRIC CELLS
THE BURT CELL
Without Fatigue—Highly Sensitive Absolutely Reproducible—Instantaneous in Response

The BURT-CELL is made by a new method and should not be confused with any other photo-electric cell. By a special process of electrolysis, the photo-electric metal is introduced into a highly evacuated bulb directly through the glass wall of the bulb, giving photo-electric material of absolute purity. The superiority of the BURT-CELL is due to these features, making possible results never before obtainable.

Described in Bulletin No. 271
QUARTZ CELLS—We are pleased to announce that we are manufacturing reproducible quartz photo-cells for measurement of ultra-violet.
We also manufacture the STABILIZED OSCILLOGRAPH—the only VISUAL OSCILLOGRAPH having a linear time axis and no inertia—giving an accurate picture of high frequency wave forms. This is a most powerful tool for the study of periodic phenomena.

ANNOUNCEMENT

A Scientific and Educational Book Service

THE SCIENCE PRESS DISTRIBUTING COMPANY is prepared to supply any book or any journal published in any country at as low a cost as it can be obtained. It will also supply monographs, reprints and extracted articles as far as these are available. This agency has been established for the convenience of men and women working in science and education and for institutional libraries. It is particularly concerned with books, journals and reprints in science and education where it can offer unexcelled service. Orders for other publications, however, will also be filled. Inquiries and orders may be addressed to: The Science Press Distributing Company, Grand Central Terminal, New York City.
