CLEVELAND

JOHNS HOPKINS UNIVERSITY SCHOOL OF MEDICINE

The School of Medicine is an Integral Part of the University and is in the Closest Affiliation with the Johns Hopkins Hospital.

ADMISSION

Candidates for admission must be graduates of approved colleges or scientific schools with two years' instruction, including laboratory work, in chemistry, and one year each in physics and biology, together with evidence of a reading knowledge of French and German.

Each class is limited to a maximum of 75 students, men and women being admitted on the same terms. Applications may be sent any time during the academic year but not later than June 15th.

If vacancies occur, students from other institutions desiring advanced standing may be admitted to the second or third year provided they fulfill the requirements and present exceptional qualifications.

INSTRUCTION

The academic year begins the Tuesday nearest October 1, and closes the second Tuesday in June. The course of instruction occupies four years and especial emphasis is laid upon practical work in the laboratories, in the wards of the Hospital and in the dispensary.

TUITION

The charge for tuition for 1929-30 will be \$600 per annum, payable in two installments. There are no extra fees except for certain expensive supplies, and laboratory breakage.

Inquiries should be addressed to the Executive Secretary of the School of Medicine, Johns Hopkins University, Washington and Monument Sts., Baltimore, Md.

Graduates in Medicine who satisfy the requirements of the heads of the departments in which they desire to work are accepted as students for a period not less than three quarters. Tuition charge is \$50 a quarter.

OUTLINES OF GENERAL ZOOLOGY

Revised Edition

by **H. H. NEWMAN**

In this revision of his well-known textbook the author has made no changes in general method. He has maintained the judicious blending of the principles method and the type method of presentation which has proved so successful in the original edition. Several other important changes have been made, however. The text matter has been brought thoroughly up to date, and sufficient new material has been added to render the book thoroughly adequate for the needs of a two-semester course. Several new types have been introduced; namely, the sponges, the clam, the parasitic round worms of man, and the grasshopper. Extensive additions have been made to the chapters on the earthworm and frog. The book has been enriched with about thirty new cuts.

The chapters on the MORPHOLOGY AND PHYSIOLOGY OF THE CELL have been completely rewritten, and the chapter on the ANIMAL KINGDOM has been enlarged. A more definite physiological emphasis is apparent than in the original edition.

A very important feature of the revision is the complete reorganization of Part IV, formerly entitled GENERAL PRINCIPLES OF ZOOLOGY. This section of the book has now been rearranged and extensively rewritten under the general title of DYNAMIC ASPECTS OF ZOOLOGY. Certain chapters which did not fit into the new scheme were omitted and three new Chapters which deal with the biological mechanisms and sense organs have been added to this section.

By the same author:

LABORATORY GUIDE AND REVIEW MANUAL

This new manual has been prepared in response to a persistent demand on the part of teachers who have been using the GENERAL ZOOLOGY. It is relatively small in size and deals only with types discussed in the text. A feature of the book is a series of review questions at the end of each laboratory exercise which cover all the more important points in both text and manual and serve to focus the knowledge of the student.
