

The Wistar Institute Bibliographical Service

is of invaluable assistance to

Librarians—Investigators—Teachers

It brings to them, in AUTHORS' ABSTRACT form, a brief review of all original papers on Biological Subjects which appear in the following journals:

Journal of Morphology and Physiology
The Journal of Comparative Neurology
The American Journal of Anatomy
The Anatomical Record
The Journal of Experimental Zoology
American Journal of Physical Anthropology
The American Anatomical Memoirs
Folia Anatomica Japonica (Tokio, Japan)
Stain Technology (Geneva, N. Y.)
Physiological Zoology (Chicago, Ill.)

Advance Abstract Sheets

issued semi-monthly, bearing Authors' Abstracts without bibliographic references, offer a practical means of making research immediately available in abstract form and of purchasing articles of special interest in reprint form without the necessity of subscribing to all the journals. Subscription, \$3.00 per year.

Bibliographic Service Cards

with complete bibliographic references, printed on Standard Library-catalogue cards, are of value and assistance to Librarians and Investigators. Subscription, \$5.00 per year.

Abstracts in Book Form

referred to above, are brought together periodically, with Authors' and Analytical Subject Indices. Price \$5.00 per volume.

Subscriptions to the Bibliographic Service and orders for reprints should be sent to

The Wistar Institute of Anatomy and Biology

Thirty-sixth St. and Woodland Ave. Philadelphia, Pa.

Flowers and Insects

By

CHARLES ROBERTSON

A technical book covering many years of study by the author on the visits of insects to flowers. 15,172 visits of 1,288 insects, and one humming bird, to 441 insect flowers are recorded.

This book should prove of interest both to the Botanist and to the Entomologist.

225 pages \$3.00, plus postage

This book is printed and offered for sale by

JOHNS HOPKINS UNIVERSITY SCHOOL OF MEDICINE

The School of Medicine is an Integral Part of the University and is in the Closest Affiliation with the Johns Hopkins Hospital.

ADMISSION

Candidates for admission must be graduates of approved colleges or scientific schools with two years' instruction, including laboratory work, in chemistry, and one year each in physics and biology, together with evidence of a reading knowledge of French and German.

Each class is limited to a maximum of 75 students, men and women being admitted on the same terms. Applications may be sent any time during the academic year but not later than June 15th.

If vacancies occur, students from other institutions desiring advanced standing may be admitted to the second or third year provided they fulfill the requirements and present exceptional qualifications.

INSTRUCTION

The academic year begins the Tuesday nearest October 1, and closes the second Tuesday in June. The course of instruction occupies four years and especial emphasis is laid upon practical work in the laboratories, in the wards of the Hospital and in the dispensary.

TUITION

The charge for tuition for 1929-30 will be \$600 per annum, payable in two installments. There are no extra fees except for certain expensive supplies, and laboratory breakage.

Inquiries should be addressed to the

Executive Secretary of the School of Medicine, Johns Hopkins University, Washington and Monument Sts., Baltimore, Md.

Graduates in Medicine who satisfy the requirements of the heads of the departments in which they desire to work are accepted as students for a period not less than three quarters. Tuition charge is \$50 a quarter.

Coming in July
a new third edition of
the standard textbook on zoological principles
Principles of
ANIMAL BIOLOGY

By A. FRANKLIN SHULL
With the collaboration of
GEORGE R. LaRUE and ALEXANDER G. RUTHVEN
of the University of Michigan

McGraw-Hill Publications in the Zoological Sciences

IN this new edition the authors reaffirm their conviction that the best approach to biological science is through the presentation of great generalizations and fundamental principles.

The intimate relation between function and structure is emphasized by combining the chapters on morphology and physiology of higher types. The combined discussion is divided into several chapters in recognition of distinct types of physiological processes.

The account of cell structure and cell physiology has been rewritten to emphasize still more strongly the fundamental features, and to include some of the most recent conclusions of the general physiologists.

The chapter on genetics has been strengthened by the inclusion of an adequate account of linkage and sex-linkage, by revision of the problems and by the inclusion of additional problems.

The entire book has been thoroughly revised to reflect new discoveries and altered points of view.

Shull's PRINCIPLES OF ANIMAL BIOLOGY has been widely used in previous editions. In fact this past year it has been in use in 87 colleges.

A revision of Shull's LABORATORY DIRECTIONS IN ANIMAL BIOLOGY is also in press.
