Zoological Notes: F. A. L. .................................................................................................. 413
Current Notes on Physiology:—
The Mississippi Flood of 1897; The Fiji Coral Reefs; The Mazamas: Professor W. M. Davis. 414
Current Notes on Meteorology:—
Meteorological Observations during the Eclipse of January 22d; Hahn’s Klimatologie; Barometrical Determination of Heights: R. Dec. Ward. ......................... 415
Current Notes on Anthropology:—
The Aborigines of Western Asia; The Ethnological Study of Cultivated Plants: Professor D. G. Brinton .............................................................. 416
Astrophysical Notes: E. B. F. .............................................................................................. 417
Notes on Inorganic Chemistry: J. L. H. ............................................................................. 418
Scientific Notes and News:—
The Allegheny Observatory; General University and Educational News. .................... 423
Discussion and Correspondence:—
The Terminology of the Neurocyte or Nerve Cell: Dr. F. C. Kenyon. Retinal Images and Binocular Vision: Dr. Charles H. Judd .............................................. 424
Scientific Literature:—
Oppel’s Mikroskopischen Anatomie der Wirbeltiere: Professor Franklin P. Mall. Whittaker’s Mechanical Engineer’s Pocket-book; Reeve on the Entropy-temperature Analysis of Steam Engine Efficiencies: Professor R. H. Thurston ................................................................. 426
Societies and Academies:—
Scientific Journals............................................................................................................. 432
New Books......................................................................................................................... 432

MSS. intended for publication and books, etc., intended for review should be sent to the responsible editor, Prof. J. McKeen Cattell, Garrison-on-Hudson, N. Y.

IATRO-CHEMISTRY IN 1897.*

Phineas T. Barnum, the prince of American showmen, discovered early in his successful career that ‘the people like to be humbugged,’ and he showed great ability in profiting by this weakness; it must be said to his credit, however, that he always honorably gave the people full value for their money. This love of humbug seems to be exceedingly strong in respect to the healing of diseases, and in all ages those who practiced the art have taken advantage of man’s credulity; it is not necessary to transcribe the contents of that model of condensation, Thomas Joseph Pettigrew’s treatise on superstition in medicine and surgery (London, 1844), to convince my hearers of this truth. In 1897 we expect better things; we are prone to believe that the universal education of the masses, the popularization of the facts and theories of science, fit the people to appreciate at their true value the claims of charlatans. Americans looking reverently to the Old World, where brilliant lights illumine the paths of philosophy and science, hardly expect to find there also the deepest shadows of ignorance and credulity, yet no higher position can be assigned to the modern adaptation of Iatro-Chemistry known as ‘Electro-Homeopathy.’ Originating in Italy, it has taken root in Germany and flourishes in
