PHOTO-ELECTRIC CELLS

THE BURT CELL

Without Fatigue—Highly Sensitive
Absolutely Reproducible—Instantaneous in Response

The BURT-CELL is made by a new method and should not be confused with any other photo-electric cell. By a special process of electrolysis, the photo-electric metal is introduced into a highly evacuated bulb directly through the glass wall of the bulb, giving photo-electric material of absolute purity. The superiority of the BURT-CELL is due to these features, making possible results never before obtainable.

Described in Bulletin No. 271

QUARTZ CELLS—We are pleased to announce that we are manufacturing reproducible quartz photo-cells for measurement of ultra-violet.

We also manufacture the STABILIZED OSCILLOGRAPH—he only VISUAL OSCILLOGRAPH having a linear time axis and no inertia—giving an accurate picture of high frequency wave forms. This is a most powerful tool for the study of periodic phenomena.

SECOND EDITION

BIOLOGICAL STAINS

To be out about October 15th

This booklet, already quite well known among biologists, has been completely revised. The new edition will have 224 pages (about 75 pages longer than the first edition). It will not only be more up-to-date, but will include descriptions of 15 or 20 dyes not covered in the old edition; it will also give in detail about 75 of the most important staining formulae and procedures calling for stains. The book is written by the Chairman of the Commission on Standardization of Biological Stains, and is published by the Commission.

The regular price of the book is to be $3.00. It may still be obtained, however, at the special pre-publication price of $2.50 if orders accompanied by remittance are sent in before October 15th.

Send orders to

H. J. CONN, Chairman,
Lock Box, 229, Geneva, N. Y.

The Wistar Institute Bibliographical Service

is of invaluable assistance to

Librarians—Investigators—Teachers

It brings to them, in AUTHORS' ABSTRACT form, a brief review of all original papers on Biological Subjects which appear in the following journals:

- Journal of Morphology and Physiology
- The Journal of Comparative Neurology
- The American Journal of Anatomy
- The Anatomical Record
- The Journal of Experimental Zoology
- American Journal of Physical Anthropology
- The American Anatomical Memoirs
- Folia Anatomica Japanica (Tokio, Japan)
- Stain Technology (Geneva, N. Y.)
- Physiological Zoology (Chicago, Ill.)

Advance Abstract Sheets

Issued semi-monthly, bearing Authors' Abstracts without bibliographic references, offer a practical means of making research immediately available in abstract form and of purchasing articles of special interest in reprint form without the necessity of subscribing to all the journals. Subscription, $3.00 per year.

Bibliographic Service Cards

with complete bibliographic references, printed on Standard Library-catalogue cards, are of value and assistance to Librarians and Investigators. Subscription, $5.00 per year.

Abstracts in Book Form

referred to above, are brought together periodically, with Authors' and Analytical Subject Indices. Price $5.00 per volume.

Subscriptions to the Bibliographic Service and orders for reprints should be sent to

PHOTOELECTRIC CELLS

Television—Talking Pictures—Research
G. M. VISITRON cells of the alkali metal hydride type are of highest sensitivity, low dark current, long life, and respond to the smallest changes of light intensity and color. Their high quality and uniform sensitivity make them the choice of leading engineers.

POSITIVE pH CONTROL

ACHIEVED WITH THE LaMOTTE ROULETTE COMPARATOR

DEVELOPED IN THE LaMOTTE LABORATORIES.

THE ROULETTE COMPARATOR OFFERS PERFECTION IN HYDROGEN ION CONTROL.

TWENTY-SEVEN LaMotte Permanent Color standards thoroughly cover any desired general range. Standards are always in place, allowing immediate determinations with simplicity and no danger of breakage. Standards and test sample are chemically and physically the same medium, making an immediate color match possible. All error due to impurity, color or turbidity of samples (whether highly buffered or not) is eliminated. Day or night accuracy to 0.1 pH is possible because of special lighting arrangement. Despite its permanence the set is portable. Standard equipment highly recommended for general and research work.

Write for “The A B C of Hydrogen Ion Control,” an illustrated booklet which explains Colorimetric tests and their applications to many fields. Complimentary upon request.

STERLING PRODUCTS COMPANY
ASST. PURCH.
THE STANDARD WHITE RAT
Mus Norvegicus Albinus

We maintain the largest commercial colony of White Rats in the United States, confining our efforts solely to the breeding, raising and selling of a Standard Albino Rat. A standard animal enables biologists in different sections to obtain comparable results.

A BREEDING STOCK of 2,000 AND A SALES STOCK of 20,000 CONSTANTLY MAINTAINED BY A WEEKLY OUTPUT of 1,500 to 2,000 INSURES PROMPT AND SATISFACTORY EXECUTION OF ALL ORDERS.
