PROFESSOR EINSTEIN AT THE CALIFORNIA
INSTITUTE OF TECHNOLOGY
ADDRESSES AT THE DINNER IN HIS HONOR:

MR. ALLAN C. BALCH, PRESIDENT OF THE
ATHENAEUM:

This is a dinner of some two hundred California Institute Associates, held at the Athenaeum, a building designed as a club house and meeting center for three groups of people: First, the staffs of the three adjacent cooperating institutions, the California Institute of Technology, the Mount Wilson Observatory of the Carnegie Institution of Washington and the Henry E. Huntington Library and Art Gallery; second, eastern and foreign scholars who are drawn to this research and educational center for participation in, or some sort of association with, its activities; third, the group of residents of this Southern California community known as the California Institute Associates, who are interested in and promoters of the scientific and scholarly work going on in these institutions.

I wish to call first on Russell H. Ballard, president of the Southern California Edison Company and president, also, of the California Institute Associates.

MR. BALLARD:

Mr. Balch, Professor Einstein and the California Institute Associates:

It is rare good fortune that there is at this moment a conjunction here at the Athenaeum of a large number of the men who have worked as collaborators in the development of those phases of modern knowledge and modern thought to which the guest of honor tonight has made far-reaching contributions. I am going to call the roll, in the order of seniority, of this group of Einstein collaborators here present:

Albert A. Michelson, emeritus director of the Ryer-
