CONTENTS AND INDEX

NEW SERIES. VOL. LXXVIII—JULY TO DECEMBER, 1933

THE NAMES OF CONTRIBUTORS ARE PRINTED IN SMALL CAPITALS

ABELE, S. B. D., Vaginal Epithelium of Mice, 17
Academy, of Science, North Carolina, H. R. TOTTEN, 125;
Indiana, W. E. EDMONTON, 126; Minnesota, 172; New
Hampshire, T. G. PHILLIPS, 172; Texas, 527; Tennes-
see, 597; of Sciences, National, 603, Comstock Prize, 593;
Address of Welcome, K. T. CUMPTON, 515, Papers at
Cambridge Meeting, 518; Virginia, E. C. L. MILLER,
431.
ADAMS, F. D., Sir Charles Lyell, 177
Aerobic, Dissolution of American Section, 277
Africa, Fauna and Flora of, 481
Agitation Device, G. W. MARKS, 483
Agricultural, Reorganization in Mexico, 206; Industries,
Congress of, 453
Agriculture, Dept. of, Reduced Funds, 86, 140; Limita-
tion of Cash Withdrawals, 328
ALLEN, W. W., Poisoning of Fish, 59
Alfalfa Yellow, L. F. GRABER and V. G. SPRAGUE, 385,
556
AMBERGER, W. R. and OTHERS, Red Blood Corpuscles, 106
American Association for the Advancement of Science,
Chicago Meeting: The Meeting in General, 65; Regis-
tration, 66; Social Functions, 67; Minutes of the
Council, 67; Scientific Sessions, Mathematical Sciences,
69; Physical Sciences, 70; Chemical Sciences, 71;
Astronomical Sciences, 72; Geological and Geographi-
cal Sciences, 73; Zoological Sciences, 74; Botanical
Sciences, 74; Programs Related to both Zoological and
Botanical Sciences, 77; Anthropological Sciences, 78;
Psychological Sciences, 78; Social and Economic Sci-
ences, 79; Historical and Philological Sciences, 82;
Medical Sciences, 83; Agricultural Sciences, 84; Edu-
cational Sciences, 84; Engineering, N. H. HECK, 296;
Pacific Division, J. M. LUCK, 322, 352; Boston Meet-
ing, E. W. SEAWARD, 487, 550; Chemistry and Geology,
330; Secretaries’ Conference, B. E. LIVINGSTON, 581;
Executive Committee, H. B. WARD, 437
American Inst., 431; Junior Science Clubs, 452
Ammonia on Phenols, B. HARRK, I. M. CHAMELIN and
H. WAGREICH, 514
Amputation, Protective, of Limbs, C. C. GUTHRIE, 146
Ampullae, Sphinctors, T. KOPFANSTEIN and W. S. MURPHY, 14
Anaplasmosis, Deer as Carriers of, W. H. BOYNTON and
G. M. WOODS, 559
ANDERSON, E., A Color Chart for Genetics, 150
ANDREWS, E. A., Capsule Reinforcement, 39
Anthoceros Plastid in Light, T. E. WEBER, 264
Anticipatory Reaction, R. DODGE, 197
Ascorbic Acid (Vitamin C), F. A. LEVENE and A. L.
RAYMOND, 64
ASENJO, C. F., Vitamin A in the Oil of Sharks, 479
Asphalcy, Carbon Monoxide, Y. HENDERSON, 408
ASTON, F. W., Isotopes, 5
Astronomical Observatory at Leiden, 378
Augustine, D. L., Trichinosis in Chicks, 608
Aurora Borealis, C. M. GARRISON, 213
AUSTIN, S., The Soybean, 363
Avocado Embryos, Sprouting and Grafting, H. P. TRAUB
and E. C. AUChTER, 389
AYERS, H., Paleospadix, 458; Nematode Parasite, 459
Bacteria as Food, V. BURKE, 194
BAKER, F. C., Fauna of Fresh-water Lakes, 190
BAKER, W. C., Solid Body Floating in Rotating Liquid, 123
BALINKIN, L., Protium and Deuterium, 460
Balkans, Canada, H. COMES, 193
BARROWS, A. L., The Division of General Relations, Na-
tional Research Council, 254
BASSLER, R. S., Foraminifera, J. A. CUSHMAN, 482
BAYNE-JONES, S., Division of Medical Sciences, Na-
tional Research Council, 26
BEAMS, J. W., A. J. WEED and E. G. PICKELS, The Ultra-
centrifuge, 338
BEEBE, W., Stylophthalmus and Idianthus, 390
Behavior, Animal, C. R. UNDERHILL, 239; H. R. PHALEN,
239; Study of, G. E. COGHILL, 131
Beit Memorial Fellowships, 161
Bellsville Experimental Station, 525
BERWICK, F., Dehydrating Nematodes, 312
BIELY, J. and OTHERS, Fowl Paralysis, 42
Biotechnology, Quantitative, at Cold Spring Harbor, 304; and
Reproducibility, E. W. PIKE, 265
Birds, Hailstone Damage to, W. H. GATES, 263
Blackboard, Tilting, H. S. PALMER, 388
Bleie, Albert Martin, F. A. HITCHCOCK, 256
Blood Grouping, W. C. BOYD and L. G. BOYD, 578
BODENHEIMERS, F. S., Palestine, 477
Botanical, Terms, R. W. BROWN, 333; California Bot-
tanical Garden Expedition, T. H. GOODESP, 144;
N. Y. Botanical Garden, 276; Expedition to Turkey,
327
Botany, Literature of, E. HORN, 212; at Univ. of Ox-
ford, 303; American, F. RAMALEY, 365
BOWMAN, I., Grants-in-aid of the National Research
Council, 126; the Weather Bureau, 604
BOYNTON, W. C. and L. G. BOYD, Blood Grouping, 578
BOYNTON, W. H. and G. M. WOODS, Deer as Carriers of
Anaplasmosis, 559
Brachycephaly and Glandular Balance, K. DUNLAP, 603
BRASCH, F. E., Honor to David Eugene Smith, 384
BREDER, C. M., Jr., and R. F. NIORELL, Lamellibranch
Mammalian, 128
BRIDGES, J. B., Award of the Comstock Prize, 503
British, Post-Graduate Hospital and Medical School, 258;
Botanical Expedition to Turkey, 327
BROWN, C. S., Dr. E. N. LOWE, 428
BROWN, J. G., Watermelon and Texas Root Rot, 509;
and M. M. EVANS, Crown Gall on the Giant Cactus, 167
BROWN, R. W., Botanical Terms, 333
Buckshow Browne Surgical Research Farm, 117
BUCH, P. C., The Cerebral Cortex, 418
BUNTING, E., Dental Caries, 419
BURKE, V., Bacteria as Food, 394
BURNS, G. E., Limits of Photosynthesis, 130
BUSDHAL, J. P., Long Beach Earthquake, 148
Califomia, Southern, Rift Club, 207; Univ. of, School
Forest for, 303
CANNFIELD, R. H., Solid and Hollow Stemmed Grasses, 342
CANNON, W. A., D. DEMARRE and E. A. PURKE, Evapor-
aition by Roots, 388
CANNON, W. B., Nerve Impulses, 43; Laboratory of Phys-
ology, 365
CAPILLARY Mercury Vapor Lamp, A. HOLLANDER and J.
F. STAUFFER, 62
Cartilage Reinforcement, E. A. ANDREWS, 39
Carbon Tetrachloride, W. L. MENDEHALL, C. W. Mc-
CLURE and M. HUNTSINGER, 482
Flax, Chromosome Numbers in, A. C. DILLMAN, 409

in the

INTERNATIONAL SERIES IN PHYSICS

Analytic and Vector Mechanics
By HIRAM W. EDWARDS, Associate Professor of Physics, University of California at Los Angeles. 432 pages, 6 x 9. $4.00

More than customary use is made of the vector methods of expression. A unique feature is the inclusion, in addition to a chapter on fundamental vector algebra, of a chapter describing vector fields and showing the meaning and operation of gradient, divergence and curl when applied to mechanical quantities. Emphasis is placed on the subject of kinematics.

Experimental Atomic Physics
By G. P. HARNWELL, Assistant Professor of Physics, Princeton University, and J. J. LIVINGOOD, Research Associate, The University of California. 472 pages, 6 x 9. $5.00

This pioneer work aims to develop in a logical and convincing way the fundamental conceptions of modern atomic physics, with particular attention upon the experimental basis of the subject. A simple but detailed discussion is presented of the significance of practically all the important quantities, and how they are measured. Considerable space is devoted to recent developments.

High-frequency Measurements
By AUGUST HUND, Fellow of the American Physical Society; Member, Institute of Radio Engineers. 491 pages, 6 x 9. $5.00

A thorough discussion of high-frequency phenomena applied to measurements. The subject matter is treated critically, presenting up-to-date theory and practice. The book represents an amplification and modernization of the author's Hochfrequenzmesstechnik, published in Germany.

Visit the exhibit of McGraw-Hill books in the General Exhibits Building, Century of Progress International Exposition, Chicago

ON-APPROVAL COUPON

McGraw-Hill Book Company, Inc.,
330 West 42nd Street, New York, N. Y.

You may send me the books checked below, on approval. I understand that I am to return these books after a reasonable period of examination unless I either notify you of my intent to adopt them in my classes or remit for them.

☐ Edwards—Analytic and Vector Mechanics. $4.00
☐ Harnwell and Livingood—Experimental Atomic Physics. $5.00
☐ Hund—High-frequency Measurements. $5.00

Wherever You Travel
This Summer
Take Along a LEICA
FOR A COMPLETE PICTURE RECORD OF YOUR TRIP

DR. ROBERT CUSHMAN MURPHY, of the American Museum of Natural History, says: 'After more than four years' experience with the LEICA I have come to regard it as the camera that could least be spared from my field equipment. In the course of such natural history investigations as I have carried out in various parts of the world, the range of usefulness of your tiny camera has proved wider than that of any other. Speed, depth of focus, simplicity, large film capacity and, most of all, portability, combine to make it supreme.'

Here are the reasons why scientists, explorers, educators, and professional and amateur photographers recommend the LEICA as the best miniature camera:

1. Automatic Focusing with Built-In Short Base Range Finder, the fastest and most accurate focusing on any camera.
2. Focal Plane Shutter, unaffected by any extremes of temperature and climate. Speeds of 1/20th to 1/500th second, and time exposures.
3. Easy to Operate—every control on top of camera—right at your finger tips.
4. 7 Interchangeable Lenses, including wide angle, telephoto, and high speed lenses, make the LEICA 7 Cameras in ONE.
5. 36 Pictures from a single roll of standard cinema film. Needle-sharp negatives. Perfect enlargements up to 13 x 18 inches.
6. Small, Compact, Fits the Pocket.
7. Over 300 LEICA Attachments and Accessories to choose from, converting the LEICA into a clinical camera, micro-camera, stereo-camera, etc.

LEICA Model D with 50 mm. ELMAR f: 3.5 lens, $92.50.

Write for Free Illustrated Booklet—"WHY LEICA?" also new circular No. 1214, describing the new STANDARD LEICA at $66.00.

Prices are subject to 10% advance due to depreciation in currency exchange.

E. LEITZ, Inc., Dept. 328
60 East 16th Street, New York

Sargent crystal white non-corrosive cover glasses now in a handy package—

Habitual users of Sargent cover glasses and slides will find the new packaging of our cover glasses economical of time and patience.

The convenient one piece box with self hinged cover and front can be quickly opened and closed with the left hand alone, while a single glass is slipped forward from the stack by the right forefinger and thumb.

This handy container, black in color and sealed with the Sargent label, assures you Sargent crystal white cover glasses, German made, whose non-corrosive property is unequaled by cover glasses of any other manufacture.
