SOME CHEMICAL ASPECTS OF LIFE

By Sir Frederick Gowland Hopkins
President of the Royal Society and Sir William Dunn Professor of Biochemistry, University of Cambridge

I

The British Association returns to Leicester with assurance of a welcome as warm as that received twenty-six years ago, and of hospitality as generous. The renewed invitation and the ready acceptance peak of mutual appreciation born of the earlier experience. Hosts and guests have to-day reasons for mutual congratulations. The association on its second visit finds Leicester altered in important ways. It comes now to a city duly chartered and the seat of a bishopric. It finds there a center of learning, many fine buildings which did not exist on the occasion of his first visit and many other evidences of civic enterprise. The citizens of Leicester, on the other hand, will know that since they last entertained it the association has celebrated its centenary, has four times visited distant parts of the Empire and has main-

1 The presidential address before the British Association or the Advancement of Science, Leicester, September 6.
