HYDROGEN ION APPARATUS
Electrometric
According to specifications of K. Pitschner

Recommended for routine determinations, where the accuracy required is not more than .04 pH; for example, for Biological Solutions, such as Blood Enzymes, Fruit, Leather, Milk, Soil and Sugar Solutions, also for Dyes, Inks, Paints, Oils, and similar Colored Solutions, also for metallurgical tests such as pH in Acid Plating Solutions, especially nickel and zinc and in Electro Plating Analysis.

The outfit has the following advantages:

a. Comparatively inexpensive.
b. Careful Construction.
c. Convenience.

It can be used either with Quinhydrone or with Hydrogen Electrodes, and it is convenient also for Titrating.

Write for Bulletin No. 520.

WING OF
FAME

BY LOUISE WALLACE HACKNEY

A rich, vibrant, picturesque story
woven about the life of this brilliant
Englishman, whose scientific foresight
gave us the magnificent Institution.
Not only does the story reveal
the little known facts about Smithson but
through its pages pass many of the
important people of England and
France during the 18th Century.

OCCASIONAL PUBLICATION NO. 1 OF THE AMERICAN
ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE

A summary which clarifies for the first time many
of the problems arising in connection with inventions
made by scientists from the social, economic and
legal viewpoints. A balanced, frank and realistic
picture is presented of the points to be considered
when an important invention is involved from the
standpoint of the individual investigator or his
institution.

MANUAL OF THE SOUTHEASTERN FLORA

(ILLUSTRATED)

Being Descriptions of the Seed-Plants growing naturally in North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Tennessee and Eastern Louisiana

By JOHN KUNKEL SMALL

This Manual replaces the author’s Flora of the Southeastern United States, published in 1903 (second edition 1913), for the Southern States east of the Mississippi River. It embodies the results of continued exploration and study, thus bringing up to date our knowledge of this floral region.

The Manual is the only complete illustrated work on the flora of the Southeast by a recognized authority.

In addition to analytical keys to the various plant groups, and descriptions of the orders, families, genera, and species, regional or altitudinal and geographic distribution, there are xxii + 1554 pages and over 1500 illustrations, one illustration of a species of each genus.
