

*For research purposes
we offer*

Pure, Crystalline
CAROTENE
(Pro-Vitamin A)

of highest vitamin A activity. This is the first fraction of carotene crystals from the ether extract of dried carrots. It is relatively rich in beta carotene, which is believed to be twice as potent biologically as alpha carotene. [Professor Richard Kuhn, Chemistry and Industry 52, 981 (1933)].

Biochemists and physicians are increasingly interested in the functions of carotene in man and in animals because of its presence in the blood stream and in various organs, and its relation to the building up of resistance to infections.

This makes it important to have a source of pure carotene of known potency for accurate investigation of these and related problems. We are supplying carotene of high purity to leading research and educational institutions in this country and abroad, for research investigations and for lecture demonstration.

OCCASIONAL PUBLICATION NO. 2 OF THE
AMERICAN ASSOCIATION FOR THE ADVANCEMENT
OF SCIENCE

The Publications will be issued as supplements to volumes of SCIENCE, but will be sold separately or as a series. They can be bound in at the end of a volume of SCIENCE, or they can be bound together as a series of Occasional Papers, or they can be bound or filed separately under a suitable subject classification.

This symposium of "Physical and Chemical Changes in Nerve during Activity" follows the first publication which was the Report of the Committee on Patents, Copyrights and Trade Marks entitled "Protection by Patents of Scientific Discoveries."
