**SCIENCE**

**Friday, October 21, 1898.**

**CONTENTS:**

Chemistry at the Jubilee Meeting of the American Association: Professor Charles Baskerville

Physics at the Boston Meeting of the American Association for the Advancement of Science (I.): N. Ernest Dorsey

The Advance of Psychology: Professor J. McKee Cattell

The Senff Zoological Expedition to the Nile Valley: H. F. O., N. R. Harrington

Fishes New to the Fauna of Southern New England recently collected at Woods Hole: Dr. Hugh M. Smith

Notes on Inorganic Chemistry: J. L. H.

Current Notes on Anthropology:

- Cranio logical Opinions; Ancient Graves in Maine
- Geography and Anthropology: Professor D. G. Brinton

Scientific Notes and News:

- A National Physical Laboratory for Great Britain; The Franklin Institute; General

University and Educational News

Discussion and Correspondence:

- Tetrachromacy Again: Dr. H. S. Jennings. The Occurrence in Great Abundance of Insects Ordinarily Merely Common: Dr. F. C. Kenyon

Scientific Literature:

- Some Recent Literature on Child-study: Professor M. Y. O'Shea. Mennert's Biomechanik: Professor Chas. B. Davenport

Scientific Journals

Societies and Academies:

- Geological Conference of Harvard University: J. M. Boutwell

New Books

MSS. intended for publication and books, etc., intended for review should be sent to the responsible editor, Professor J. McKee Cattell, Garrison-on-Hudson, N. Y.

**CHEMISTRY AT THE JUBILEE MEETING OF THE AMERICAN ASSOCIATION.**

The union meeting of Section C of the American Association for the Advancement of Science and the American Chemical Society in Boston during the last week in August possibly approximated the desires expressed two years ago by the promoters of the joint session. The Jubilee meeting of the American Association dragged many who have not habitually attended the sessions from their seclusion. Those who did come, either for the first time or only after a lapse of years, observed an inspiring sight in the progress of the Association, and we are constrained to believe that Section C contributed its share to the success of the meeting.

Almost three hundred chemists attended the joint sessions. While Section C has been largely composed of members of the American Chemical Society, many more joined that Society, and numerous applications, in turn, were sent to the American Association. We are inclined to the opinion that did other of the affiliated societies but unite with the various sections in joint sessions only mutual good and benefit would result, as has been the case with Section C and the American Chemical Society.

Some 94 papers were presented before Section C and the American Chemical Society; 51 in full, 31 by abstract and 12 by title, representing the various branches
