**MANUAL OF THE
SOUTHEASTERN FLORA**

ILLUSTRATED

Being Descriptions of the Seed-Plants growing naturally in North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Tennessee and Eastern Louisiana

By

JOHN KUNKEL SMALL

THIS Manual replaces the author's Flora of the Southeastern United States, published in 1903 (second edition 1913), for the Southern States east of the Mississippi River. It embodies the results of continued exploration and study, thus bringing up to date our knowledge of this floral region.

The Manual is the only complete illustrated work on the flora of the Southeast by a recognized authority.

In addition to analytical keys to the various plant groups, and descriptions of the orders, families, genera, and species, regional or altitudinal and geographic distribution, there are xxii + 1554 pages and over 1500 illustrations, one illustration of a species of each genus.

ANNOUNCING
**CRYSTALLINE
VITAMIN B₁**

THE interesting researches by R. R. Williams and co-workers on the isolation of Vitamin B₁ have brought about an increasing interest in the study of the antineuritic vitamin.

The preparation, in our laboratories, of Vitamin B₁ in practical quantities enables us to supply the antineuritic vitamin in crystalline form, making it generally available to investigators and research-workers.

The crystals are the antineuritic principle in the form of the pure hydrochloride. Their biologic potency is approximately 400 Chase and Sherman units per milligram.

Vitamin B₁ Crystals—Merck are marketed in vials containing 10 mgm. (0.01 Gm.).

Further information will be furnished upon request.

Sensitivity Multiplied by 50 . . . in this New "DUAL" Box-type Galvanometer

HERE is a galvanometer that has the simplicity, compactness and short period of our No. 2420 Box-Type Galvanometer, and fifty times its sensitivity. In fact, it is as sensitive as our Type R Galvanometer. For such uses as measurement of pH with glass electrode. Designed for null measurements. Like other galvanometers of high sensitivity, it requires a base substantially free from vibration.

Cat. No.	Sensitivity ¹ per m.m.	Period in Sec.	Resistance		Price
			Damping ²	Coil ³	
2480a	0.001 μ a	3	10,000	300	\$85.00
2480b	0.5 μ v*	3	80	20	85.00
2480c	0.0005 μ a	3	15,000	1000	85.00

¹ Sensitivity is at least as high as stated; other characteristics within 20%. ³ Including suspensions.

² External critical damping resistance.

* With critical damping resistance in series.
