

MOSBY·REFERENCE BOOKS·MOSBY

DODGE'S—"Medical Mycology"—This book is not only the latest but the most complete ever compiled on mycology. Every fungus that is known to science is described. Chapters on general morphology, physiology, culture media, microscopy, and botanical nomenclature add to the service of this book for reference purposes. Many descriptive illustrations have been included, as well as extensive bibliographies. This is a most useful reference text. Price \$10.00.

SHERWOOD'S—"Immunology"—Any teacher or student of bacteriology should have access to this reference book. This is especially true of students who are majoring in bacteriology or who are going into medicine. The book covers the subject thoroughly, and, being of recent publication, its material contains the latest theories and facts. Standard technics are used. Definitions are given freely, and there are many illustrations some of which are in color. Price \$6.00.

NEW!

MACLEOD'S—"Physiology in Modern Medicine"—This text is most useful to the student of physiology because it is a clinical application of the subject. It expands the information of the classroom textbook. The chapters are grouped into ten parts which makes reference work rapid and easy. Because of its accuracy and its clinical application, Macleod is generally regarded as the outstanding physiology book. Price \$8.50.
