**ADDRESS OF THE PRESIDENT OF THE NATIONAL ACADEMY OF SCIENCES**

By Professor FRANK R. LILLIE

UNIVERSITY OF CHICAGO

At the last two annual dinners Dr. Campbell presented the history of the academy and emphasized especially the obligation that rests upon members of the academy under its congressional charter "whenever called upon by any Department of the Government to investigate, examine, experiment and report upon any subject of science or art" without any compensation whatever for such services.

May I, in my turn, remind you that this building is also the building of the National Research Council, and that the names of both the academy and the research council appear over its door. The National Research Council was organized by the academy in 1916 under its congressional charter, as a measure of national preparedness, at the request of President Wilson; and was perpetuated by the academy in 1918.
