THE SEMI-CENTENNIAL CELEBRATION OF THE SOCIETY OF SIGMA XI

THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE AND THE SOCIETY OF SIGMA XI

The president of the American Association for the Advancement of Science has been asked to extend the greetings and congratulations of the association to the Society of Sigma Xi on the fiftieth anniversary of its birth and to point out the parallelism between these two organizations. Both have one function in common, the promotion of science, both seek to accomplish this by scientific meetings and publications and by the award of honors and grants-in-aid of research. But the association seeks to correlate all branches of science and to secure the cooperation of all persons who are seriously interested in its promotion, while Sigma Xi is an honor society for those who have shown ability as investigators and who constitute a selected group of "Companions in Zealous Research."

The American Association is the largest, most democratic and one of the oldest scientific bodies on this continent. It was organized in 1848, though its antecedents go back to the American Geological Society, Biological Sciences.” The concluding exercises consisted of the presentation of the Sigma Xi Memorial in front of Sibley College.
