VACANCIES FOR:

(a) PROFESSIONAL OFFICER (FIELD HUSBANDRY)—SOUTH AFRICAN DEPARTMENT OF AGRICULTURE AND FORESTRY—SALARY SCALE £500–25–700.

Applications are invited from suitable candidates for appointment to the above mentioned posts in the Public Service of the Union of South Africa.

The commencing salaries will be determined according to qualifications and experience, and increments are grantable annually, subject to satisfactory service and good conduct.

Candidates should furnish full particulars regarding qualifications and experience. Original certificates and testimonials should not be submitted in the first instance.

Before appointment to the fixed establishment in a permanent capacity, the successful candidates will be required to serve on probation for a period of not less than twelve months; they must be British subjects and have resided in the Union of South Africa or in the Mandated Territory of South West Africa for not less than three years and they must furnish satisfactory certificates of birth and health. Successful candidates who do not satisfy the nationality and/or residential qualifications will be appointed on contract until, if their services are satisfactory, they acquire eligibility for permanent appointment.

Proficiency in one of the official languages English and Afrikaans (or Nederlands), is an essential requirement.

The successful candidates will be provided with free first class Railway and Steamship tickets from their respective places of residence to the centre at which they are to assume duty. Salary at half the commencing rate will be payable during the period necessarily occupied in travelling from the port of embarkation to the place of appointment, but no other incidental or travelling expenses and no expenses in respect of the successful candidates' families or dependents will be paid.

Copies of publications and/or scientific reports of which the applicant is the author, must be attached to all applications where possible.

Any degrees obtained by candidates must be those of Universities of recognised standing. Any qualifications additional or of a standard equal to those which are required will also be taken into account.

Special qualifications required in respect of these posts are as follows:

(a) Post of Professional Officer (Field Husbandry).

Applicants must be in possession of at least a B.Sc. degree with Botany and Chemistry as major subjects. Post-graduate experience in Plant Physiology will be a strong recommendation.

(b) Post of Dietitian.

Candidates must hold a degree in Home Economics. A post-graduate training in practical institutional management will be a recommendation. The duties attaching to the post consist of inspecting and advising on diets and dietary arrangements in force in Government and Provincial and Government-aided and Provincial-aided institutions in the Union of South Africa.

Application must be made on prescribed form (Z.88) which is obtainable from the Secretary, South African Legation, 3101 Massachusetts Avenue, Washington, D. C., to whom all completed forms must be addressed. Applications must reach the above address not later than December 11, 1939.

Inorganic Analysis

with Organic Reagents

Speed, convenience, accuracy, and selectivity characterize the analytical methods in which organic reagents are employed for the determination of metals. A choice of procedures—gravimetric, colorimetric, or volumetric—is available for most of the common metals.

If inorganic analyses are an important part of your routine, write for the list of free abstracts describing the use of Eastman Organic Chemicals. . . . Eastman Kodak Company, Chemical Sales Division, Rochester, N. Y.

CONSTANT TEMPERATURE EQUIPMENT

**BATHS**
General or special purpose for water or oil. Adjustable to temperatures from -30° to 300° C. Constant to ±0.25° C. With or without built-in refrigeration.

**CABINETS**
For incubation, proofing, conditioning, etc. High or low temperature control constant to ±0.025° C. Humidity control to suit requirements.

**THERMOREGULATORS**
Sensitive; rustproof. Mercury and bimetal types for air or liquid immersion. Hold baths constant to ±0.020° C. Adjustable from -30° to 300° C.

**SUPERSENSITIVE RELAYS**
A complete line of reliable types for controlling heater loads.

**LoLAG IMMERSION HEATERS**
Safe; inexpensive. Low lag; respond instantly to thermoregulator action. Lengths up to 13 ft. Easily bent to any shape to fit any vessel. Pipe fitting types for screwing into tanks, vats, etc. Copper, steel, stainless steel or monel sheaths. Ratings up to 6000 watts.

**MOTOR-STIRRERS**
Inexpensive, powerful, quiet and long-lived types for every stirring need.

**SERVICE**
Special constant temperature equipment designed and built to meet specific needs. A quarter century of experience is at your service.

AMEBA

**MICROSCOPE SLIDES**
Our slides of *Amoebo proteus* offer some rather unusual features. Each slide contains many Amoebe from three different batches, killed and fixed in three different ways. This results in a wide variety of shapes, including those with long, slender pseudopodia. Two staining methods were used, one for general structure and one for protoplasmic detail. We consider these the best Amoeba slides we've ever made and we think that you will like them. This slide is our catalog number Z1.11 and is priced at $1.25.

**PURE CULTURES**
Turtox fills orders for thousands of Amoeba cultures each year. We furnish the special large strain of *Amoebo proteus*, developed and cultured in our constant-temperature laboratory for its large size and excellent shipping qualities. The cultures we furnish are pure and rich; the Amoebae active and easily studied.

1V121 Amoeba, giant strain. Pure culture for class of 12 to 25 students .......... $2.50
1V12 Same, pure culture for class of 50 students ........................................... $3.50

Linde
RARE GASES AND MIXTURES

... highest purity
... for scientific purposes

Linde rare gases are of consistently high purity. They are used in the study of electrical discharges, in rectifying and stroboscopic devices, and in inert atmospheres where heat conduction must be reduced.

Linde rare gases are shipped in spherical glass bulbs, designed to facilitate removal without contamination. Special mixtures for experimental purposes can be supplied upon request.

VI-SIOGRAPH FILMROLS
FOR PHYSICS

Complete Set of Six
Visiograph Physics Filmrols

$12.00

Visiograph Filmrols are action-illustrations in sequence from a new authoritative text dealing with the theories, principles and applications of physics. Each Filmrol (non-inflammable motion picture film 35 mm wide) contains 26 to 35 illustrations and covers one or more important division of physics. The full set of six rolls embraces 175 illustrations covering a complete standard high school course in physics and is priced at only $12.00, or slightly less than 7 cents per picture. Each roll is accompanied by lecture manual and copy of text-book “Physics Made Easy” by Louis T. Masson. Descriptive literature listing contents of each roll will be sent on request or the complete set of 6 rolls will be gladly sent on 10-day approval plan to recognized institutions.

See our catalog, either No. 46 or 48 for complete listings of Physical Instruments, Apparatus and Supplies.

EPPLEY THERMOPILES
for RADIANT ENERGY MEASUREMENTS

A view of some of the apparatus used for calibrating thermopiles at the Eppley Laboratory, Inc.

Adequate manufacturing, testing and calibrating equipment in the hands of our skilled and experienced technicians insures satisfaction to the users of Eppley Thermopiles.

We are prepared to furnish thermopiles of either bismuth-silver or copper-constantan, mounted in vacuum or air type cases. We also furnish thermopiles and mountings especially designed to meet individual needs. A card will bring you our Bulletin R-3 which contains illustrations, sample curves, complete descriptive matter, prices, references, etc., with regard to Eppley Thermopiles.

Americans have the world's best bargain in telephone service. It's good and it's cheap. Nowhere else do people get so much service and such good and courteous service at such low cost.

**THRIFTY**

According to Webster, *thrifty* means "...Evincing thrift... Characterized by economy and good management... Serviceable; useful..."
EXPERIMENTAL WORK in the Purina Research Laboratories and the experience of many other laboratories shows that Purina Laboratory Chows provide sufficient nourishment, vitamins and minerals to maintain long life and vigor in stock and breeding colonies.

For example, at the Purina Experimental Rabbitry, it has been found that Purina Complete Rabbit Chow will keep does in excellent condition while kindling six litters and raising 30 to 35 young a year. Other experiments with rats and mice also show that Purina Laboratory Chows promote long life and vigor!

ABBE REFRACTOMETER

For determining the refractive indices and mean dispersions of liquid, plastic and solid substances.

The refractive index is read off a graduated sector without any calculation whatever. The mean dispersion of the substance under examination is calculated from readings furnished by the graduated drum of the compensator.

Range $\text{nD} = 1.3$ to $\text{nD} = 1.7$. Accurate to within about two units of the 4th decimal. With heatable prisms.

Complete in case with thermometer and dispersion table.

Prices and literature on request.
