THE ORIGIN OF LANGUAGE1
By Dr. E. L. THORNDIKE
PROFESSOR EMERITUS, TEACHERS COLLEGE, COLUMBIA UNIVERSITY

Nobody knows when, where or how speech originated, and I am stepping in where wise scholars in linguistics and psychology fear to tread. My colleagues in psychology will, I beg, permit this divagation into speculation by one who has labored long in the less exciting fields of experiment and statistics. I ask and expect no mercy from experts in linguistic science, but only that they build a better theory on the ruins they make of mine.

We must first glance at three time-honored and then dishonored theories, now known by these opprobrious names: ding-dong theory, bow-wow theory and pooh-pootheory.

The ding-dong theory assumed a mystical power of certain things to evoke certain sounds from men.

1 A lecture given on November 5, 1942, as one of the series of the William James lecturership at Harvard University.
