

Sphere of Influence in South Africa," illustrated with a map in colors; Professor Max Müller writes on "Some Lessons of Antiquity;" Mrs. Lynn Linton continues her series on "The Characteristics of English Women," and Mme. Blaze de Bury treats of "The Decadence of French Thought;" and J. D. Bouchier writes a timely paper on "The Heritage of the Hapsburgs." Other articles include "Australia in 1888," by the Earl of Carnarvon; "Obstruction and its Cure," by Sir G. Baden-Powell; and "The London Water-Supply," by Dr. Roose.

— A "History of West Virginia," from 1732 to the present time, has been written by Professor Virgil A. Lewis of Mason City, Mason County, W.Va. Only a limited number of copies will be published, and they will be sold by the author. "Professor Lewis," says the *Evening Post*, "has carefully examined all authentic rec-

ords of the State, the archives at Richmond, and those at county-seats, — in all, nearly one hundred. The first part of the book treats of the first permanent settlement in the Shenandoah valley, and comes down to the revolutionary war. Part second covers the ground between the Revolution and the civil war, and part third brings the narrative down to the present time."

— It is proposed to issue from time to time, in connection with the *Johns Hopkins University Studies in Historical and Political Science*, brief notes on current topics of interest. "Municipal Government in England," a report of an interview with Albert Shaw, Ph.D., was issued in January, 1889.

— *The Trained Nurse*, published from Buffalo, N.Y., suggests a new opening for professional nurses on board the large ocean-steamer, caring for seasick passengers.

### DRAGON'S TEETH.

Translated from the Portuguese by Mrs. MARY J. SERRANO. 12mo. \$1.50.

"Suggests the close detail, and even the nicety of touch, that distinguishes Daudet. It turns upon the temptation and unfaithfulness of a weak but loving woman. The plot is what we have learned to look upon as peculiarly French, and it is treated with French simplicity and frankness, without coarseness. It is a terrible presentation of the sure results of immorality. The slow retribution that follows the sin is remarkably depicted."—Nora Perry.

"A story of sin and its consequences powerfully set forth, and withal there is a great deal of humor in the story, a keen insight into the weaknesses of human nature that is delicious. It is wonderfully good. As a work of literary art, as a story, as a picture of life as it is lived under certain conditions, the book is a model."—Jeannette L. Gilder.

A Novel by the Author of "The Story of Margaret Kent."

### A DAUGHTER OF EVE.

1 vol., 12mo, \$1.50.

"Exceptional cleverness, effective satire, a great deal of humor."—Boston Advertiser.

"A story that for rare merit and interest will surpass even either of this author's former novels that have won such a place in the literary world."—Home Journal.

"Graciously winning as was 'The Story of Margaret Kent,' brilliant and moving as was the tale of 'Queen Money,' we are strongly inclined to say, after reading 'A Daughter of Eve,' that the author has attained to a still more gratifying artistic triumph than in the case of either of the other two novels we have mentioned. Brilliancy, sparkle and wit 'A Daughter of Eve' has in abundance, but it also has a definite ethical motive treated with inimitable taste."—Beacon.

Sold everywhere. Sent, postpaid, on receipt of price by the Publishers,

TICKNOR & CO., Boston.

STOCK, St. G. Deductive Logic. London and New York, Longmans, Green, & Co. 356 p. 16°. \$1.25.

THORPE, F. N. The Government of the People of the United States. Philadelphia, Eldredge & Brother. 308 p. 12°. 90 cents.

## Just Published!

# PRIMER OF SCIENTIFIC KNOWLEDGE.

Man, Animals, Plants, Stones, The Three States

of Bodies, Reading Lessons, Summaries,

Questions, Subjects for Composition.

BY PAUL BERT,

Author of "Berl's First Steps in Scientific Knowledge."

TRANSLATED AND ADAPTED FOR AMERICAN SCHOOLS.

Illustrated 12mo, cloth, 36 cents.

This new work is carried out in the same spirit as "First Steps in Scientific Knowledge," and follows the same plan. The book is so arranged that the larger work becomes a review and extension of the subject. The method, which consists in presenting to the child during two or three consecutive years the same subjects, in the same order, following the same general arrangement, but with an increasing number of facts and a progressive elevation of ideas, is an excellent one, and is now universally adopted.

The reductions have naturally been largely in Physics, Chemistry, and Vegetable and Animal Physiology. Yet, a somewhat fuller development has been given to the descriptive part of Natural History, and to applications easy to comprehend. These two works, then, depend upon each other. They form a coherent whole. The first prepares for the second, the second completes the first; at the same time each has its individuality, and can be used without the other.

In the present translation only such changes and additions have been made as were necessary to Americanize the book and adapt it to the requirements of public and private schools in this country.

The illustrations are for the most part entirely new. Those upon Natural History were drawn from life by some of our best artists.

Sent post-paid on receipt of price.
