The American Garden of New York has taken another step forward by the incorporation of its business under the title of "The Garden Publishing Company, Limited." The management goes on largely in the same hands, but with the more intimate connection of several able men, who really have had much to do in making The American Garden what it has become; and, with increased means, the editor expects to more rapidly improve the magazine and increase the business in proper lines. The organization of the new company stands as follows: Dawson Valentine, president; Charles Barnard, vice-president; L. H. Bailey; John DeWolfe, secretary; Edgar H. Libby, treasurer. Mr. Valentine is also president of the Christian Union Company; a prominent member of the great publishing-house of Houghton, Mifflin, & Co., owner of Houghton Farm; and president of the Dawson Valentine Company, makers of fine varnishes. Mr. Barnard is connected with The Century Company, author of that wonderful success, "The County Fair," author of numerous successful books on technical subjects, and a practical horticulturist at West Well. Professor Bailey is head of the new horticultural department at Cornell University, and a thoroughly practical man of wide experience. Mr. DeWolfe is a professional landscape-gardener, for several years head of the art department and assistant editor of The American Garden. Mr. Libby has been the editor and publisher for four years and a half, and has pushed the business with hard work and exceptional skill.

The editorial management of the North American Review is at present in the hands of Mr. William H. Rideing.

Macmillan & Co. will publish shortly an appendix to Grove's "Dictionary of Music and Musicians," which completes the fourth and concluding volume of the work. A full index to the work is in preparation, which will be published later in a separate volume.

**IN PRESS FOR EARLY PUBLICATION.**

**GEOLOGY AT A GLANCE.**

Ives Strata Map of the United States, in which the Architecture of the Earth's Crust is Graphically Exhibited, Illustrating Fundamental Facts alike of STRUCUTRAL GEOLOGY AND PHYSICAL GEOGRAPHY.

The Strata Map is a device for the more efficient teaching of Physical Geography and Elementary Geology in schools. It consists of a series of Superimposed Maps, of different colors, representing the several geological formations of the district, enclosed in a frame, the whole hinged to admit of examination in detail. By its means superposition, denudation, and outcrops of strata are graphically exhibited, with the phenomena of synclines, anticlines, fault lines, and the Cards may be kept to show special strata or fossil finds.

**OPINIONS OF EMINENT GEOLOGISTS.**

Yale University. **Professor James D. Dana.**

"Well fitted for the use of instruction in the sciences."

Harvard University. **Professor Addison E. Virgil.**

"It will be of very great advantage in the teaching of geology."

John Hopkins University. **President D. C. Gilman.**

"Wherever American geology is taught your map should be a part of the curricula."

Pennsylvania University. **Professor Geo. A. Koenig.**

"The map will be of especial use in schools, which can only devote a short time to the study of geology."

Michigan University. **Professor Alexander Mitchell.**

"It seems to me that the device will commend the study of Geology to many persons who might otherwise regard the subject as difficult and uninteresting."

Cornell University. **Professor H. Shaler Williams.**

"I have no doubt that the ideas contained in teaching geology, giving as it does to the student a clear idea of the superposition of the different geological systems at a glance."

Columbia College, New York. **Professor J. S. Newberry.**

"A valuable aid to teachers of geology as a means of graphically representing the grand facts of stratigraphy in the Eastern States."

Dartmouth College, Hanover, N. H. **Professor C. H. Hitchcock.**

"A scheme of course and useful apparatus for teaching geology, by representing to the eye the student the areas of superimposed formations. I cordially recommend it to teachers and students."

New Jersey State Survey. **Professor Geo. H. Cook.**

"It is very neatly done and must prove a great help to intelligent teaching and study of geological science."
