CATARRH.

Catarhal Deaeness—Hay Fever. A NEW HOME TREATMENT.

Sufferers are not generally aware that these diseases are contagious, or that they are due to the presence of living parasites in the lining membrane of the nose and eustachian tubes. Microscopic research, however, has proved this to be a fact, and the result of this discovery is that a simple remedy has been formulated wherein catarhal deaeness and hay fever are permanently cured in one to three simple applications made at home by the patient once in two weeks.

N.B.—This treatment is not a snuff or an ointment; both have been discarded by reputable physicians as injurious. A pamphlet explaining this new treatment is sent free on receipt of stamp to pay postage, by A. H. Dixon & Son, 337 and 339 West King Street, Toronto, Canada.—Christian Advocate.

Sufferers from Catarhal troubles should carefully read the above.

JOHNS HOPKINS UNIVERSITY,
Baltimore.

Announcements for the next academic year are now ready and will be sent on application.

MICHIGAN, Houghton.

Michigan Mining School.

A State School of Surveying, Mining, Electro
cal and Mechanical Engineering, Physics, Chemis
try, Assaying, Ore Dressing, Metallurgy, Petro
graphy, Geology, Drafting, Machine Design, etc.

Tuition free. For catalogues and information ad

A New Method of Treating Disease.

HOSPITAL REMEDIES.

What are they? There is a new departure in the treatment of disease. It consists in the collection of the specifics used by noted specialists of Europe and America, and bringing them within the reach of all. For instance, the treatment pursued by special physicians who treat indigestion, stomach and liver troubles only, was obtained and prepared. The treatment of other physicians celebrated for curing catarh was procured, and so on till these incomparable cures now include disease of the lungs, kidneys female weakness, rheumatism and nervous de
bility.

This new method of “one remedy for one disease” must appeal to the common sense of all sufferers, many of whom have experienced the ill effects, and thoroughly realize the absurdity of the claims of Patent Medicines which are guaranteed to cure every ill out of a single bottle, and the use of which, as statistics prove, has ruined more stomachs than alcohol. A cir
cular describing these new remedies is sent free on receipt of stamp to pay postage by Hospital Remedy Company, Toronto, Canada, sole pro
prieto.

IMPROVED OIL LIGHT

MAGIC LANTERN.

Alco Lume and Electric Light Apparatus, and mechanical, plain, and fine colored views.

J. B. COLT & CO., Manufacturers,
No 16 BRECKMAN STREET, NEW YORK.
DO YOU INTEND TO BUILD?

We offer an Atlas of Sensible Low Cost Houses, a portfolio 112x14 inches, containing handsome illustrations, floor plans, and full descriptions of houses in the $500, $1,000, and $2,000 ranges, ranging from $200 to $7,000. This splendid design is for a cottage with seven rooms and costing $1,100. It combines beauty and comfort, has a large porch and garret, and is a practical and well designed house having built several times for its estimated cost.

In this style of house you may intend to build, it will pay you to have this book.

W.

OF WHAT USE IS THAT PLANT?

You can find the answer in

SMITH'S "DICTIONARY OF

ECONOMIC PLANTS."

Sent postpaid on receipt of $3.50. Publisher's price, $3.00.

SCIENCE BOOK AGENCY,

47 Lafayette Place, New York.

RUPTURE
cured in stipulated time.

NO DELAY FROM WORK. NO OPERATION.

Call or send money for circular and reference of those cured. We have on hand over 300 styles of trusses, from $1 up, and suspensions of all kinds. Orders filled by mail or express to any part of the United States.

Fact and Theory Papers

THE SUPPRESSION OF CONSUMPTION.

By Godfrey W. Hamilton, M.D. 190. 40c.

"The insistent and important subject of the eminence of the author and the novelty of his work combine to render it a treatise worthy of special consideration. We heartily commend Mr. Hamilton's booklet and wish there were more such works."—Editorial, Boston Daily Advertiser.

The monograph is interesting in style, scholarly, and well worthy of careful consideration. It is void of technical expressions, and can be easily read and digested.—P. Mencken, Jr.

"It is full of facts and wisdom."—Philadelphia Saturday Evening Post.

"The book contains much of importance to the medical fraternity, as well as the general populace."—Burlington Evening.

We commend our book to physicians and laymen.—Herold (German), Milwaukee.

THE SOCIETY AND THE "FAD."

By Appleton Morgan, Esq. 190. 20 cents.

"Mr. Morgan succeeds in the difficult and interesting task of addressing upon a text furnished by a sentence from a learned author: 'A thing always a thing always.' These are the only really dramatic authors of their generation."—A. C. L., Boston Daily. In the little book before us the treatment of the subject is clear, comprehensive and logical. The comparison drawn throughout is between Shakespeare and Browning, the subject matter being largely based on the English and Shakespearean societies and how they came to exist. A pleasant half-hour or more is spent over the book and some useful information derived from it.—English Times.

PROTOMAT AND LIFE.

By C. F. Cox. 120. 75 cents.

The author of this book was for some years president of the New York Microscopical Society, and in this volume he sets forth his views on the spontaneous generation theory and its relation to the general theory of evolution, and on protomata and the cell doctrine.

Ready at an early date.

THE CHEROKEES IN PRE-COLUMBIAN TIMES.

By Cyrus Thomas. 120. $1.

Dr. Thomas in this work will reverse the usual method of dealing with prehistoric subjects; that is, to say, he will commence with the earliest recorded history of the tribe and trace the chain of events by step by step by the light of the mounds, traditions, and other evidences, so far as possible. He has already presented to the public some reasons for believing the Cherokee mound-builders, but additional evidence bearing on the subject has been obtained. A more general study of the Dakota tradition respecting the Tallapoosa satisfies him that we have in the Black Mound (Wakan Ounc) itself proof that they were Cherokee. He thinks the mounds enable us to follow their line of racial migration even beyond their residence in Ohio to the western bank of the Mississippi. The object is therefore threefold: 1. An illustration of the reverse method of dealing with prehistoric subjects; 2. Incidental proof that some of the Indians were mound-builders; 3. A study of a single tribe to the light of the mound testimony. This work will be an important contribution to the literature of the Columbus discovery which will doubtless appear during the coming two years.

THE TORNADO.

By H. A. Bixenman, 120. $1.

Professor Hasen is one of the prominent meteorologists connected with the United States Signal Office. In this work he reviews his present information as to tornados, severely criticizing some of the opinions held in regard to them up to this time. No one has given a more careful study to these destructive storms than Professor Hasen, and his book will prove a decided contribution to the knowledge of the subject. In this book will be found a careful discussion of the important question of tornadoes insurance. So much attention. Hundreds of dollars may be saved by people in tornado insurance by following the principles here laid down.

In Preparation.

Foods and Food Adulterants.

By Edgar Richards, Ex-president National Chemical Society.
