Much yet remains to be learned on the subject of which it treats; but that which is already known, or at least the essential or available part of it, is lucidly presented.

The author takes up the subject of alloys where ordinary metallurgical treatises finish with it, and goes on into the practical side of it, including the various uses to which the alloys are put. He also gives a brief account of the properties of the separate metals, and of the effects of certain elements upon them. "Copper and commercial metals are not chemically pure; and as the presence of impurities often produces characteristic results, which may be a useful guide, this part of the book will have a special value to manufacturers. A short account of chemical terms and principles is given for persons not familiar with chemical processes.

AMONG THE PUBLISHERS.

The American Academy of Political and Social Science has just issued the fourth number of its Annals. The volume just issued deals with the "Genesis of a Written Constitution," by Professor Morey of Rochester; "Natural Law," by Professor Taylor of Michigan; "Compulsory Voting," by Mr. W. Holis of New York; and "The Wealth Concept," by Professor Tuttle of Amherst. Another article treats of economic instruction in Italy, and gives an account of the university system. The proceedings contain a discussion of the Original Package decision by Messrs. Burdick and Wintzestein of the Philadelphia bar. In addition to the annals, the American Academy of Political and Social Science issues from time to time supplementary volumes of interest to students of economics and politics. The first of these, the "History of Statistics," by Professor August Metzlen of Berlin, has just appeared.

Heinemann of London announces a new volume dealing with the much-discussed Marie Bashkirtseff, entitled "The Social Life of Marie Bashkirtseff, being Extracts from her Letters and Journals, illustrated with Drawings and Studies."

**Dyspepsia**

Horsford's Acid Phosphate.

In dyspepsia the stomach fails to assimilate the food. The Acid Phosphate assists the weakened stomach, making the process of digestion natural and easy.

Dr. R. S. McCooms, Philadelphia, says: "Used it in nervous dyspepsia, with success."

Dr. W. S. Leonard, Hinsdale, N. H., says: "The best remedy for dyspepsia that ever came under my notice."

Dr. T. H. Andrews, Jefferson Medical College, Philadelphia, says: "A wonderful remedy which gave me most gratifying results in the worst forms of dyspepsia."

Descriptive pamphlet free.

Rumford Chemical Works, Providence, R. I.

Beware of Substitutes and Imitations.

CAUTION.—Be sure the word "Horsford's" is printed on the label. All others are spurious. Never sold in bulk.

**DO YOU INTEND TO BUILD?**

The "Atlas of Sensible Low Cost Houses, with Supplement" (sent postpaid on receipt of $2) will aid you, no matter what style of house you may intend to build.

N. D. C. HODGES,

47 Lafayette Place, New York.
NEW BOOKS.
JUST PUBLISHED.
THE AMERICAN RACE:
By Daniel G. Brinton, M.D.
A Linguistic Classification and Ethnographic Description of the Native Tribes of North and South America. The first attempt ever made to classify all the Indian tribes by their languages, and it also treats of their customs, discoveries, physical traits, arts, antiquities, and traditions. The work comprises the results of several years of study in this special field.
Price, postpaid, $2.

BY THE SAME AUTHOR.
RACES AND PEOPLES.
"The book is much, thoroughly good, and will long remain the best accessible ethnological work in our language."—The Christian Union.
"We strongly recommend Dr. Brinton's 'Races and Peoples' to both beginners and scholars. We are not aware of any other recent work on the science of races of which a like universal favor can be recorded."—Artistic Quarterly.

Dr. Brinton's book is an excellent one, and we can heartily recommend it as an introductory manual of ethnology and geography.

A useful and really interesting work, which deserves to be widely read and studied both in Europe and America."—Brighton (Eng.) Herald.

"This volume is stated to contain in it, written with great clearness, so that anybody can understand, and while in some ways superficial, its grasp on the whole field of human history is not in the least impaired by its superficiality."—New York Times.

"Dr. Brinton invests his scientific illustrations and measurements with an indescribable charm of narration, so that 'Races and Peoples,' accorded a record of discovered facts, is in reality a strong stimulant to the imagination."—Philadelphia Public Ledger.

"The work is indispensable to the student who desires any accurate and comprehensive course of ethnographic reading."—Philadelphia Times.

Price, postpaid, $1.50.

THE MODERN MALADY; OR, SUFFERERS FROM 'NERVES.'
An introduction to public consideration, from a non-medical point of view, of a condition of ill-health which is increasingly prevalent in all ranks of society. In the first part of this work the author dwells on the errors in our mode of treating neuroses, consequent on the wide ignorance of the subject which still prevails; in the second part, attention is drawn to the principal causes of the malady. The only remedy forming the Introduction to Part I., gives a brief history of nervous exhaustion and the modes of treatment which have been proposed to the present time, thus thought suitable to this most painful and trying disease.
By CYRIL BENNETT.

THE WINNIPEG COUNTRY; OR, ROUGHING IT WITH AN ECLIPSE PARTY.
By A. ROCHESTER FELLOW.
(ROBERT F. GODDARD.)
With thirty-two Illustrations and a Map.

"The story is a poignant, good-humored, entertaining narrative of a canoe voyage. A nature lover book seldom read, it is a humorous and true narrative of personal incident. The book will be remembered as a pleasant reminder to many who have enjoyed the sport, and as a list of real fun which is rapidly rounding."—Boston Transcript.

"A few miles cross-country with western territo- tory twenty-five years ago, in contrast to its pleasant aspect today, and the pleasant facets of the writer's style, constitute the claims of his little book to present attention."—The Dial.

N. D. C. HODGES, 47 Lafayette Place, New York.

FACT AND THEORY PAPERS.

I. THE SUPPRESSION OF CONSUMPTION. By Godfrey W. Hamilton, M.D., F.R.C.S. This is the latest of the series of essays which have been contributed to SCIENCE. The three in chief importance, the author's estimations of the present and future are strikingly presented. All combine to render the little treatise worthy of special consideration. This essay, in paper, price, $1.00.

II. THE SOCIETY AND THE 'fad.' By Appleton Morgan, B.S. 10 cents.

III. PROTOPLASM AND LIFE. By C. F. D. Allen. 10 cents.

IV. THE CHEROKEE IN PRE-COLUMBIAN TIMES. By Cyrus Thomas. 10 cents.

V. THE TORNADO. By H. A. Hazen. 10 cents.

VI. TIME-RELATIONS OF MENTAL PHENOMENA. By Joseph Jastrow. 10 cents.

VII. HOUSEHOLD HYGIENE. By Mary Taylor Bisbee. 5 cents.

VIII. THE FIRST YEAR OF CHILDHOOD. By M. B. Maloney.

TWO NEW VOLUMES OF THE JOURNAL OF MICROSCOPICAL AND NATURAL SCIENCE.

The JOURNAL OF THE POSTAL MICROSCOPICAL AND WESLEY NATURALISTS' SOCIETIES.

Edited by Alfred Allen and Rev. William Spiers.

CONTENTS OF APRIL NUMBER:

Notes on the Anatomy of the Climacidea-Sex-guttata.
Infusoria, Protozoa, etc.—Practical Methods of Preparation.
Bird's Nest and Plants on Telegraph Lines.
Analysis of the Heavens—April, 1901.
A Protest against Indiscriminate Collecting.
Color Photography.
Mason's Improved Oxy-hydrogen Lantern and Table Microscope.
Science Jottings.
Cot.I., the Holy Land.
Cuba breaking in Two.
Crafting Human Skin.
Limit of Magnification for Photo-Micrography.
Death of Dr. Brady, F.R.S.
Condenser for the Microscope.
Dormant Buds in Woody Dickyledons.
Examination of Infusoria.
Examination of Drinking Water.
The Annihilation of Smoke.
Ballot Cleaning.
Cure for Lock-Jaw.
Collectors' Notes for April.
Correspondence.
Parasite in Vaucorbia.
Local Societies.
Reviews.

$1.75 PER YEAR.
To Science subscribers, $1.00 for one year.
50 cents for six months.

PSYCHE.
A Journal of Entomology, published monthly by the Cambridge Entomological Club, $2.00 per year, $5.00 per year, volumes of three years, $1.00, and in 1891, $1.50, are still available. The back volumes for sale at $5.00 each. Volume I., 1891, complete.

N. D. C. HODGES, General Agent for the United States and Canada.

READY SOON.
THE LABRADOR COAST:
A Journal of two Summer Cruises to that region: with notes on its early discovery, on the Belem, on its physical geography, geology and natural history, together with a bibliography of charts, works and articles relating to the civil and natural history of the Labrador Peninsula.
By Alfred Spencer Packard, M.D., Ph.D.
8°, about 400 pp., 50 cents.

FOSSIL RESINS.
By CLARENCE LOWN AND HENRY BOOTH.
This book is the result of an attempt to collect the scattered notices of fossil resins, exclusive of those on amber. The work is of interest also on accounts of descriptions given of the insects found embedded in these long-preserved exudations from early vegetation.
