would involve the question of a great Pacific atmospheric whirl, comparable to the supposed general movement during winter about the area of low pressure in the northern Atlantic. It would also involve a comparison of our weather here when we are in the Atlantic whirl with that which comes when the Pacific circulation pushes eastward over the mountains. There are numerous other questions involved in these observations, but they are postponed.

Colorado Springs, Col., June 15.

Consecutive Lightning Flashes.

About 5.45 P.M. yesterday, while travelling over the "Jersey flats" on the Delaware, Lackawanna, and Western Railroad, I saw toward the south-west no less than six strokes of lightning following the same path — a nearly vertical one — in quick succession. The number of flashes has been great from this morning, and it is interesting to add that this morning's papers report great damage by lightning in Elizabeth, N.J., in the direction of the observed flashes.

New York, June 17.

Mocking-Birds and their Young.

As educated Southern lady made to me the following statement, which seems too extraordinary to be true. My informant honestly considers it a fact. Is it true, or is she deluded by some accident? I leave the matter for those learned in the lore of birds to decide.

My friend says that while living in Mississippi, she frequently took young mocking-birds from a nest near the house, and placed them in a cage hanging on the verandah. The parent birds came, not to feed the young, but to endeavor to liberate them, by plucking at the cage. Failing in this, my friend says that they invariably brought to their imprisoned young bitter-sweet berries, which poisoned them, the birdlings only living a very short time after receiving the berries. She further said that the captives would do well as long as the parent birds were kept from the cage, but if by any inadvertence the cage was left on the verandah while the family went into the house, on returning they would find the bitter-sweet berries in the cage, and the little fledglings in a dying state. My informant further declared that this had occurred again and again within her experience, and that her grandfather gave strict orders that no mocking-birds should be captured, as their death would certainly be effected by the old birds. This is a strange story of bird-ways, that birds should be capable of choosing for their progeny death rather than captivity! I wish some of the Southern readers of SCIENCE would observe in the mocking-bird direction, and give us positive and recent information from careful experiment.

JULIA McNAIR-WIGHT.

Fulton, Mo., June 16.

Thunder-Storms.

It has been noticed in connection with thunder-storms in this vicinity this season that in every instance there has been an outflow of air in every direction from the storm, extending even beyond the range of protection detailed above. For example, in the case of a storm appearing upon the south-western horizon and moving due east, and passing then three or four miles south of this village, the weather-vane pointed directly toward it continuously, veering slowly from south-west to south-east, showing that the wind came steadily from the storm. The same thing also occurred in the case of a storm which appeared upon the north-western horizon and moved eastward, passing three or four miles north of the village. In this case the vane pointed directly toward the storm throughout, the winds being quite brisk. In other instances in which the storm passed directly over the village the same thing was manifested, the vane shifting sharply from west to east as the storms passed. In previous years I have noticed the puff of wind in front of an advancing thunder-storm moving in the same direction as the storm itself and occurring just before the rain begins to fall, but my attention has never been called to such an outflow of air in every direction as has been apparent in connection with thunder-storms recently. Whatever may be its explanation, it certainly is entirely inconsistent with the idea of an induced and upward movement at the centre of the storms in which it occurs.

BOOK-REVIEWS.

The Modalist, or the Laws of Rational Conviction. By EDWARD JOHN HAMILTON. Boston, Ginn. 8°. $1.40.

The author of this work claims to have perfected the science of logic. He says in his introductory chapter: "The treatise now offered to the public is the result of long-continued studies which have had for their object to place the doctrines of logic on satisfactory foundations; and it would be false humility were the author to conceal his assurance that these studies have been successful. He claims to have completed a work which Aristotle left unfinished."

And again he says, speaking of himself: "He knows what he has been enabled to do; he is certain that he has found the truth on every important point" (pp. 1 and 3).

When we come to examine the improvements that Mr. Hamilton claims to have made in the science, we find that they consist mainly in the introduction of modal syllogisms, that is, syllogisms in which the conclusion is expressed in terms of possibility, probability, or contingency, as distinguished from the ordinary, or pure, syllogism, in which the conclusion is categorical. Such syllogisms were treated of by Aristotle, but modern logicians have rejected them as not properly belonging to the science, since possibility, probability, etc., belong, not to the form of thought, but to its matter. They are properties, not of our thought, but of the facts and events that we think about, and therefore have no proper place in a work on theoretical logic. Mr. Hamilton, however, gives such modal syllogisms the foremost place among the forms of reasoning, affirming that "the pure syllogism is the secondary mode of thought, and should be interpreted by the modal." Yet he immediately adds that the pure syllogism "is the best expression of our ordinary reasonings" (p. 283), an admission which is fatal to his whole theory.

Another of Mr. Hamilton's innovations consists in treating the principle of antecedent and consequent, which lies at the basis of the hypothetical syllogism, as the first principle of all reasoning, even in the ordinary syllogism. Such a turning of logic tosypturvy as Mr. Hamilton proposes seems to us the reverse of an improvement, and we believe it will be so regarded by thinkers generally.

AMONG THE PUBLISHERS.

An illustrated article by Edwin Checkley, which introduces some of his new theories of physical culture, forms one of the features of the July Lippincott.

— Among its contents the Chautauquan for July has the following: "A Symposium — Where Should a College be Located?" by Julius H. Seelye, Henry Wade Rogers, James B. Angell, Hjalmar Hjorth Boyesen, W. R. Harper, and Herbert B. Adams; "Modern Methods of Treating Inebriety," by H. E. Chamberlain; "Objections to College Training for Girls," by Emily F. Wheeler; and "Elizabeth Thompson, the Philanthropist," by Frances E. Willard.

— The publishers of the Illustrated American of this city announce a Monthly Illustrated American. The monthly has been planned for over a year, and is offered to the public as "the cheapest and best illustrated magazine in the world." It is com-
posed of the magazine element of the weekly. Although the pictures will be, in the main, those employed in the weekly several months ago, this will be new and attractive reading matter. If, in fact, it was not for this use of the plates the monthly would be an impossibility, the cost of making it being so great. The expense of publishing a weekly magazine of the character of the Illustrated Americana is so heavy that its price must necessarily be higher than the long-established weeklies. This price is the means of deterring thousands from purchasing it, and in order to give people of small means a magazine at a nominal price it has been decided to issue the monthly at one dollar a year. Those who do not know the Illustrated Americana should ask for it the next time they pass a news-stand.

— G. P. Putnam’s Sons have in press “The Living World: Whence it Came, and Whither it is Drifting,” a review of the speculations concerning the origin and significance of life, of the facts known in regard to its development, and suggestions as to the direction in which the development is now tending, by H. C. Woodhead, professor of biology in Wesleyan University.

— A. E. Seaton, who is connected with Earle’s Shipping Company of Hull, England, will contribute to Scribner’s steamship series an article on “Speed in Ocean Steamers,” to appear in the July number. Commenting on the probability of “five-day steamers” on the Atlantic the author says: “It is always a question of cost, and when it is taken into consideration that the voyage between Sandy Hook and Queenstown is now done in 140 hours, and to do the distance in five days would require a speed of nearly 93 knots, with an increase in expenditure of sixty-two per cent, and in fuel consumption of thirty-eight per cent, the cry must be regarded as a very far one at present. At the same time it is not desirable to believe that there is now finality in the speed of steamships, although by analogy with railway trains that conclusion might be arrived at.”

Macmillan & Co. have nearly ready for publication “A History of Human Marriage,” by Dr. Edward Westermarck, lecturer on sociology at the University of Finland, Helsingfors. In an introductory note the work is commended to the attention of students by Dr. A. R. Wallace, who expresses a high opinion of the learning and insight displayed by the author. Dr. Westermarck differs widely in many respects from the opinions hitherto held by most anthropologists as to the development of the various forms of marriage.

— S. E. Cassino, 196 Summer Street, Boston, announces that the next edition of the “International Scientists’ Directory” will be issued in the first half of 1892, two years from the date of publication of the former one. It is hoped that the number of permanent entries in the new edition will be nearly double the number of addresses given formerly, and the editor will be greatly pleased to receive any names which should be included. The foreign portion will be much more complete than formerly.

Scribner, 448 p. $3.15.

**A SYSTEM OF EASY LETTERING.**

*By J. H. CHOWNEW, Ph.B.*

Twenty six different forms of Alphabets. The space to be lettered is divided into squares, and with these as guides the letters are drawn and painted. Price, 50 cents, postpaid.

E. & F. N. SPON, 12 Cortland Street, New York.

**OF WHAT USE IS THAT PLANT?**

You can find the answer in **SMITH’S "DICTIONARY OF ECONOMIC PLANTS."**

Sent postpaid on receipt of $2.50. Publisher’s price, $3.50.

**SCIENCE BOOK AGENCY, 47 Lafayette Place, New York.**

Manuscripts prepared for printers.

Proof-reading, revising, and all work preparatory to printing.

Short-hand dictation accurately taken.

Type-writing correctly, neatly, and tastefully executed—by one specially trained in the work, and who has had a long practical experience in all kinds of book-work.

Scientific Work a Specialty. Correspondence solicited.

Reference: Editor of Science.

H. A. ANDREWES, care "Science."

47 Lafayette Place, New York.

**BOOKS: How to Exchange them for others.** Send a postal to the Science exchange committee stating briefly what you want to exchange. Science, 47 Lafayette Place, New York.

**THE WEEK, A Canadian Journal of Politics, Literature, Science and Art.**

PUBLISHED EVERY FRIDAY.

$3.00 per year.

$1.00 for Four Months.

The Week has entered on its eightieth year of publication, greatly improved in every respect, rendering it more worthy the cordial support of every one interested in the maintenance of a first-class literary journal. The independence in politics and criticism which has characterized THE WEEK ever since its first issue will be strictly maintained: and unsoliciting efforts will be made to improve its literary character and increase its attractiveness as a journal for the cultured home. Many new and able writers are now contributing to its columns, and the constant aim of the Publisher is to make THE WEEK fully equal to the best literary journals in Britain and the United States. The Publishers hope that THE WEEK will continue to secure columns of the highest character. Special Original Articles will appear during the sessions of Parliament. THE WEEK, as is usual, is sent by parcel post, and is the largest paper of its class on the continent.

SEND FOR FREE SAMPLE COPY.

C. BLACKETT ROBINSON, Publisher, 5 Jordan St., Toronto, Canada.

**THE AMERICAN GEOLOGIST FOR 1891.**

AND BIENTH NEW ATLAS OF THE METROPOLITAN DISTRICT, will be given to new subscribers to the **AMERICAN GEOLOGIST** for the year (in the regular price of the atlas alone), if ordered through the GEOLOGY.

For other premiums see the GEOLOGY for Nov., Dec., and Jan. Address THE GEOLOGICAL PUBLISHING COMPANY, Minneapolis, Minn.

**THE BOTANICAL GAZETTE.**

A monthly illustrated journal of botany in all its departments.

25 cents a number, $2.50 a year.

Address, PUBLISHERS BOTANICAL GAZETTE, Crawfordsville, Ind.

**Publications of the University of Pennsylvania. SERIES IN PHILOLOGY, LITERATURE AND ARCHAEOLOGY.**

Vol. 1. now ready.

1. Poets and Their Critics of the Reign of Elizabeth. By Felix D. Schelling, A.M., Assistant Professor of English Literature. $1.00.

4. The Gambling Games of the Chineses in America. By Frederick Culin, Assistant Professor of Geology. 25 cents.

Archaeological Notes to Northern Morocco. By Talbot Williams, A.M., Secretary of the Museum of Egyptian Antiquities.

A Hebrew Bible Inscription. By Morris Jastrow, Jr., Ph.D., Professor of Arabic. 25 cents.

The Life and Writings of George Gascoigne. By Felix H. Schelling, A.M., Assistant Professor of English Literature. 25 cents.

The Papers of this Series, prepared by Professors (who with the exception of the last three are connected with the University of Pennsylvania), will take the form of Monographs on the subjects of Philology, Literature, and Archaeology, whereof about 200 or 200 pages will form a volume. The price is to subscribers, $2.50 per volume; to others, $2.00 per volume.

Each Monograph, however, is complete in itself, and will be sold separately. If the intention of the University to issue these Monographs from time to time is realized, this series will be one of the most important in the world.

Each author assumes the responsibility of his own contributions.

N. D. C. HODGES, 47 Lafayette Place, New York, N. Y.

**BOOKS: How to get them.** If there is any book or pamphlet that you want, write to the Science Book Agency, 47 Lafayette Place, New York.
Exhaustion

Horsford's Acid Phosphate.

The phosphates of the system are consumed with every effort, and exhaustion usually indicates a lack of supply. The Acid Phosphate supplies the phosphates, thereby relieving exhaustion, and increasing the capacity for labor. Pleasant to the taste.

Dr. A. N. Kroul, Van Wert, O., says:

"Decidedly beneficial in nervous exhaustion."

Dr. S. T. Newman, St. Louis, Mo., says:

"A remedy of great service in many forms of exhaustion."

Descriptive pamphlet free.

Horsford Chemical Works, Providence, R. I.

Beware of Substitutes and Imitations.

CAUTION.—Be sure the word "Horsford" is printed on the label. All others are spurious. Never sold in bulk.

POPULAR MANUAL OF VISIBLE SPEECH AND VOCAL PHYSIOLOGY.

For use in Colleges and Normal Schools. Price 30 cents

Sent free by post to

PRIZE ESSAYS OF THE AMERICAN PUBLIC HEALTH ASSOCIATION.

Practical Sanitary and Economic Cooking Adapted to Persons of Moderate and Small Means. By Mrs. Mary Hinman Abel. 12mo, 182 pp. Cloth, 30 cents.

The four essays (Nos. 1, 2, 3, 4) in one volume of nearly two hundred large octavo pages, thoroughly indexed. Cloth, 50 cents.

N. D. C. HODGES, 47 Lafayette Place, New York.

Speech Reading and Articulation Teaching.

By A. MELVILLE BELL.

Price, 25 Cents.

Practical Instructions in the Art of Reading Speech from the Mouth; and in the Art of Teaching Articulation to the Deaf.

[This Work—written at the suggestion of Miss Sarah Fuller, Principal of the Horace Mann School in Boston, for the Deaf, Boston, Mass.—is as far as known, the first Treatise published on "Speech Reading."]

From Principals of Institutions for the Deaf:

"Admirable in its completeness, clearness and freedom from technicalities."

"The simplicity and perfection of this little book."

"Full of exact and helpful observations."

"A very interesting and valuable work."

"The rules are clearly given and will be of great utility."

"Every articulation teacher should study it."

"A model of clearness and simplicity, without having any of the puzzling symbols that trouble the common mind."

"The exercises given in speech-reading from the lips are especially interesting, and of great importance for the student of phonetics."

"Modern Language Notes."

"*" The above work may be obtained, by order, through any bookseller, or post-free on receipt of price, from

N. D. C. HODGES, 47 Lafayette Place, New York.

AMERICAN HERO-MYTHS.

A Study in the Native Religions of the Western Continent.

By D. G. Brainerd, M.D. 8°. $1.75.

THE CRADLE OF THE SEMITES.

N. D. C. HODGES, 47 Lafayette Pl., New York.

DO YOU INTEND TO BUILD?

If you intend to build, it will be a mistake not to send for *SENSIBLE LOW-COST HOUSES,* now all in perspective views, in three volumes. In them you will find perspective views, floor plans, descriptions, and estimates of cost for 103 tasteful, new designs for houses. They give prices for complete Working Plans, details, specifications which enable you to build without delays, mistakes or quarrels with your builder, and which any one can understand. Vol. I. contains 30 copyrighted designs of houses, costing between $500 and $1,000. Vol. II. contains 32 copyrighted designs, $500 to $1,500. Vol. III. contains 26 copyrighted designs, $200 to $500. By mail, $1.00 each, or $3.00 for the set.

For "GRACIOUS HOUSES," a volume showing Perspectives and Floor Plans of houses arranged in the inimitable style of the Colonial Architecture, and having all modern arrangements handy for comfort. Price, $2.00.

*PICTURESQUE HOUSES FOR FOREST AND SHORE!*—This shows Perspective and Floor Plans of new designs for summer cottages, which are romantic, convenient, and cheap. Price, $1.00, by mail.

BY THE SAME AUTHOR.

RACES AND PEOPLES.

The book is good, thoroughly good, and will long remain the best accessible elementary ethnography to our language. —The Christian Union.

We strongly recommend Dr. Brinton's "Races and Popuas" to both beginners and scholars. We are not aware of any other recent work on the science of which this treatise is a true "introduction." —Atlantic Quarterly.

His book is an excellent one, and we heartily recommend it as an introductory manual of ethnology. —The New York Times.

Dr. Brinton presents his scientific investigations and measurements with an indubitable charm of narrative technique. Thomas Jefferson, written a score of years after the discovery of facts is in reality a strong stimulus to imagination. —The Philadelphia Public Ledger.

The work is indispensable to the student who requires an intelligent guide to a course of ethnographic reading. —The Philadelphia Inquirer.

Price, postpaid, $1.75.

THE MODERN MALADY; OR, Sufferers from 'Nerves.'

An introduction to public consideration, from a non-medical point of view, of a condition of ill-health which is increasingly prevalent in all civilized society. In the first part of this work the author dwells on the errors in our mode of treating Neurasthenia, consequent to the extreme ignorance of the subject which still prevails; in the second part, attention is drawn to the principal causes of the malady forming the introduction to Part I. gives a brief history of the discovery, and the modes of treatment which have at various times been thought suitable to this most painful and trying disease.

BY CYRIL BENNETT.

12th. 184 pp., $1.50.

THE WINNIPEG COUNTRY;
OR, ROUGHING IT WITH AN ECLIPSE PARTY.

By A. ROCHELLE FELLOW.

With thirty-two Illustrations and a Map.

$1.50.

"The story is a piquant, good-humored, entertaining narrative of a canoe voyage ... a masterly book is seldom seen."—Literary World.

"This is a masterly narrative of personal incident ... the book will be a pleasant reminder to many of rough experiences on the frontier which is rapidly receding."—Boston Transcript.

"The picture of the people of the North-western territory twenty-five years ago, in contrast with its civilized aspect today, and the pleasant features of the writer's style, constitute the claim of his little book to present attention."—The Mail.

N. D. C. HODGES, 47 Lafayette Place, New York.
