the cortical cells are derived from the peritoneal epithelium, as stated by Janosik; and the medullary substance from the sympathetic elements, as described by Professor Mitsukuri.

In these various memoirs the authors express their indebtedness to Professors Mitsukuri, Hijima, and Yatabe for aid and assistance.

The plates are marvels of beautiful lithography, and the drawings are made with that skill and accuracy which characterize all their work.

**Taxidermy and Zoological Collecting.** By William T. Hornaday. New York, Scribner. 8°. $2.50.

Who the author of this work is, is certainly well known to most of the readers of Science. For years he has been connected with the National Museum as the chief taxidermist, and for a long time previously he was the taxidermist of a prominent natural science establishment. So it is with regret that we learn that Mr. Hornaday is to retire entirely from taxidermy forever. But associated with the chief author of the book was Dr. W. J. Holland, who supplied the chapters on collecting and preserving insects.

The considerable popular interest in zoology, and the great numbers of young naturalists coming forward, give reason to suppose that the book will meet with a considerable demand, especially as there is no other book of equal scope available.

The author urges on those who care for the preservation of specimens of many forms of animal life that they must be up and doing. It is already too late to collect wild specimens of the American bison, California elephant seal, West Indian seal, great auk, and Labrador duck. Very soon it will be impossible to find walrus, manatee, fur seal, prong-horn antelope, elk, moose, mountain sheep, and mountain goat. Then ducks are being rapidly exterminated for market, and numerous birds for the sake of fashion.

The first part of the book is on collecting and preserving. This is by no means an unimportant part of the whole, occupying nearly one hundred pages, and covers every part of the work of collecting zoological specimens, even to birds’ eggs and nests.

Taxidermy is treated in the second part, which occupies one hundred and fifty pages. This opens with an account of the worker’s laboratory, and closes with hints as to the most effective ways of ‘making up’ the finished specimen, for they must resort to paint as well as some other faded beauties.

There are then a number of pages devoted to the making of plaster casts. This makes the third part of the book, which is followed by the part (IV.) devoted to zoology, or at least so much of it as can be applied in the collecting and mounting of skeletons.

The closing chapters are on insect collecting, by Dr. Holland.

The book is liberally illustrated, credit being given by the author to Mr. Frederick A. Lucas for much assistance in this feature.

**AMONG THE PUBLISHERS.**

**THE WEEK, A Canadian Journal of Politics, Literature, Science and Art. PUBLISHED EVERY FRIDAY. $1.00 per Year. $1.50 for Four Months.**

The Week has entered its EIGHTH year of publication, greatly improved in every respect, rendering it more valuable. It is now a more complete and thorough organ of Press and Public opinion, and a more indispensable mart of political, literary, and scientific intelligence than it was one year ago. The Week is in its place, and it is the organ of the day.

The independence in politics and criticism which has characterized THE WEEK since its first issue will be rigidly maintained; and unceasing efforts will be made to improve its literary character and increase its attractiveness as a journal for the cultured home. Many new and able writers are now, or have promised to become, contributors to its columns, and the constant aim of the Publisher will be to make THE WEEK fully equal to the best literary journals in France and the United States. A week's work of THE WEEK will, from time to time, constitute an agreeable, London, Paris, Washington, or New York correspondence will appear at regular intervals. Special United States letters will appear during the sessions of Parliament.

THE WEEK, being the same size as "Harper's Weekly," is the largest paper of its class on the continent.

**PUBLISHERS BOTANICAL GAZETTE, Crawfordsville, Ind.**

W. B. Harrison of 3 East 14th Street, New York, announces the fifth edition of "A Manual of Land Surveying," by F. Hodgman and C. F. Bellows. This handy pocket volume of nearly five hundred pages contains, besides an elementary course of practice with instruments, a treatise upon the survey of public and private lands, and is adapted to the use of schools as well as of surveyors.

C. Heath & Co., Boston, will issue this month "Folk and Fairy Tales in French for Young or Old Children," selected and edited, with notes and vocabulary, by Professor E. S. Joynt of the University of South Carolina. The edition will contain a number of favorite fairy tales by Perrault, Mme. d'Aulnoy, etc., offering easy and entertaining reading, with notes and vocabulary. They will also issue this month Anderson's "Illustrated volume," with notes and vocabulary, by Dr. Wilhelm Bernhardt.

Ginn & Co. announce "Talks with Young People about the Wonders of the Heavens," by Sir Robert S. Ball, F.R.S., Royal Astronomer of Ireland, Illustrated. This book is based upon two courses of Christmas lectures delivered to children at the Royal Institution, Great Britain, and presents the fundamental facts and ideas of astronomy.

The recently completed fifth edition of Dr. M. Foster's well-known "Text-Book of Physiology" will be followed at once by the appearance of a sixth and cheaper edition of the work, in parts, carefully revised throughout by the author. The addition of much new matter to this edition of the book will permit of taking out a copyright on the American edition, which is to be published by Macmillan & Co., New York.

Horsford's Acid Phosphate.

The phosphates of the system are consumed with every effort, and exhaustion usually indicates a lack of supply. The Acid Phosphate supplies the phosphates, thereby relieving exhaustion, and increasing the capacity for labor. Pleasant to the taste.

Dr. A. N. Krout, Van Wert, O., says: "Decidedly beneficial in nervous exhaustion."

Dr. S. T. Newman, St. Louis, Mo., says: "A remedy of great service in many forms of exhaustion."

Descriptive pamphlet free.

Rumford Chemical Works, Providence, R. I.

Beware of Substitutes and Imitations.

CAUTION.—Be sure the word "Horsford's" is printed on the label. All others are spurious. Never sold in bulk.

POPULAR MANUFACTURES OF EXPANDING SUGAR AND DIETARY FOODS.

For use in Colleges and Normal Schools. Price 25 cents each. By N. D. C. Hodges, 47 Lafayette Place, N. Y.

SPEECH READING AND ARTICULATION TEACHING.

By A. MELVILLE BELL.

Price, 25 Cents. Practical Instructions in the Art of Reading Speech from the Mouth; and in the Art of Teaching Articulation to the Deaf.

DO YOU INTEND TO BUILD?

If you intend to build, it will be a mistake not to send for "Sensible Low-Cost Houses," now arranged in three volumes. In them you will find perspective views, floor plans, elevations, and estimates of cost for 100, tastefully, new designs for houses. They also give prices for complete Working Plans, Details, and Specifications, which enable you to build without delay. mistakes or quarrels with your builder. Vol. I contains 35 copyrighted designs of houses, costing between $200 and $500. Vol. II, contains 30 copyrighted designs, priced between $300 and $600. $1.00 each, or $3.00 for the set.

"COLONIAL HOUSES," a volume showing Perspectives and Floor Plans of houses arranged in the inimitable style of the Colonial Architecture, and having all modern arrangements for comfort. Price, $3.00, each, or $6.00 for the set.

"PICTURESQUE HOUSES FOR FOREST AND SHORE!"—This shows the best Plans of new houses for Summer Cottages, which are romantic, convenient, and cheap. Price, $1.00, each, or $3.00 for the set.

THE WINNIPEG COUNTRY; OR,
ROUGHING IT WITH AN ECLIPSE PARTY.
BY A. ROCHESTER PELLOW.

With thirty-two Illustrations and a Map.

12th. $1.50.

"The story is a piquant, good-humored, entertaining narrative of a marine voyage. A better, prettier book is seldom seen."—Literary World.

"This is a sprightly narrative of personal incidents. The book will be a pleasant reminder to many of many experiences on a frontier which is rapidly receding."—Boston Transcript.

"The picturesque desolation, the rugged country, the history of the Indian civilization, all are presented with great force and truth."—Boston Transcript.

NEW BOOKS.
JUST PUBLISHED.
FOSSIL RESINS.

This book is the result of an attempt to collect the scattered notices of fossil resins, exclusive of those on our own soil. The work is of great interest also on account of descriptions given of the insects found embedded in these long-destroyed, and vast worhs of early vegetation.

By CLARENCE LOWN and HENRY BOOTH.

12th. $1.

THE AMERICAN RACE:
BY DANIEL G. BRINTON, M.D.

"The book is one of unusual interest and value."—Jeter City.

"Dr. Daniel G. Brinton writes as the acknowledged authority of the subject."—Transcript.

"Dr. Brinton is an author who wishes to know the substance of what has been found out about the long-distance travels. A masterly discussion, and an example of the successful exercise of the powers of observation."—Philadelphia Ledger.

Price, postpaid, $3.

BY THE SAME AUTHOR:
RACES AND PEOPLES.

"The book is good, thoroughly good, and will long remain the best accessible elementary ethnography in our language."—Critic.

"We strongly recommend Dr. Brinton's 'Races and Peoples' to both the general and scholarly. We are not aware of any other recent work on the subject which is written in the English language."—Atlantic Quarterly.

"The book is an excellent one, and we heartily recommend it as an introductory manual of ethnology."—The Nation.

"A useful and really interesting work, which deserves to be widely read and studied both in Europe and America."—Brighton (Eng.) Herald.

"This volume is most stimulating. It is written with great clearness, so that everybody can understand, and, while in some ways, perform, superficial, grasping very well the complex field of humanity."—The New York Times.

"Dr. Brinton invests his scientific illustrations and measurements with an indestructible charm of narration, so that 'Races and Peoples,' avowedly a record of discovered facts, is in reality a strong stimulus to the imagination."—Philadelphia Public Ledger.

"The work is indispensable to the student who reads an instance of Cyrus Thomas to the course of ethnographic reading."—Philadelphia Times.

Price, postpaid, $1.75.

THE MODERN MALADY; OR, SUFFERERS FROM NERVES.

An introduction to public consideration, from a non-medical but scientific, view of a condition of ill-health which is increasingly prevalent in all ranks of society. In the first part of this work the author dwells on the errors in our mode of treating Neurasthenia, consequent on the wide ignorance of the subject which still prevails; in the second part, attention is drawn to the principal causes of the malady, and an allegory forming the Introduction to Part II. gives a brief history of nervous exhaustion and the modes of treatment which are at various times been thought suitable to this most painful and trying disease.

By CYRIL BENNETT.

12th. 184 pp., $1.50.

READY SOON.
THE RADIOMETER.

BY DANIEL S. TROY.

This will contain a discussion of the reasons for their action of the phenomena presented in Crookes's tubes.

SCIENCE.

I. THE SUPPRESSION OF CONSUMPTION.

By GODFREY W. HAMILTON, M.D.

II. THE SOCIETY AND THE 'FAD.'

By HERMAN M. SPENCER, Ph.D.

"Mr. Morgan founds a sensible and interesting address upon a text of verses that are only by the he.

By J. W. B. MORGAN.

"A young lady's magazine; namely, 'Browning and China Ledger.'

III. PROTOPLASM AND LIFE.

By ROBERT W. THOMAS, Ph.D.

"To be recommended to those who are not specialists.

By ROBERT W. THOMAS, Ph.D.

"Physicians will enjoy their reading, and find in it much food for thought."—St. Louis Medical and Surgical Journal.

IV. THE CHEROKEES IN PRE-COLUMBIAN TIMES.

By CYRUS THOMAS, Ph.D.

"Dr. Thomas has already presented to the public some reasons for believing the Cherokees were not the Indians on whom the subject has been obtained. A more careful study of the ' Cherokee' and the Eastern Indians are our conclusion. The author draws his evidence from the Indian record of the data of his race and from the Indian record of the data of his race.

"We cannot enumerate all the works and articles published by the late Professor Hertz in the field of medicine. We shall here mention only the one of them which has been most successful. It is a summary which has been translated into many languages and has been read by millions. It is the 'Practical Guide to the Study of the Neuroses.'"

V. THE TORNADO.

By H. A. HALE.

"The little book is extremely interesting."—Boston Transcript.

"All students of psychology will find the book full of interesting facts. Professor Jastrow's good qualities as a thinker and as a writer are too well and too widely known to require comment."—Public Opinion.

"A useful work for psychologists, as well as for the public, and for the use of the latter in the law courts in cases of reported cases of mental deficiency."—The Critic.

VI. TIME-RELATIONS OF MENTAL PHENOMENA.

By JOSEPH JASTROW, Ph.D.

"A useful book for psychologists, as well as for the public, and for the use of the latter in the law courts in cases of mental deficiency."—The Critic.

"A very useful book for psychologists, as well as for the public, and for the use of the latter in the law courts in cases of mental deficiency."—The Critic.

VII. HOUSEHOLD HYGIENE.

By MARY TAYLOR HENDERSON, E.D.

This will contain a discussion of the reasons for their action of the phenomena presented in Crookes's tubes.

The best monograph on home hygiene.—St. Louis Globe Democrat.

In 1871.

VIII. THE FIRST YEAR OF CHILD-HOOD.

By MARY D. JENKINS.

"A very useful book for psychologists, as well as for the public, and for the use of the latter in the law courts in cases of mental deficiency."—The Critic.
