when the moon was in the first quarter, I observed a bright spot resembling a small star or planet upon the shaded surface of the moon at a considerable distance from the illuminated portion of the satellite. This I have no doubt was due to the beams of the sun being reflected from the summit of one of the higher peaks before they had illuminated the surrounding country. I have no doubt the passage in question was suggested to the mind of the author by his having been witness of some similar phenomenon, although I have never heard of it being visible to the unaided eye.

T. D.

BOOK-REVIEWS.

This book was prepared at the suggestion of the Boston school authorities, and is designed both as a reading book and as an introduction to American literature. The authors represented are thirteen in number, including Franklin, Irving, Whittier, Lowell, and others, and the selections embrace a variety of articles in many departments of literature, both in prose and verse. The selections are longer than those in ordinary reading books, the whole of Whittier's "Snow-bound," for instance, being given, while other authors are represented either by entire works or by long extracts. It is stated in the preface that the Boston school authorities "planned the book and approved every selection;" but, if they did, we cannot think they are to be wholly commended as judges of literature. The book contains many doggerel verses, while, on the other hand, it presents some striking deficiencies. For instance, there is not in the whole book a single extract from our historians, although it is well known that we have better works to show in history than in any other department of literature. Moreover, there is not a religious article in the book, and very few that are even ethical; so that the collection cannot be regarded as a satisfactory epitome of the best American literature. The omissions are the more to be regretted because ethical and historical works are especially adapted for the instruction of the young. American literature is but a narrow field at best, and gleaners in it cannot afford to neglect any portion of it, least of all that portion from which the most useful moral lessons may be learned. We hope, therefore, that, if ever the book reaches a second edition, some changes will be made in its contents.

AMONG THE PUBLISHERS.

The third edition of "Electricity, treated Experimentally for the Use of Schools and Students," by Linnaeus Cuming, has been published by Messrs. Longmans, Green, & Co. The author has made such additions and alterations as seemed necessary to bring the book up to date.

Moses King of Boston, the maker of hand books on various cities, now announces a new work, to be called "King's Hand-book of New York City."

Messrs. Whittaker & Co. have in press the second edition of Dr. A. B. Griffith's "Teatise on Manures." It is a little more than two years since the work appeared. Fifty pages of new matter have been added.

The January number of Scribner's Magazine marks the beginning of the sixth year and eleventh volume of a periodical which has already attained a circulation of more than 140,000 copies monthly.

D. Appleton & Co. have under way a subscription-book of considerable importance, edited by Professor Shaler of Harvard. It is to be a general review of the America of to-day based upon the reports of the last census. The contributions to this volume will be by experts and men of high standing in the profession for which they speak.

D. C. Heath & Co., Boston, will soon issue the first four books of "Dichtung und Wahrheit," edited for them, with introduction and notes, by Professor C. A. Buchheim, editor of the Clarendon Press Series of German Classics. The edition will be especially adapted for pupils preparing for entrance to college, offering an advanced requirement in German, but will also have in view the numerous colleges that devote a portion of their time to the reading of Goethe's prose.

The frequent reports that Russia is about to seize Bokhara will lend interest to the article by the Rev. Henry Lansdell, D.D., in the January Scribner, entitled 'Bokhara Revisited.' In this article he says: 'It was not the policy of the Resident to interfere more than necessary in the domestic affairs of the Khansate, except when they related to Russian subjects; and as for annexing the Khanate, 'why,' as one asked of me, 'should they do that?' To administer the country in Muscovite fashion would cost a great deal more than the taxes would pay for, and if the Russians want anything done, they have simply to nod to the Emir and he does it. They are much too wise, therefore, to annex Bokhara, but if need arises it can of course be done at any moment."

The Chautauquan for January presents the following among other articles in its table of contents: Domestic and Social Life of the Colonists, IV.; by Edward Everett Hale; Trading Companies, by John H. Finley; Physical Life, IV., by Milton J. Greenman; National Agencies for Scientific Research, IV., by Major J. W. Powell; Science and the Feeding of Animals, by V. Hallenbeck; Progress in the Nineteenth Century, by Edward A. Freeman; Some Proposition of Nationalism, by Edward Arden; Niagara the Motor for the World's Fair, by Professor John Trowbridge; The Kindergarten Movement in Chicago, by Antoinette Van Hoesen Wakeman; How Women Figure in the Eleventh Census, by Margaret N. Wishard; Women's Robes in the Orient, by Countess Anne de Montana.

The American Academy of Political and Social Science has just published an essay on "Some Neglected Points in the Theory of Socialism." The author is T. B. Veblen of Ithaca. The monograph was written with the purpose of finding an economic ground for the existing unrest that finds expression in the demands of Socialists. The work is a criticism of Mr. Spencer's essay, "From Freedom to Bondage," and though Mr. Veblen claims to be rather a disciple than a critic of Mr. Spencer, he hardly proves himself such. The author shows very clearly how, under our present system, there is a constant effort even at the expense of real physical comforts and even necessities to make a greater display of one's ability to pay than one's neighbors. This "Economic Enslavement" he regards as the chief underlying cause of the present socialistic agitation.

The success of The Atlantic Monthly in certain departments during the last year or two will be continued during the year 1892, as shown by the following announcements. All the attractions which it will contain cannot, however, be mentioned here. The papers on marked men will include articles on George Bancroft, by W. M. Sloane; Orestes A. Brownson, by George Parsons Lathrop; John Esten Cooke, and Philip Pendleton Cooke, by Thomas Nelson Page; and James B. Eads, and others, will be continued. "An American at Home in Europe" is a series of papers by William Henry Bishop, the novelist, giving the experience of an American family which established itself abroad. Mr. Bishop tells about his experiences in daily living in Paris, Versailles, St.
Germain; the country and seacoast of France,—Dizan, Cherbourg, St. Malo, Pau; in Spain; in England,—Oxford, Windsor, Canterbury, Winchester, Venice, Lyons, and Avignon. Before taking the
attributing fiction to the magazine, Mr. Henry James will furnish a paper of reminiscences of James Russell Lowell's London life. The
"Studies of American Cities" are not mere descriptions, but criticisms, with a view to understanding the character of the cities and to finding the greatest influence on American life. The first of these will be a paper on Boston, by Ralph Waldo Emerson, now first published. "Private Life among the Romans" will be described in a paper by Miss Harriet Waters Preston and Miss Louise Dodge, whose joint studies of episodes of ancient history have been of peculiar interest. "On the человственные" will furnish a delightfully picturesque and graceful paper on Japanese life, as seen by a resident in Japan; and Mr. E. F. Fenollosa will discuss the influence of Japanese art on the art of Europe and America, in an early number. The best interests of the higher life of towns and cities will be considered in a series of papers on "Parks for Small Towns," "Local Museums of Art," "Free Libraries," etc. Papers on the Civil History of Our Country in War Time will be a feature of The Atlantic for 1892, and will be begun by an article by an eminent southern scholar, giving the grounds for his un-questioning allegiance to the Southern cause; and one by a distinguisned man of science from a Border State, accounting for his own decision in the same emergency. Attention will be given this year to education generally, and especially to the education of girls and women. These papers—from the most eminent authors of the same, by request of President Gilman, Professor Shaler, Dr. Cleveland Abbe, and others, which have appeared during the past year. The critical reviews of new books that are talked about will be continued.

—The December number of The Engineering Magazine contains a paper on "Landscape Beauty at Newport," by John De Wof, which treats the subject from the standpoint of giving definite and practical ideas. In the same number is the first of Professor Coleman Satter's series, entitled "American Supremacy in Applied Mechanics," which should be read by every one who desires some knowledge of the men and the forces which have wrought such astonishing changes in this age of engineering and science. Other papers in the same number are "A Permanent Census Bureau," by Edward Atkinson; "Geology from a Business Point of View," "Pictoresque Suburban Railroad Stations," "Improve Water and Public Health," "Fulton Night with Mechanical Engineers," "Conditions Causing a Cold Wave," "The Canadian Pacific Railroad.

—A new edition of "A Girl in the Karpathians" is announced by the Cassell Publishing Company. It will contain a new portrait of the author, Miss Menie Muriel Dowie (now Mrs. Henry Norman), and a preface and introduction written by her especially

Exchanges.

Wants.

Any person seeking a position for which he is qualified by his scientific attainments, or anyone about to go out, may have that of the author, to be had of a teacher of science, chemist, draughtsman, or what not, may have the report prepared under her own hand for cost of $2.00, if he will furnish an accurate statement of his qualifications, and a copy of the guidance of the character to be had of the person. Any person seeking information on any scientific question, the address of any scientific man, or any other thing may use this service for a sum per page with the consent of the person, if a careful attempt is made to do so.

WANTED.—Science, No. 175, July 9, 1892, also scientific articles to Vol. VII, Address N. O. Dogg, 6. Broadway, New York.

WANTED.—A position in the philosophical or pedagogical department of a college or university, by a young man who has had five years' practical experience in teaching, and who has done four years' post-graduate work in philosophy, desiring his attention during the last two years especially to study and to make a further investigation in scientific psychology and its applications in education. Address H. A., 3rd Avenue, near Broadway, N. Y., care of Science.

WANTED.—A suitable position in Washington, D. C., not connected with the Government, and with a salary not to exceed $2500 a year, by an experienced biologist with six years' university training. Applicant must be able to work for fourteen years; in a practical photographer, cartographer, and accustomed to the use of the type-writer. He is also capable of making the most finished drawings, of any description, for all manner of illustrative purposes in sciences; trained in museum methods, and work; also field operations and taxidermy in its various departments, and model making, production of casts, reconstructions of palaeontological specimens and similar employees. Address U. S. care Science, G Lafayette Plaza, N. Y.

WANTED.—By a young man (21), B. A. and Ph.D., with three years' experience as assistant in chemistry, position as instructor in chemistry or in natural sciences in college or academy, or other advantageous position as chemist. Give particulars as to work, salary, etc. F. W. M. A., Box 8, West Haven, Conn.

THE BOTANICAL GAZETTE.

A monthly illustrated journal of botany in English. 25 cents a number, $3.00 a year. Address PUBLISHERS BOTANICAL GAZETTE, Crawfordsville, Ind.

THE AMERICAN GEOLOGIC FOR 1891 AND BIER'S NEW ATLAS OF THE METROPOLITAN DISTRICT.

will be given to New Buyers to the Geologist for $35.00 (which is the regular price of the Atlas alone), if ordered through the offices of the Quarterlies. For other premiums see the Geologist for Nov., Dec., and Jan. Address THE GEOLOGICAL PUBLISHING COMPANY, 247 Broadway, New York.

BOOKS: How to Exchange them for others. Send a postal to the Science exchange office or send a note, stating your request, for any month from now on. The Science exchange, 247 Broadway, New York, will be glad to exchange.
for this edition. The new portrait shows us a pretty woman, without the slightest suggestion of anything masculine about her. The same firm announces a new edition of the Hon. Chauncey M. Depew's "Oration and After-Dinner Speeches," also a life of "Henriette Ronner, the Painter of Cat Life and Cat Characters," by M. H. Spielmann, editor of the Magazine of Art. It is for her pictures of cat life and cat character that Mme. Ronner has gained her reputation. A book that is bound to attract attention is "Shall Girls Propose?" which the Cassell Publishing Company issue. It is written by a "Speculative Bachelor," and comes just in time for the new year, which is leap year.

**A Tonic**

Horsford's Acid Phosphate.

A most excellent and agreeable tonic and appetizer. It nourishes and invigorates the tired brain and body, imparts renewed energy and vitality, and enlivens the functions.

Dr. Ephraim Bateman, Cedarville, N. J., says: "I have used it for several years, not only in my practice, but in my own individual case, and consider it under all circumstances one of the best nerve tonics that we possess. For mental exhaustion or overwork it gives renewed strength and vigor to the entire system."

Descriptive pamphlet free.

Rumford Chemical Works, Providence, R. I.

Beware of Substitutes and Imitations.

**CAUTION.**—Be sure the word "Horsford's" is on the label. All others are spurious. Never sold in bulk.

---

**POPULAR MANUAL OF VISIBLE SPEECH AND VOCAL PHYSIOLOGY.**

For use in Colleges and Normal Schools. Price 50 cents

N. D. C. Hodges, 874 Broadway, N. Y.

---

**PRIZE ESSAYS OF THE AMERICAN PUBLIC HEALTH ASSOCIATION.**

The four essays (Nos. 1, 2, 3, 4) in one volume of nearly two hundred large octavo pages, thoroughly indexed. Cloth, 50 cents.

N. D. C. Hodges, 874 Broadway, N. Y.

A NEW MONTHLY
THE INTERNATIONAL
JOURNAL OF MICROSCOPY AND
NATURAL SCIENCE.
The Journal of the
POSTAL MICROSCOPICAL and WESLEY
NATURALISTS' SOCIETIES.
Edited by ALFRED ALLEN and REV.
WILLIAM SPIERS.

CONTENTS OF JULY NUMBER:
Parasitic Food Affecting the Human
The Distance of the Stars.
Indians. Protozoa.
The History of the Microscope.
Our Young Naturalists' Pages.
To the Various Wast of Fear in a Pair of Bobins.
Leap Year.
Aspent of the Heavens - July, 1911.
Collectors' Notes for July.
Natural History of the Poisons of Toads.
Protective Mistletoe in Spiders.
Lilac of Antimony in Certain
Review.

NEW BOOKS.
JUST PUBLISHED.
FOSSIL RESINS.
This book is the result of an attempt to
collect the scattered notices of fossil resins,
exclusive of those on amber. The work is of
interest also on account of descriptions given of
the insects found embedded in these long-
continued exudations from early vegetation.
By CLARENCE LOWN and HENRY BOOTH.
12°. $1.

THE AMERICAN RACE.
By DANIEL G. BRINTON, M.D.
"The book is one of unusual interest and value . . ."
- Inter Ocean.
Dr. G. Brinton writes as the acknowledged
authority of the subject.-Philadelphia Press.
"The work will be of genuine value to all who
wish to know the substance of what has been found
out about the indigenous Americans." -Nature.
"A masterly discussion, and an example of the
success of Mr. Couch's methods of the powers of
research."-Philadelphia Ledger.
Price, postpaid, $2.

BY THE SAME AUTHOR.
RACEs AND PEOPLES.
"The book is good, thoroughly good, and will long
remain the best book on the subject."-American
journal of ethnology.-Philadelphia Ledger.
"The work is indispensable to the student who
requires an intelligent guide to a course of ethno-
graphy and races.-Philadelphia Ledger.
Price, postpaid, $1.75.

THE MODERN MALADY, or,
Sufferers from 'Nerves.'
An introduction to public consideration, from
a non-medical point of view, of a
condition of ill-health which is increasingly prevalent
in all ranks of society. In the first part of this work the
author dwells on the errors in our mode of treating Neuro-
thesia, consequent on the wide ignorance of the
subject which still prevails; in the
second part, attention is drawn to the principal
causes of the malady. The allegory forming the
Introduction to Part I. gives a brief history
of nervous exhaustion, and the modes of
treatment which have at various times been
thought suitable to this most painful and
trying disease.
By CYRIL BENNETT.
12°. 184 pp., $1.50.

THE RADIOMETER.
By DANIEL S. TROY.
This contains a discussion of the reasons for
their action and of the phenomena presented
in Crookes-
Price, postpaid, 50 cents.

Fact and Theory Papers

I. THE SUPPRESSION OF CON-
SUMPTION. By GODFREY W. HAMILTON, M.D.
"The inestimable importance of the subject, the
eminent names of the authors, the novelty of a work
which all combine to render the little treatise worthy of
special consideration."-Philadelphia Times.
Dr. Hamilton's book, and wish there were
more books like it." - Educational, Anti-Tobacco
Advertiser.
"The monograph is interesting in style, scholarly
and well worthy of careful consideration.
It is also
void of technical expressions, and can be easily read
and digested." - Pharmacological Rev.

II. THE SOCIETY AND THE "FAD." By AARON MOSKOW, M.D.
"Mr. Morgan found a sensible and interesting
subject, and addresses himself upon the subject.
A young lady's magazine; namely, "Browning and
Science." - New York Sun.

III. PROTOPLASM AND LIFE. By
W. E. LEONARD, M.D.
"To be commended to those who are not special-
ists in physiology, but wish to enjoy their reading,
and find in it much food for thought." - St. Louis Medical
and Surgical Journal.
"We are in great measure indebted to this
author for the history of his subject with
which this book should be supplemented by Dr.
"It is of extreme interest." - Medical Age.
"Worthy of a careful perusal." - Indiana Medical
Journal.
"An interesting and popular account of the
many branches of modern biological thought.
The fact that life is found everywhere is
of the greatest possible importance to
in every one of the branches of biology.
It will be of the greatest possible interest to
the masses of mankind and
the student in the sciences of nature.
"The author displays a very comprehensive
grasp of his subject, and
"Her system of the action of the tides in
the ocean is the most complete and accurate ever
yet attempted. It is a
work of the greatest possible importance to
the student of the ocean."
-ening w. r. w. R covenant.

IV. THE CHEROKEES IN PRE-CO-
LUMBIAN TIMES. By CYRUS THOMAS, M.D.
Dr. Brinton has already presented to the public
some reasons for believing the Cherokees were
earliest inhabitants of this country, and his book
on the subject has been published.
A careful study of the Indian traditions of the
Cherokees and the
relations of the tribes of the south and west
in the days of our fathers, will
prove of great importance and interest to
those who are interested in the history and
geography of the
early inhabitants of the New World.
"The book is good, thoroughly good, and will long
remain the best book on the subject."-American
journal of ethnology.-Philadelphia Ledger.
Price, postpaid, $1.75.

V. THE TORNADO. By H. A. HAZEN.
"The little book is extremely interesting."-Boston
Transcript.
"The book which I am writing is,
in fact, a chapter on 'Tornado Insurance,' and is of interest to
all property owners in the tornado States."-Boston
Herald.
"The tornado is a popular scientific subject in
music, because it
"The book is of the greatest possible interest to
those who are interested in the history and
government of the
early inhabitants of the New World.
"The book is good, thoroughly good, and will long
remain the best book on the subject."-American
journal of ethnology.-Philadelphia Ledger.
Price, postpaid, $1.75.

VI. TIME-RELATIONS OF MENTAL
PHENOMENA. By JOSEPH JASTROW, M.D.
"An excellent work on psychology, and well
written, and which contains many facts of
interest." - Psychological Review.
Professor Jastrow's good qualities as a
writer are too well and
too widely known to require comment."-Public
Opinion.
"A useful work for psychologists as well as the
lay reader- by setting forth in brief and easily
intelligible form the present state of knowledge in
regard to the function of mental
functions of the
mind." - The Critic.

VII. FAMILY HOUSEHOLD HYGIENE.
By MARY TAYLOR LIBBELL, 12°.
"Practical and sensible." - Public Opinion.
"The advice given is excellent and practical, which it
contains is terse and intelligently expressed." - Boston
Medical and Surgical Journal.
"Practical and warmly
written." - Springfield Reporter.
"The book on home hygiene." - St. Louis Globe Democrat.

VIII. THE FIRST YEAR OF CHILD-
HOOD. By MARY BARTLETT, M.D.
In Preparation.

N. D. C. HODGES, 874 Broadway, New York.
