the beast, it was as still as if cut from stone. The bird quivered, trembled, looked fixedly at the cat, and finally, with a feeble shake of the wings, fell towards the cat, which bound to seize it. A lady tells me that she: "does not believe that cats can charm birds, because she has seen a cat try to charm a parrot, and the bird, greatly alarmed, scolded loudly." This proves nothing, the parrot in general, or, more probably, that particular parrot, did not prove a good subject for the mesmeric power. I have seen people who cannot be hypnotized; they resist the effort, and nervous action becomes intensified.

J. McCaum Wright.

AMONG THE PUBLISHERS.

The W. J. Johnson Co., limited, have ready "The Electric Railway in Theory and Practice," a complete treatise on the construction and operation of electric railways, by O. T. Crosby and Dr. Louis Bell, fully illustrated and wholly practical.

— Henry Holt & Co. will shortly publish a translation of "Geschichte der Philosophie," by Dr. W. Windelband, professor in the University of Strasbourg.

— Thomas Nelson's Sons have ready an entirely new atlas by J. G. Bartholomew, entitled "The Graphic Atlas and Gazetteer of the World," over two hundred and twenty maps, charts, plans of cities, etc., all revised to present date, and a gazetteer of nearly $5,000 places and results of new census. Throughout the atlas the countries of the world have been treated with fullness in proportion to their commercial importance and interest. In the United States a separate map is given of each of the States and Terri ories. The Canadian provinces are treated in similar detail. The maps have been specially compiled from the latest and best government survey maps and have undergone local revision for the verification of new counties, townships, and railroads. Considering the vast amount of information given, the atlas is a marvel of compactness and practicability.

— The most important work on the general subject of linguistic science that has appeared in 1891 is that of Professor Georg von der Gabelentz, "Die Sprachwissenschaft, Ihre Anfänge, Methoden und bisherigen Ergebnisse," Leipzig (Weigel, publisher), pp. xx and 502. The wide-reaching and comprehensive scope of this treatise is shown by the very title, and readers will soon see that the author fulfills what he promises. Through his great practical experience the author, well known for his work on Oriental and Asiatic languages, is enabled to give more hints about linguistic studies and their scientific bearing than such men as have confined their energies to inductive language alone. The volume gives us the views of a man familiar with all possible types of human speech, the monosyllabic as well as the polysyllabic, and introduces us to the most fascinating way into all the morphological intricacies of the verb, noun-verb, and sentence. In its make-up the book comes nearest the celebrated "Principles of Language History," by Paul, and supplements it in many different ways.

CALENDAR OF SOCIETIES.

Women's Anthropological Society of America, Washington.

PUBLICATIONS.

THE WINNIPEG COUNTRY; OR, BOVING IT WITH AN ECLIPSE PARTY.

By A. ROCHESTER FELLOW.

With thirty-two Illustrations and a Map.

12mo., $1.30.

"The story is a pleasant, good-humored, entertaining narrative of a canoe trip, prettier better, with a new canoe," etc.

— This is a spirited narrative of personal incident. The book will be a pleasant reminder to many of rough experiences on a frontier which is rapidly passing away. The picture of our desolate North-western territory twenty years ago, its contrast with its civilized aspect to-day, and the pleasant features of the writer's style, constitute the claim of his little book to present attention. — The Dial.

N. D. C. HODGES, 874 Broadway, N. Y.

THE AMERICAN RACE.

By DANIEL G. BRINTON, M.D.

"The book is of unusual interest and value."— Juter Ocean.

— Dr. Daniel G. Brinton writes as the acknowledged authority of the subject. — Philadelphia Press.

"The work will be of genuine value to all who wish to know the substance of what has been found out about the indigenous Americans." — Nature.

"A masterly discussion, and an example of the successful education of the powers of observation." — Philadelphia Ledger.

Price, postpaid, 62.

N. D. C. HODGES, 874 Broadway, N. Y.

POPULAR MANUAL OF VISIBLE SPEECH AND VOCAL PHYSIOLOGY.

For use in Colleges and Normal Schools. Price 50 cents sent free by post by N. D. C. HODGES, 874 Broadway, N. Y.
A Tonic

Horsford's Acid Phosphate.

A most excellent and agreeable tonic and appetizer. It nourishes and invigorates the tired brain and body, imparts renewed energy and vitality, and enlivens the functions.

Dr. Ephraim Baten, Cedarville, N. J., says:

"I have used it for several years, not only in my practice, but in my own individual case, and consider it under all circumstances one of the best nerve tonics that we possess. For mental exhaustion or overwork it gives renewed strength and vigor to the entire system." Descriptive pamphlet free.

Samford Chemical Works, Providence, R. I.

Beware of Substitutes and Imitations.

CAUTION.—Be sure the word "Horsford's" is on the label. All others are spurious. Never sold in bulk.

SCIENCE.

ways, as it does also the works of Friedrich Müller and Whitney. There is no chapter in language-study which is not fruitfully hinted at or fully treated by the author: the composing of grammars, the analytic compared with the synthetic system, the various phonetic modes of recording languages, the medley languages, theory of roots, the tests of affinity, the possibility of composing scientific dictionaries, the analysis which is inherent in etymological research, synonymic dictionaries, etc.

— Dr. Andrew D. White will open the March Popular Science Monthly with a chapter on "Astronomy" in his Warfare of Science series. The strenuous exertions made by both the Catholic and the Protestant clergy to suppress the teachings of Copernicus and Galileo are set forth in this article with such strong evidence as to admit of no denial or shifting of responsibility. "The Organ" will be the subject of the article in the American Industries series. The author, Mr. Daniel Spilane, describes some of the noted instruments in the United States, and shows that American organ builders have made good use of the scope for individuality which their art allows. The article is fully illustrated. Under the title "Social Statistics of Cities," the March number will have a paper by Carroll D. Wright, comparing the area and population, and the cost of each department of public works, in fifty cities of the United States. The comparison contradicts some prevailing opinions as to what cities have the most expensive governments.

"The Cotton Industry of Brazil" will be described by John C. Branner, formerly assistant geologist of the Brazilian Geodetic Survey. Mr. Branner believes that the production and manufacture of cotton in Brazil is destined to increase, but that the country will not become a competitor of the United States in this industry.

"Darwin after Darwin," is the title of a book that George J. Romanes is preparing.

RACES AND PEOPLES.

By DANIEL G. BRINTON, M.D.

"The book is good, thoroughly good, and will long remain the best accessible elementary ethnography in our language."—The Christian Science Monitor.

"We strongly recommend Dr. Brinton's 'Races and Peoples' to both beginners and scholars. We are not aware of any other recent work on the subject of which it treats in its treatment of the English language."—Atlantic Quarterly.

"His book is an excellent one, and we can heartily recommend it as an introductory manual of ethnology."—The New York Times.

Dr. Brinton verifies his scientific illustrations and measurements with an indubitable charm of narration, so that 'Races and Peoples' constitutes a record of discovered facts, is in reality a true stimulant to the imagination."—Philadelphia Public Ledger.

"The work is indispensable to the student who requires an intelligent guide to a course of ethnographic reading."—Philadelphia Record.

Price, postpaid, $1.75.

THE MODERN MALADY? or, Sufferers from 'Nerves.'

An introduction to public consideration, from a non-medical point of view, of a condition of ill-health which is increasingly prevalent in all ranks of society. In the first part of this work the author dwells on the errors in the modes of treating Neurosis, consequent on the wide ignorance of the subject which still prevails; in the second part, attention is drawn to the principal facts of the disease.

By CYRIL BENNETT.
