Another point to be emphasized is that in my husband's mind the terminal moraine showed the halting place of the solid ice only at the time of its greatest extent, and did not define or limit the irregular drift-covered areas in many instances found lying beyond it, which were due to the action of drainage-streams, icebergs or the deposits in temporary lakes.

I have first and only instance my husband ever saw which led him to believe in the existence of a large ice-stream (whether local or otherwise remains to be determined), between which and the glacial epoch as vast an interval of time had elapsed as that which separates the glacial period from the present day, was found in the deposits in Frankley Hill, near Birmingham. It was his intention, had he remained in this world, to make a thorough re-examination of all England, lest similar deposits had elsewhere escaped his notice; but he never at any time associated the Frankley Hill till and graved with the "fringe" of the glacial period, from which it was wholly distinct.

Permit me to say in closing that the unhindered courtesy and generosity shown me by Dr. Croeskey and many others among the English geologists—some of whom are entirely opposed to my husband’s conclusions—are beyond all praise and any acknowledgment which it is in my power to give. If, when I have a future to turn to my own countrymen for aid in finding the true character of his MSS. relating to the geology of the New World. I experience even a fraction of the kindness which has surrounded me in England, I shall have nothing to desire.

WANTS.

- A young man, a Swarthmore College junior, a position as principal of a public high school in one of the Gulf States, or as instructor in botany, physiology, and geology in an academy or normal school. Address, B. B., of Librarian, Yonkers, N. Y.

- A teacher of geography who is familiar with the fossils of the Hamilton group, as an instructor of Geography during July next at the Natural Science Camp on Canadaguia lake. Address, A. B. E. B., 209 Sixth Ave., Rochester, N. Y.

- A man as correspondent for one or two daily or weekly papers, preferably in the East, in the capacity of a position on editorial staff of Harper's Magazine. Address, E. C. B., 14 Elm St., Hartford, Conn.

- A librarian wanted for a German architectural works at night (no writing). One familiar with technical terms desired. Address “A.,” Box 439, New York Post Office.

- A position in a manufacturing establishment by a manufacturing Chemist of inventive ability. Address M. W. B., of Science, 242 Broadway, N. Y.

- Books on Anatomy and Hygrometry. Will pay cash for or give similar books in exchange. Also want medical bataill and photo equipment. Address DR. ANDERSON, 158 State street, Chicago, Ill.

- A college graduate with some normal training, to teach sciences, at $1,000 per year, in a Southern college. A Baptist or a Methodist-prefered. Also must be a first-class Latin scholar. Address A. H. BEALS, Box B, Millesgeville, Ga.

- A professorship in Chemistry is wanted by a young man who has had five years of instruction by lectures and experiments rather than by textbook. Also must be a Christian. Address, A. M. B., of Philosophy, Theological Seminary where there is a good student's laboratory. Special points of strength, inorganic and organic chemistry, control of a class and good order during lectures and experiments, willingness to work with chemicals and skill in the manipulation of apparatus. The appointment is open to a well-linguished educator who has been given to refer to his MSS. at all times, to each and every paper at least, in style paying less than $1,000. Address E. B. E., care of...
