LETTERS TO THE EDITOR.

Correspondents are requested to be as brief as possible. The writer's name is in all cases required as a proof of good faith.

On request in advance, one hundred copies of the number containing his communication will be furnished free to any correspondent.

The editor will be glad to publish any queries consonant with the character of the journal.

**A RECAPTURE FROM A RIVER PIRATE.**

The Jackson River of Bath and Alleghany counties, Virginia, affords an interesting example of recapture of a tributary A of Back Creek, as the folds of permin time were higher to the east and died away westwardly. At a later date, probably at the time of the cretaceous tilting, when the hills sloping east became steeper, tributary B, of Jackson River, beheaded the pirate and recaptured her own waters.

Coller Cobb.

Chapel Hill, N. C.

THE TIN ORES OF NEW SOUTH WALES AND SOUTH DAKOTA.

The similarity of occurrence and of mineral aggregation of the tin ores of New South Wales and those of the Black Hills, South Dakota, is worthy of mention. The ores of both regions are extensively shown in the Physics and Mining Building, Chicago Exposition, and it would be difficult, if not impossible, for an ordinary observer to separate them according to locality if they should become mingled. The ores of both places occur in veins of the granitic type.

Wm. P. Blake.

Shillington, Wis., Sept. 11, 1893.

**Indigestion.**

Horsford's Acid Phosphate

Is the most effective and agreeable remedy in existence for preventing indigestion, and relieving those diseases arising from a disordered stomach.

Dr. W. W. Gardner, Springfield, Mass., says, "I value it as an excellent preventive of indigestion, and a pleasant acidulated drink when properly diluted with water, and sweetened."
