CONTENTS OF VOLUME IV.

SPECIAL ARTICLES.

Abbott, C. C. The color-sense in fishes. Il. 336

American association for the advancement of science. Proceedings of the section of mathematics and astronomy, 291; of physics, 296; of chemistry, 320; of mechanical science, 322; of geology and geography, 325; of biology, 336; of botany and microscopy, 342; of anthropology, 343; of economic science and statistics 346

American association meeting in Philadelphia. 1893

American historical association. 312

American oriental society. 443

American ornithologists' union 374

American public health association 440

Armsby, H. P. Special manures for particular crops 57

Association of official agricultural chemists of British States 312

Babitt, Frank E. Some implements of the Minnesota Ojibwas and anthropological exhibition at the American association 298

Blake, W. P. The Carson-City lichenologists. Il. 273

Blanford, W. T. The correlation of geological formations 215

Botanical club of the American association 358

Braunwell, Sir F. J. The relation of mechanical science to heat and cold 208

Branner, J. C. The pororoca, or bore, of the Amazon. Il. 488

British association for the advancement of science. Proceedings of the section of mathematical and physical science, 248; of chemical science, 254; of geography, 257; of biology, 333; of botany and microscopy, 342; of economic science and statistics, 383; of mechanical science, 387; of anthropology, 393

British association, some distinctive features of the 203

Brooks, W. K. A new law of organic evolution 352

Carpentier, W. L. Education at the international health exhibition 353

Cholera bacillus. Koch's reply to his critics 554

Christmas greeting 560

Civil engineers, meeting of, at Buffalo 11

Committee reports of the American association 357

Comparative study of the two associations 271

Cope, E. D. Catagenesis, or creation by retrograde metamorphosis of energy. Address to the American association 240

Dall, W. H. A Musulman propaganda 457

Dana, C. L. A scientific study of lawn-tennis 473

Danish international polar station. Il. 478

Davis, W. M. Drumlins. Il. 418

Temperature and its changes in the United States. Il. 589

Tornadoes, and how to escape them. Il. 572

Baton, John. Scientific methods and scientific knowledge in common affairs 246

Eclipse, 1885. Il. 578

Eddy, H. T. College mathematics. Address to the American association 230

Electrical conference, notes on the 313

Electrical testing establishments 224

Emission and contagious diseases 144

Excursion map of the vicinity of Baltimore 513

Exploration of the Kowak River. Il. 551

Exploration of Putnam [Kowak] River, Alaska 496

Filhol, H. The echinoderms dredged by the Talisman. Il. 102

The lower forms of life dredged by the Talisman. Il. 171

Forms of the brachiopoda. Il. 475

Poli, H. The changes which fermentation produces in Nature. Il. 365

G. A. George Bentham. Portrait 352

Greene, C. E. Shaft-sinking by freezing 443

Greenwich mean time. Il. 366

Hagen, H. A. Lawsuits against grubs and grasshoppers 188

Harvard physiological laboratory. Il. 128

Higher and logical education 35

History of almanacs. Il. 492

Hochstetter, Ferdinand von. Portrait 470

Holmes, W. H. Burial-marks of the ancient Peruviens. Il. 10

Hôtel des Népalais, and what became of it. Il. 360

How far a light may be seen under water 421

Hubbard, G. G. Canonical dates between the Atlantic and the Pacific. Map 434

Importance of chemistry in biology and medicine 454

Indian languages of South America 138

International polar stations. Map 370

Johnson, A. B. North-American currents. Il. 415

Kafiristan 404

Koch's work upon tuberculosis, and the present condition of the science 59

Kunz, G. F. Korean curios. Il. 172

Langley, J. W. Chemical affinity. Address to the American association 294

Late news from the north-west 474

Lefroy, Sir J. H. Recent geographical discovery. Address to the American association 211

Lesley, J. Peter. Portrait 190

Limitations of submarine telegraphy. Il. 438

Lyon, D. G. Semitic notes 378

Macfarlane, James. The formation of canons and precipices 99

Madison educational convention 112

Map of the solar system. Il. 583

Meridian conference 426

Moseley, H. N. The physiology of deep-sea life. Address to the British association 209

Munroe, C. E. Recent observations on explosive agents. 18

National conference of electicians 127

New Bogoslof volcano 138

New maps of the heavens. Maps 580

New volcano of the Bering Sea. Il. 432

Newcomb, Simon. Can ghosts be investigated? 525

Psychic force 572

North-African archeology 438

Notice of ethnologic publications 15

October meeting of the National academy of sciences 366

Osmotic pressure in schools 497

Overwork in German schools 136

Paul, H. M. Edison's three-wire system of distribution 477

The equatorial candy. Il. 101

Krakatoa 135

Measuring earthquakes. Il. 516

A proposed new departure in hygrometry 137

Radiant matter in an Edison lamp 374

Peirce, C. S. The old stone mill at Newport. Il. 512

Philadelphia meeting of the American association 229

Powell, J. W. Certain principles of primitive law 436

Marriage law in savagery 471

Psychical research in America 359, 399

Railway-signals at the electrical exhibition 356

Rathbun, R. American appliances for deep-sea investigation. - The dredges. Il. 146

The same. - Trawls and tangles. Il. 225

The same. - Miscellaneous. Il. 400

The American initiative in deep-sea dredging 54

Rayleigh, Lord. Recent progress in physics. Address to the British association 179

Rayleigh, Lord, president of the British association. Portrait 161

Ridgway, Robert. The bird-collection in the U. S. national museum 496

Biley, C. Y. The insects of the year 555

Roberts, I. P. Important agricultural statistics 375

A few pertinent hints to farmers. Il. 576

Rockwood, C. G., jun. Earthquakes in the United States and Canada 569

Ruscoe, H. E. Progress of chemistry since 1848. Address to the British association 206

Ruby-hill mines, Aurelia, Nev. 456

INTELLIGENCE FROM AMERICAN SCIENTIFIC STATIONS.
Johns Hopkins university, 72.
U. S. bureau of ethnology, 22.

RECENT PROCEEDINGS OF SCIENTIFIC SOCIETIES.
Academy of natural sciences, Philadelphia, 23, 154, 185.
Brooklyn entomological society, 44.
Cincinnati society of natural history, 44, 293.
Engineers' club, Philadelphia, 24.
Minnesota academy of natural sciences, 73.
New-York microscopical club, 29.
New-York natural-history society, 72, 292.
Philadelphia, 185.
Philosophical society, Washington, 154, 185.
Torrey botanical club, New York, 46.
Trenton natural-history society, 72, 292.

[Subsequent proceedings of some of these societies are given in the advertising pages, Oct. 31 and later.]
LIST OF ILLUSTRATIONS.

Adelaide peninsula, map showing position of, relative to Hudson Bay opposite 545

Airplane, experiment with, at Chalais-Mendon, 481; invented by Victor Tatin 492

Africa, map of Joseph Thomson’s explorations in eastern 48

Air, simple experiment for showing pressure of 265

Almsacker, Bickerstaff’s Boston, litograph of 495

Amazon River, map of mouth of, 489; sketch on the map of Porfírino’s in, showing the uprooted trees, 490; section of a falling bank on, 490; shore of, washed by the porories 491

Aurora, artificial 466

Balloon, map of voyage, Aug. 7, 1884, in, 299; Berard and Kroh on voyage of, Aug. 9, 1884, map of Tissandier’s voyage, Nov. 9, 1884, in 502

Barrande tablet 139

Bechly, George, portrait and signature of 401

Blake, deck of, ready for dredging 402

Bogolov Island and Hague volcano 417

Bouy, iron man, 415; Courtenay’s whirling, 416; Pinte gas, 418; chart of stray in the North Atlantic 417

Calendar, church of the fourteenth century, 486; stone, Meox. E., portrait and signature of 494

Challenger, the dredging and sounding apparatus on board the, 117; the relative positions of the ship, the messenger-weights, the taggle, and the dredge at different stages of paying-out from 177

Chelydra serpentina 37

Circumolar stations, chart of international 370

Cromer-teacher 576

Crystallization sediments (3 figs.) 465

Cystophora cristata (5 figs.) 514, 515

Diamond, the largest known 299

Dredge, Ohio Frederick Müller’s, 146; the naturalist’s deep sea, 146; the Challenger, 149; first form of the Blake, 149; Verrill rake, 150; Chester rake, 150; Benedict rake, 151; relative size of 401

Dredging, Sibbige’s accumulator for deep sea 403

Drumlin (10 figs.) 418, 419, 420

Earthquake measurements (4 figs.) 516, 517, 518

Eclipse, map of solar, of March 16, 1885, 579; of Sept. 8, 1885 579

Electric-light circuits (2 figs.) 123, 124; showing use of storage-batteries in, 388; multiple-wire systems 477

Equatorial coude at the Paris observatory 302

Finn Håkonsen, portrait of 465

Flint Harpoon, broken and relics of the U. S. fish commission steamer, 147; forward deck of the 147

Fly’s foot (3 figs.) 219

Gem-embroiding, the White-dental engine applicable to 106

Globigerina and Orbubella 171

Grand Canion, diagram showing erosion of, 64; at the foot of the Trexorro 68

Greely’s party, map showing points visited by 90

Hallauer, Octave, portraits and signature of 307

Heaven, maps of the 580

Hochstetter, Ferdinand von, portrait and signature of 471

Hötel des Neuchâtelais 290

Hudson Strait, map of the north-western shores of 220

Hylo versicolor 88

Igel, implements of the (12 figs.) 82, 83, 84, 85

Indian chopping-stone 529

Insects, swarming 79

Jouffroy, Mme. Claude de, statue of 360

Kassa-an Bay, Cape Grindal, E. 3½ N. 12 miles 561

Korean curry (4 figs.) 173

Kowak River, ice-ridges on 551

Laboratory, Harvard physiological, general plan of, 128; hour of, 129; interior of, 130; interrupter-case in, 131; respiration apparatus in 132

Lahontan lake-beds in Humboldt valley 68

"  Paws, overturned fold in the 555

Mask, Peruvian burial 11

Mesogoniost austrotodon 388

Microscope for class-room demonstration of 491

Mill, old stone at Newport 513

Moraine of the second glacial period, general map of the terminal 58

Museus, apparatus for measuring strength of 521

Netschulik Innelti (5 figs.) 549, 554; map showing distribution of, about Adelaide peninsula 545

Nicaragua canal, maps of 549

Ocean, bottom of, at a depth of 1,500 fathoms, 104; bottom of, at a depth of 1,200 metres, 170; thermometric curves and corresponding depths of the, 172; bed of profile of the, traversed by the Challenger 172

Objiba net-float, 229; rat-arrow, 529; weights 529

Paleozoic rocks in Belgium, restoration of a distorted region of 436

Petals, the evolution of 82

Photograph, novel form of 124

Photographic drop-shutter, speed of 483

Plants, rotation experiments on germinating (7 figs.) 51, 52

Polar station, Danish international, at Godthab, Greenland 475

Porcupine, dredging arrangements at the stern of the British ship 44

Pot-hole found in a Pennsylvania coal-mine 469

Rama sylvatica 38

Rayleigh, Lord, portrait of 159

Reservoir Butte, showing terraces of the Bonneville shorelines opposite 47

Seal, hooded (5 figs.) 514, 515

Sawad Lake, entrance to 553

Selected illustrations from contemporary foreign journals: diving-chamber for submarine exploration; Pie du Midi, meteorological and chemical laboratory on (2 views); halo seen at Paris, March 26, 1884; vertical solar ray seen at Paris, March 26, 1884; leaf-butterfly, — in No. 80. 563

Sella, Quintino, portrait of 542

Steve, Verrill’s cradle 404

Solar system, chart of 483

Spider towers,200;issuing (3 figs.) 115

Sudan and the Nile, map of opposite 456

Sun, view of, prepared by the Harvard college observatory, opposite 563; spot as seen June 30, 1885, 564; spot as seen July 25, 1885, 566; and planets, relative size of 564

Tangles, Verrill’s form of 228

Telescope, tables, raising of (4 figs.) 459

Temperature curves, showing the daily and annual ranges for various places in the United States 570

Thermodynamics, diagram illustrating possible exceptions to second law of 42

Thomson, Sir William, portrait of 431

Thomson’s kinetic theory of matter (2 figs.) 205

Thought-transference, diagrams (5 figs.) 41, 42

Time, diagram showing comparison of mean with solar, at the several seasons of the year, 280; outline-map, with dials showing standard railway opposite 576

Tornado, June 11, 1882, effect of, at Grinnell, la. 573

Tornades of Feb. 19, 1883, map of the tracks of 572

Track of fossil elephant, 274; resembling the imprint of human feet, 274; cross-section of impression of, 275

Bird, 392; diagonal form of, 532; spots, two large (4 figs.), 460, 461

Trap, Sibbige’s gravitating 228

Trawl, the, beam, 225; the Blake, 226; wings, 227; safety books for attaching beam, to the drag-rope 403

Umbril limit 337

United States, map showing the divisions of the signal-service, of standard time, and the mean annual isotherms in the 596

Well, spouting oil 64

Wurtz, Charles Adolph, portrait and signature of...
Science ns-4 (74), 1-30.
